D.2 Coastal Flooding Analyses and Mapping: Atlantic and Gulf Coasts .....	1
D.2.1 Atlantic and Gulf Coast Guidelines Overview .....	6
D.2.1.1 Atlantic and Gulf Coast Settings and Characteristics.....	8
D.2.1.2 Atlantic and Gulf Coast Flood Map Projects .....	13
D.2.1.2.1 Project Scoping.....	13
D.2.1.2.2 Regional Versus Local Studies.....	14
D.2.1.2.3 Sheltered Waters.....	15
D.2.1.2.4 Debris .....	17
D.2.1.2.5 Beach Nourishment and Constructed Dunes .....	18
D.2.1.2.6 Data Requirements .....	18
D.2.1.2.7 Hazard Zone Definitions and Use by FEMA .....	23
D.2.1.2.8 Reporting Requirements .....	25
D.2.2 Study Methodology .....	1
D.2.2.1 Overview .....	1
D.2.2.2 Setting .....	3
D.2.2.2.1 Open Ocean Coasts, Inland Bays, and Sheltered Waters .....	4
D.2.2.2.2 Shoreline Profile Settings .....	4
D.2.2.3 Coastal Zones .....	7
D.2.2.4 Event and Response Analysis Considerations.....	9
D.2.2.5 Selection of Events .....	10
D.2.2.6 Summary of Methods .....	11
D.2.3 Flood Frequency Analysis Methods .....	1
D.2.3.1 The Base Flood.....	1
D.2.3.2 Event vs. Response Statistics .....	2
D.2.3.2.1 Event-Selection Method .....	3
D.2.3.2.2 Response-based Approach.....	3
D.2.3.3 General Statistical Methods.....	4
D.2.3.3.1 Elementary Probability Theory .....	5
D.2.3.3.2 Distributions of Continuous Random Variables.....	6
D.2.3.3.3 Stationarity .....	8
D.2.3.3.4 Correlation Between Series .....	8
D.2.3.3.5 Convolution of Two Distributions.....	9
D.2.3.3.6 Important Distributions .....	9
D.2.3.4 Data Sample and Estimation of Parameters .....	13
D.2.3.4.1 Plotting Positions.....	13
D.2.3.4.2 Method of Moments: Conventional Moments .....	14
D.2.3.4.3 Method of Moments: Probability-weighted Moments and Linear Moments .....	14
D.2.3.4.4 Maximum Likelihood Method .....	15
D.2.3.5 Extreme Value Analysis in a FEMA Flood Map Project .....	15
D.2.3.6 Simulation Methods.....	17
D.2.3.6.1 Joint Probability Method (JPM) .....	17
D.2.3.6.2 Empirical Simulation Technique (EST) .....	18
D.2.3.6.3 Monte Carlo Method .....	19

D.2.3.6.4	Period of Record and Data Sample Area.....	19
D.2.3.7	Additional Resources.....	19
D.2.4	Water Levels.....	1
D.2.4.1	Overview and Definitions.....	1
D.2.4.2	Astronomic Tide .....	2
D.2.4.2.1	Tides and Tidal Datums.....	2
D.2.4.2.2	Tide Observations.....	3
D.2.4.2.3	Tide Predictions.....	4
D.2.4.2.4	Tidal Constituents.....	4
D.2.4.2.5	Tide Gage Analysis (Surge Anomaly) and Extraction of Non-astronomic Stillwater from Gage Records .....	5
D.2.4.3	Storm Surge .....	7
D.2.4.3.1	General Considerations.....	7
D.2.4.3.2	Simplified One-Dimensional Surge Modeling .....	9
D.2.4.3.3	Surge Estimation from Tide Data.....	11
D.2.4.3.4	Aspects of 2-D Surge Modeling .....	11
D.2.4.3.5	Storm Climatology .....	16
D.2.4.4	Water Levels in Sheltered Waters .....	17
D.2.4.4.1	Variability of Tide and Surge in Sheltered Waters.....	18
D.2.4.4.2	Tidal Inlets.....	20
D.2.4.4.3	Seiche.....	20
D.2.4.4.4	Documentation.....	21
D.2.4.5	1-Percent-Annual-Chance Stillwater Levels .....	21
D.2.4.5.1	Tide Statistics .....	22
D.2.4.5.2	Surge Statistics .....	22
D.2.4.5.3	Combined Effects: Surge Plus Tide.....	22
D.2.4.5.4	Combined Effects: Surge Plus Riverine Runoff.....	24
D.2.4.6	Nonstationary Processes .....	25
D.2.4.6.1	Relative Sea Level – Sea-level Rise .....	26
D.2.4.6.2	Relative Sea Level – Land Subsidence.....	26
D.2.4.6.3	Astronomic Tide Variation.....	26
D.2.5	Wave Determination.....	1
D.2.5.1	Overview .....	1
D.2.5.2	Open Coasts .....	5
D.2.5.2.1	Wave Source.....	6
D.2.5.2.2	Wave Transformation .....	8
D.2.5.3	Sheltered Coast .....	8
D.2.5.4	Additional Considerations .....	9
D.2.5.4.1	Extratropical Storms .....	9
D.2.5.4.2	Wind Characteristics.....	9
D.2.5.5	Documentation of Wave Attenuation .....	9
D.2.6	Wave Setup.....	1
D.2.6.1	Overview .....	1
D.2.6.2	Wave Setup Implications for Flood Insurance Studies .....	2
D.2.6.3	Guidelines for Estimating Static Wave Setup .....	3
D.2.6.3.1	Wave Setup on an Open Coast .....	5

