# Background

The Commonly Used Sheltering Items (CUSI) Catalog is a compilation of items for which FEMA maintains agreements so that these items can be more easily provisioned during a disaster. These items are focused on meeting the needs of survivors in the shelter environment and other congregate settings and are arranged around categories relating to sheltering, hygiene, cleaning, infants and toddlers, durable medical equipment, and consumable medical supplies.

This version (September 2022) of the CUSI Catalog represents a collaboration between FEMA Mass Care/Emergency Assistance (MCEA) and FEMA Logistics Management Division (LMD) to update the list of kits and à la carte items to support sheltering. Additionally, in development of this version, FEMA MCEA collaborated with American Red Cross (ARC) and FEMA's Office of Disability Integration and Coordination (ODIC).

Principal changes in this catalog include:

- Addition of the Pandemic Shelter Kits.
- Updated items within the Infant and Toddler (I/T) Kits to increase their shelf life, to include three powder formulas: Powder Milk-based, Powder Soy-Based, and Powder-based Hypoallergenic.
- Minor administrative changes to increase ease of use and address previous errors.

# Key Information

- After a declaration, state, territory, or tribal governments must submit a Resource Request Form (RRF) to request items from the CUSI.
- After RRF approval, the requested kits/items will be ordered by the Regional Response Coordination Center (RRCC) or the Joint Field Office or at the direction of the Resource Support Section (RSS) / Operations Support Group. Ensure the RRF number is annotated on the Logistics Supply Chain Management System (LSCMS) Customer Order.
- CUSI kits are typically stored at FEMA Distribution Centers (DC). À la carte items can be ordered Just-In-Time (JIT) via the Indefinite Delivery/Indefinite Quantity (IDIQ) contracts.
- Infant/Toddler kits contain both perishable (#I/T-001 through #I/T-007, on Pages 9-10) and non-perishable (#I/T-008-I/T-026 on Pages 10-11) items. They are placed and delivered on two separate pallets.
- CUSI kits with perishable items (i.e., Infant/Toddler (I/T) items, Consumable Medical Supplies (CMS), Hygiene Kits, and Pandemic Shelter Kits) will include packing slips with item expiration dates.
- Pandemic Shelter Kits may only be ordered as a complete kit and must be used to support congregate shelters.
- Regional Logistics (LOG) Chiefs can utilize any existing Indefinite Delivery/Indefinite Quantity (IDIQs) contracts for Mass Care support.
- Local Business Transition Team (LBTT) and the “AbilityOne” program will be utilized to the maximum extent possible. FEMA’s LBTT works to facilitate federal government contract awards to local organizations, firms, and individuals residing or doing business primarily in area(s) affected by a major disaster or emergency, when practical and feasible (Stafford Act: Section 307); Administered by the U.S. AbilityOne Commission, an independent Federal agency, the AbilityOne program is the nation’s largest source of employment for people who are blind or have significant disabilities.
- Unless otherwise indicated, all personal travel-sized items included within the Hygiene Kit must meet Transportation Security Administration (TSA) standards (3.4 ounces [100 milliliters] or less per item) in case of aerial evacuation.
