

# Help Restore Our Burned Forests

**Millions of acres** damaged by wildfire urgently need native trees to prevent erosion and provide habitat for wildlife. These trees will purify our water, clean the air we breathe, and sequester climate-changing carbon dioxide for generations to come.

**You can help** restore wildfire-damaged forest ecosystems through **Wildfire ReLeaf**. The USDA Forest Service matches every tree planted, tree-for tree, which means your \$25 donation plants 50 native trees in an area burned by destructive wildfire.

**Every  
Dollar Plants  
Two Trees.**

**PLANT TREES ON-LINE AT [WWW.WILDFIRERELEAF.ORG](http://WWW.WILDFIRERELEAF.ORG)  
OR CALL 1-800-545-TREE (8733) TODAY.**
