

# NIMS Implementation

## *Tips of the Week*

### Corrective Action Plan Reports

As of Friday, May 25, two reports (account-specific and a rollup report) will be available to all NIMSCAST Administrators in charge of sub accounts.

These reports were designed to meet the requirement for developing corrective action plans for all “Tier 1” metrics that are not answered in the affirmative. Each report is available in the respective reporting page. Accounts with multiple sub-jurisdictions can generate a combined report that details all corrective action plans that have been rolled-up to date.

### User and Account History Tracking and Reporting

NIMSCAST tracks activities performed by users and makes this information available to administrators. Also, each compliance metric question now identifies what user(s) last edited a response and when the edit was performed.

## E-mail Notifications Expanded

Administrators of parent accounts will now receive an e-mail notification that a sub-account has performed a “rollup” report.

## Previous *Tips of the Week* include:

### May 16

- ICS 400
- New NIMS e-mail

### May 9

- ICS 300
- NIMS Self-certification in FY2007?

### May 2

- NIMSCAST Passwords
- Establishing a NIMSCAST Account
