Datasource: 2011 National Fire Incident Reporting System (NFIRS)*

This file includes all fires that occured during 2011 as reported by U.S. Fire Departments (FDs) to the NFIRS, **summarized at the ZIP code level**. NFIRS typically captures about three-quarters of all reported fires in the U.S. per year; the **counts are for information only - analyses should be based upon the "percent" fields**. To be included in this data extract, the incident report included a valid ZIP code. Accuracy of the ZIP code is dependent upon the reporting FD. ZIP codes with zero fires reported are not included in this dataset.

Variable	Description
STATE	State in which the zip code is primarily located
ZIP	Zip code with fire(s) as reported by fire department (25,402 ZIP codes in dataset)
Fires	Total count of fires reported for this ZIP code (Total count for this file: 958,453)
Major	Number of major fires - major defined as >= $10k damage OR one or more civilian casualties (injuries or fatalities) reported
Strucfires	Number of structure fires
MajorPCT	Percent of all fires that were classified Major

The next five variables sum to 100% for each ZIP code

ResStrucPCT	Percent of all fires that were classified "Residential Structure"
NonresStrucPCT	Percent of all fires that were classified "Non-Residential Structure"
VehPCT	Percent of all fires that were classified "Vehicle"
OutsidePCT	Percent of all fires that were classified "Outside"
OtherPCT	Percent of all fires that were classified type "Other"

The next four variables apply to structure fires only. There are several other cause codes; these are four of
Because these are not all of the cause codes, these four will not sum to 100% for each ZIP code

Cause_IntPCT	Percent of all structure fires attributed to Intentional cause
Cause_SmokingPCT	Percent of all structure fires attributed to Smoking cause
Cause_HeatingPCT	Percent of all structure fires attributed to Heating cause
Cause_CookingPCT	Percent of all structure fires attributed to Cooking cause
