

FEMA to Evaluate Readiness of Pennsylvania, Maryland

Release Date: April 10, 2018

PHILADELPHIA – The Federal Emergency Management Agency ([FEMA](#)) will evaluate a biennial emergency preparedness exercise at the Peach Bottom Atomic Power Station. The exercise will occur during the week of April 16th to assess the ability of the Commonwealth of Pennsylvania and the State of Maryland to respond to an emergency at the nuclear facility.

“These drills are held every other year to evaluate government’s ability to protect public health and safety,” said MaryAnn Tierney, Regional Administrator for FEMA Region III. “We will assess state and local emergency response capabilities within the 10-mile Emergency Planning Zone as well as the adjacent support jurisdictions within the Commonwealth of Pennsylvania and the State of Maryland.”

Within 90 days, FEMA will send its evaluation to the Nuclear Regulatory Commission ([NRC](#)) for use in licensing decisions. The final report will be available to the public approximately 120 days after the exercise.

FEMA will present preliminary findings of the exercise in a public meeting at 10:00 a.m. on April 20, 2018, at the Homewood Suites, 101 Granite Run Drive, Lancaster, Pennsylvania 17601. Scheduled speakers include representatives from FEMA, NRC, Commonwealth of Pennsylvania, and the State of Maryland.

At the public meeting, FEMA may request that questions or comments be submitted in writing for review and response. Written comments may also be submitted after the meeting by emailing FEMAR3NewsDesk@fema.dhs.gov or by mail to:

MaryAnn Tierney

Philadelphia, PA 19106

FEMA created the Radiological Emergency Preparedness (REP) Program to (1) ensure the health and safety of citizens living around commercial nuclear power plants would be adequately protected in the event of a nuclear power plant accident, and (2) inform and educate the public about radiological emergency preparedness.

REP Program responsibilities cover only “offsite” activities, that is, state and local government emergency planning and preparedness activities that take place beyond the nuclear power plant boundaries. Onsite activities continue to be the responsibility of the NRC.

Additional information on FEMA’s REP Program is available online at [FEMA.gov/Radiological-Emergency-Preparedness-Program](https://www.fema.gov/Radiological-Emergency-Preparedness-Program).

FEMA’s mission is helping people before, during, and after disasters. FEMA Region III’s jurisdiction includes Delaware, the District of Columbia, Maryland, Pennsylvania, Virginia, and West Virginia.