D.2.6.3.2 Wave Setup On a Coastal Structure .....	10
D.2.6.3.3 Examples Illustrating Application of the Methodology .....	13
D.2.6.3.4 Wave Setup—Special Cases.....	15
D.2.7 Overland Wave Propagation.....	1
D.2.7.1 Overview .....	1
D.2.7.2 WHAFIS Transect Considerations .....	4
D.2.7.3 WHAFIS Input Considerations .....	5
D.2.7.3.1 Input Coding for WHAFIS .....	7
D.2.7.3.2 Treatment of Vegetation by WHAFIS.....	13
D.2.7.4 WHAFIS Output Description .....	21
D.2.7.5 WHAFIS Error Messages.....	21
D.2.7.6 WHAFIS Documentation for the FIS .....	23
D.2.8 Wave Runup and Overtopping .....	1
D.2.8.1 Wave Runup .....	1
D.2.8.1.1 Overview .....	1
D.2.8.1.2 FEMA Wave Runup Model Description (RUNUP 2.0).....	3
D.2.8.1.3 Wave Runup using ACES .....	11
D.2.8.1.4 Runup on Vertical Structures .....	12
D.2.8.1.5 Methodology for Calculating Wave Runup on Barriers.....	13
D.2.8.1.6 Runup from Smaller Waves .....	18
D.2.8.1.7 Wave Runup in Special Situations .....	20
D.2.8.1.8 Advanced Wave Models.....	23
D.2.8.1.9 Documentation.....	24
D.2.8.2 Overtopping (Open Coast and Sheltered Waters) .....	24
D.2.8.2.1 Overview .....	24
D.2.8.2.2 Mean Overtopping Rates .....	26
D.2.8.2.3 Overtopping Rate Considerations for Establishing Flood insurance risk zones .....	29
D.2.8.2.4 Ponding Considerations.....	31
D.2.8.2.5 Overtopping Depth and Velocity Considerations.....	31
D.2.9 Coastal Erosion.....	1
D.2.9.1 Overview .....	1
D.2.9.2 Atlantic Coast Characteristics Related to Storm-Induced Erosion.....	1
D.2.9.3 Description of Beach Settings and Erosion Assessment Procedures .....	4
D.2.9.3.1 Sandy Dunes .....	6
D.2.9.3.2 Mixed / Coarse Sediment Systems .....	19
D.2.9.3.3 Bluffs (Erodible and Erosion-Resistant).....	22
D.2.9.3.4 Sheltered Waters.....	25
Figure D.2.9-22. Sheltered Water: Tidal Flats and Wetlands (Beach Setting No. 4) .....	26
D.2.9.3.5 Special Considerations .....	27
D.2.10 Coastal Structures.....	1
D.2.10.1 Purpose and Overview.....	1
D.2.10.2 Evaluation Criteria.....	2
D.2.10.2.1 Detailed Engineering Evaluation of Coastal Armoring Structures 2	
D.2.10.2.2 Coastal Armoring Structure Evaluation Based on	

Limited Data and Engineering Judgment .....	6
D.2.10.2.3 Evaluation of Beach Stabilization Structures .....	7
D.2.10.3 FIS Treatment of Coastal Armoring Structures.....	7
D.2.10.3.1 Failure and Removal of Coastal Armoring Structures .....	7
D.2.10.3.2 Partial Failure of Coastal Armoring Structures .....	9
D.2.10.3.3 Buried Coastal Structures .....	12
D.2.10.3.4 Coastal Levees.....	18
D.2.10.3.5 Operation and Maintenance.....	21
D.2.10.4 FIS Treatment of Beach Stabilization Structures .....	21
D.2.10.5 FIS Treatment of Miscellaneous Structures .....	22
D.2.10.5.1 Piers, Navigation Structures, and Port Facilities .....	22
D.2.10.5.2 Bridges, Culverts, and Tide Gates.....	22
D.2.10.6 Data Requirements .....	23
D.2.10.7 Study Documentation .....	24
D.2.11 Mapping of Flood Insurance Risk Zones and Base Flood Elevations.....	1
D.2.11.1 Review and Evaluation of Basic Results .....	1
D.2.11.2 Identification of Flood Insurance Risk Zones .....	2
D.2.11.2.1 VE Zone.....	2
D.2.11.2.2 AE Zone.....	3
D.2.11.2.3 AH Zone .....	3
D.2.11.2.4 AO Zone .....	3
D.2.11.2.5 X Zone .....	4
D.2.11.3 Wave Envelope.....	4
D.2.11.4 Criteria for Flood Boundary and Hazard Zone Mapping .....	5
D.2.11.5 Transect Examples.....	7
D.2.11.6 Mapping Procedures .....	16
D.2.11.6.1 Newly Studied Coastal Zones .....	16
D.2.11.6.2 Redelineation of Coastal Zones.....	18

