

Colorado Wildfire Recovery Webinars

Release Date: April 9, 2021

DENVER – In response to Colorado’s devastating wildfires in 2020, FEMA and the State of Colorado are hosting a series of webinars to help residents understand increased threats to their homes, lives and property following the Cameron Peak and East Troublesome fires and prepare for the upcoming wildfire season.

Discussion topics will include wildfire preparation and recovery, increased flood risk, agricultural recovery and understanding insurance options. Panelists will answer questions and provide informative resources to help residents with their recovery.

To participate please follow the link to register for a specific webinar session:

- *Flood After Fire*: 12-1 p.m. MST, Monday, April 12
