

FEMA Authorizes Funds to Fight Clear Fire in Alaska

Release Date: juin 27, 2022

BOTHELL, Wash. - The Federal Emergency Management Agency (FEMA) authorized the use of federal funds to help with firefighting costs for the Clear Fire burning in Yukon/Koyukuk Census Area/Denali Borough, Alaska.

The state of Alaska's request for a federal [Fire Management Assistance Grant](#) (FMAG) was approved by FEMA Region 10 Administrator Willie G. Nunn on Saturday, June. 25, 2022, at 11:17 p.m. PT. He determined that the Clear Fire threatened to cause such destruction as would constitute a major disaster. This is the first FMAG declared in 2022 to help fight Alaska wildfires.

At the time of the state's request, the wildfire threatened homes in and around the communities of Kobe Ag, Quota, and Anderson subdivisions. The fire also threatened Clear Space Force Radar Station, Golden Valley Electric Cooperative transmission lines, communication towers, the Alaska Highway, the Alaska Railroad, and several tribal allotments in the area.

FMAGs are provided through the President's Disaster Relief Fund and are made available by FEMA to assist in fighting fires that threaten to cause a major disaster. Eligible items can include expenses for field camps; equipment use, repair, and replacement; mobilization and demobilization activities; and tools, materials, and supplies. This authorization makes FEMA funding available to pay 75 percent of the state's eligible firefighting costs under an approved grant for managing, mitigating, and controlling designated fires. These grants do not provide assistance to individual home or business owners and do not cover other infrastructure damage caused by the fire.

In addition to the firefighting funds authorized under this FMAG, another \$786,552 will be available to Alaska through the [Hazard Mitigation Grant Program \(HMGP\) Post Fire](#) for the mitigation of future wildfires and related hazards, such as flood after fire or erosion. Some eligible wildfire project types include defensible space measures, ignition-resistant construction, and hazardous fuels reduction. The [Disaster Recovery Reform Act of 2018](#) authorizes FEMA to provide [HMGP Post-](#)