Figure D.2.10-5. Methodology for Evaluating Buried Coastal Structures	15
Figure D.2.10-6. Buried Structure Remains Buried During 1-Percent-Annual-Chance Flood	16
Figure D.2.10-7. Buried Structure Exposed During 1-Percent-Annual-Chance Flood	17
Figure D.2.10-8. Levee Removal, Multiple Levee Situation	20
Figure D.2.11-2. Seaward Portion of Wave Envelope Based on Combination of Nearshore Crest Elevations and Shore Runup Elevation (figure not to scale)	5
Figure D.2.11-3a. Example 1: Sandy Beach backed by Low Dune, with Wave Height Propagation and PFD Controlling the Flood insurance risk zone Mapping.	8
Figure D.2.11-3b. Example 1: Sandy Beach backed by Low Dune, with Wave Height Propagation and PFD Controlling the Flood insurance risk zone Mapping.	8
Figure D.2.11-4a. Example 2: Sandy Beach Backed by Low Sand Dune with Overtopping Splash Controlling VE Zone	9

Figure D.2.11-4b. Example 2: Sandy Beach Backed by Low Sand Dune with Overtopping Splash Controlling VE Zone	10
Figure D.2.11-5a. Example 3: Sandy Beach Backed by High Sand Dune with PFD Controlling the VE Zone	11
Figure D.2.11-5b. Example 3: Sandy Beach Backed by High Sand Dune with PFD Controlling the VE Zone	11
Figure D.2.11-6a. Example 4: Sandy Beach Backed by Shore Protection Structure with VE Zone Controlled by the Splash Zone from Wave Overtopping	12
Figure D.2.11-6b. Example 4: Sandy Beach Backed by Shore Protection Structure with VE Zone Controlled by the Splash Zone from Wave Overtopping	12
Figure D.2.11-7a. Example 5: Cobble, Gravel, Shingle, or Mixed-Grain-Sized Beach with VE Zone Controlled by Wave Runup and Overtopping Splash	13
Figure D.2.11-7b. Example 5: Cobble, Gravel, Shingle or Mixed-Grain-Sized Beach with VE Zone Controlled by Wave Runup and Overtopping Splash	14
Figure D.2.11-8a. Example 6: Erodible Low Coastal Bluff with VE Zone Controlled by Wave Runup and Overtopping Splash	14
Figure D.2.11-8b. Example 6: Erodible Low Coastal Bluff with VE Zone Controlled by Wave Runup and Overtopping Splash	15
Figure D.2.11-9a. Example 7: Non-erodible High Coastal Bluff with VE Zone Controlled by Wave Runup (No Overtopping)	15
Figure D.2.11-9b. Example 7: Plan View of Flood insurance risk zones and BFEs, Non-erodible High Coastal Bluff with VE Zone Controlled by Wave Runup (No Overtopping)	16
Figure D.2.11-10. Work map depicting the flood zones, BFEs, and shoreline from the effective FIRM and the new shoreline position (modified from DiCamillo et al., 2005). T-1 and T-2 represent transect locations. Because the shoreline retreat is restricted to the outermost VE Zone (EL 14), it has no impact on remapping of flood zones.	20
Figure D.2.11-11. Work map depicting the existing 1-percent-annual-chance floodplain boundary from the effective FIRM, and the new boundary redelineated based on the effective SWEL and new topographic data (modified from DiCamillo et al., 2005).	21
Figure D.2.11-12. Comparison of gutter locations prior to a datum conversion (A) and after (B). Although Zone VE (EL 15) can be identified on the new wave profile, it lies seaward of the mapped shoreline position and thus may not need to be included on the FIRM.	23
Figure D.2.11-13. Work map depicting existing shoreline position from the effective FIRM and the new shoreline location (modified from DiCamillo et al., 2005). Because the shoreline retreat extends landward of the effective VE/AE boundary, reanalysis of flood hazards may be warranted (in lieu of redelineation).	25
