The EDR FieldCheck® System enables EDR's customers to make certain online modifications to the maps and text contained in EDR Radius Map Reports. As a result, the maps and text contained in this Report may have been so modified. EDR has not taken any action to verify any such modifications, and this report and the findings set forth herein must be read in light of this fact. The EDR FieldCheck System accesses user-modified records from previously submitted reports. Any user-modified record from a previous report that is plotted outside the search radius of this report may not be included in this report.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2012 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). THE CHAZEN COMPANIES used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by THE CHAZEN COMPANIES. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

114 FORT ROAD
SCHOHARIE, NY 12157

Manufactured Gas Plants..... EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

An online review and analysis by THE CHAZEN COMPANIES of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 HIST LTANKS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

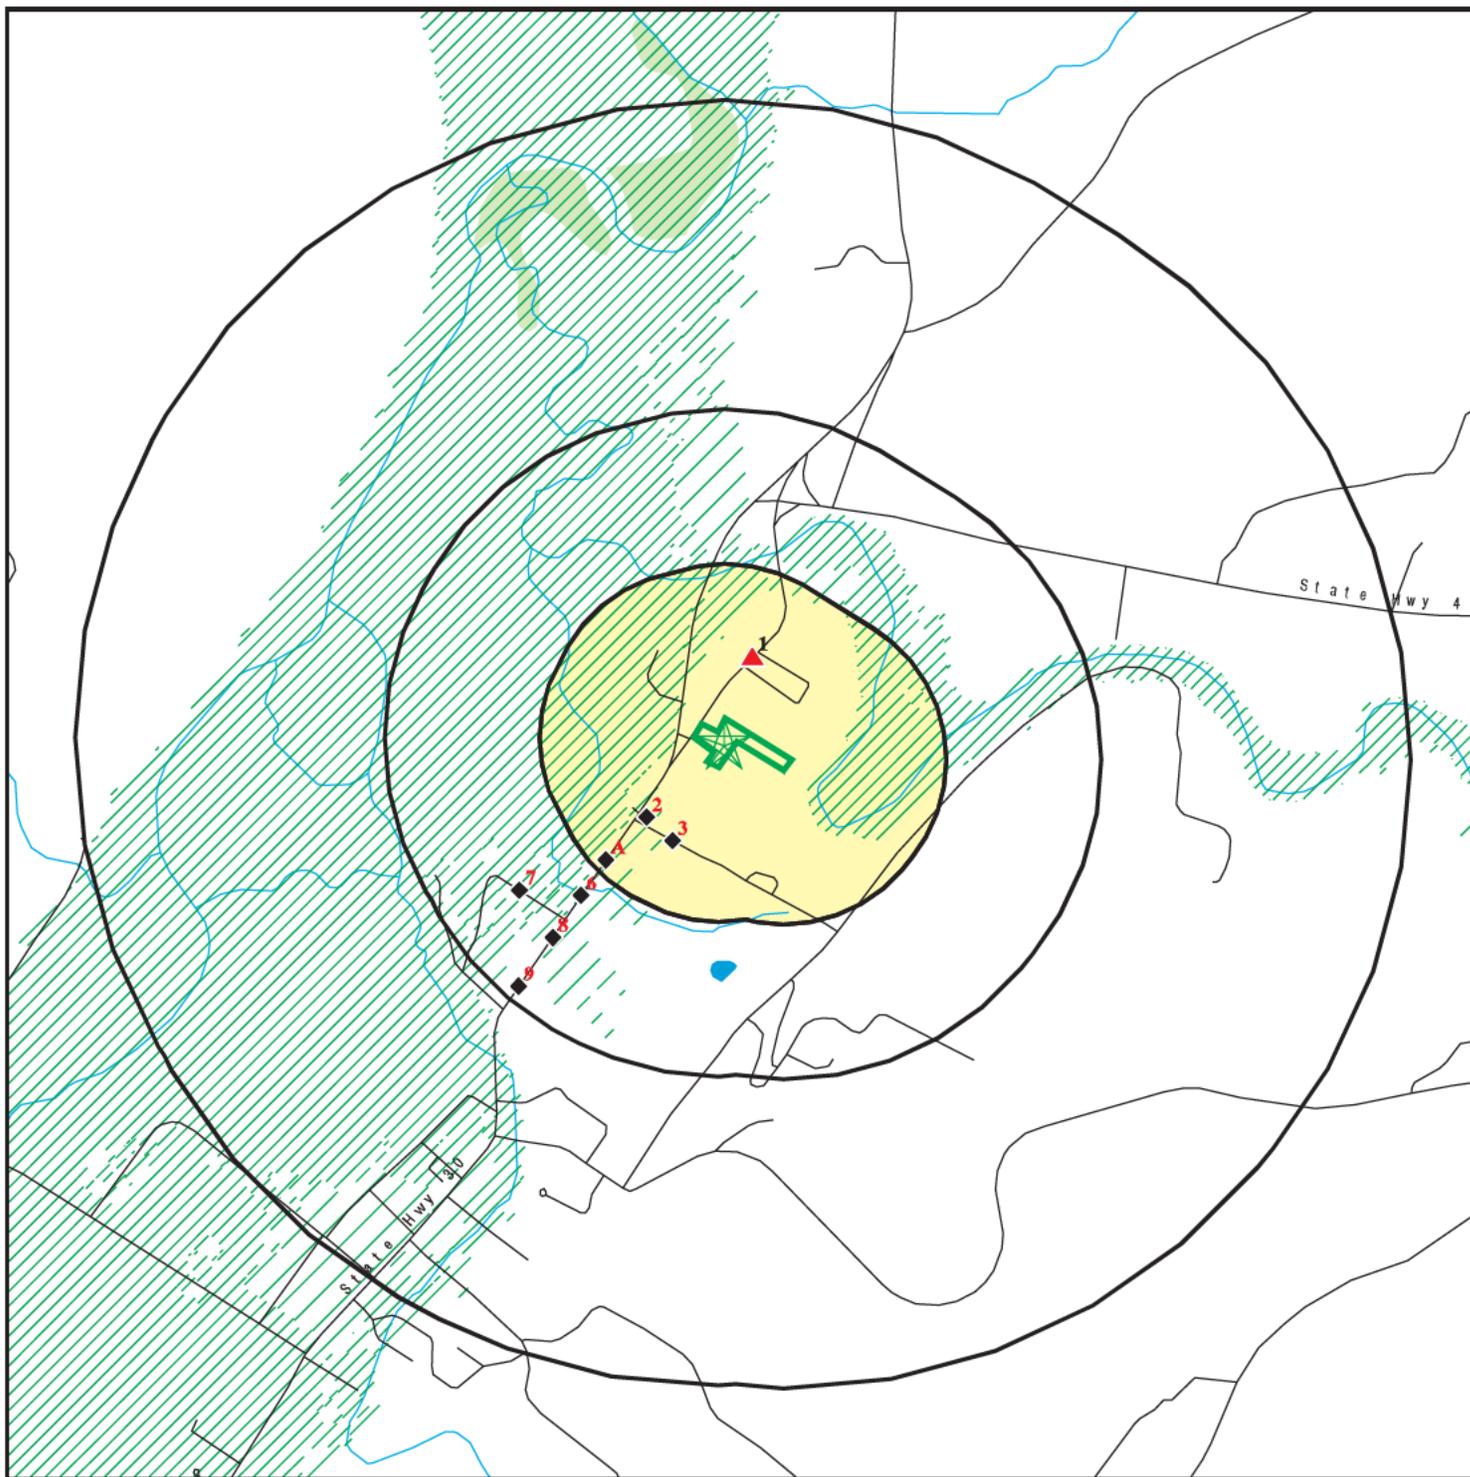

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

An online review and analysis by THE CHAZEN COMPANIES of the NY Spills list, as provided by EDR, and dated 08/20/2012 has revealed that there are 8 NY Spills sites within approximately 0.5 miles of the target property.

DEC Memo: HURRICANE IRENE FLOOD; SCHOHARIE CO. PIN #05572 (SPILL #1106217)9/1/11 JDU referred to home by Schoharie command center.

Detached garage had a black tar substance that washed into it covering all the walls and tools and then hardening/drying on them. A 55 gal plastic drum with waste oil and 3 pails of hydraulic oil washed onto property. 500 gal Diesel fuel tank from the town barns behind the property washed into the yard. tank contained aproximately 150 gal of water oil mix. Homeowner had pumped a few gallons of diesel fuel out of tank into a small bin that he was using to wash his tools in. Homeowner stated that he would put the fuel back in the 500 gal tank when he was done using it. 9/1/11 Op-tech on site to vac out waste oil and hydraulic oil drums. 9/16/11 Clean Harbors on site to vac out 500 gal diesel tank. -JDU

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810
Date Made Active in Reports: 03/12/2012	Last EDR Contact: 10/18/2012
Number of Days to Update: 14	Next Scheduled EDR Contact: 12/10/2012
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/28/2011	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/15/2012

State and tribal landfill and/or solid waste disposal site lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SWF/LF: Facility Register

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 07/06/2012

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2009	Source: EPA/NTIS
Date Data Arrived at EDR: 03/01/2011	Telephone: 800-424-9346
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 08/31/2012
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/10/2012
	Data Release Frequency: Biennially

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Target Property Map:	42074-F3 SCHOHARIE, NY
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

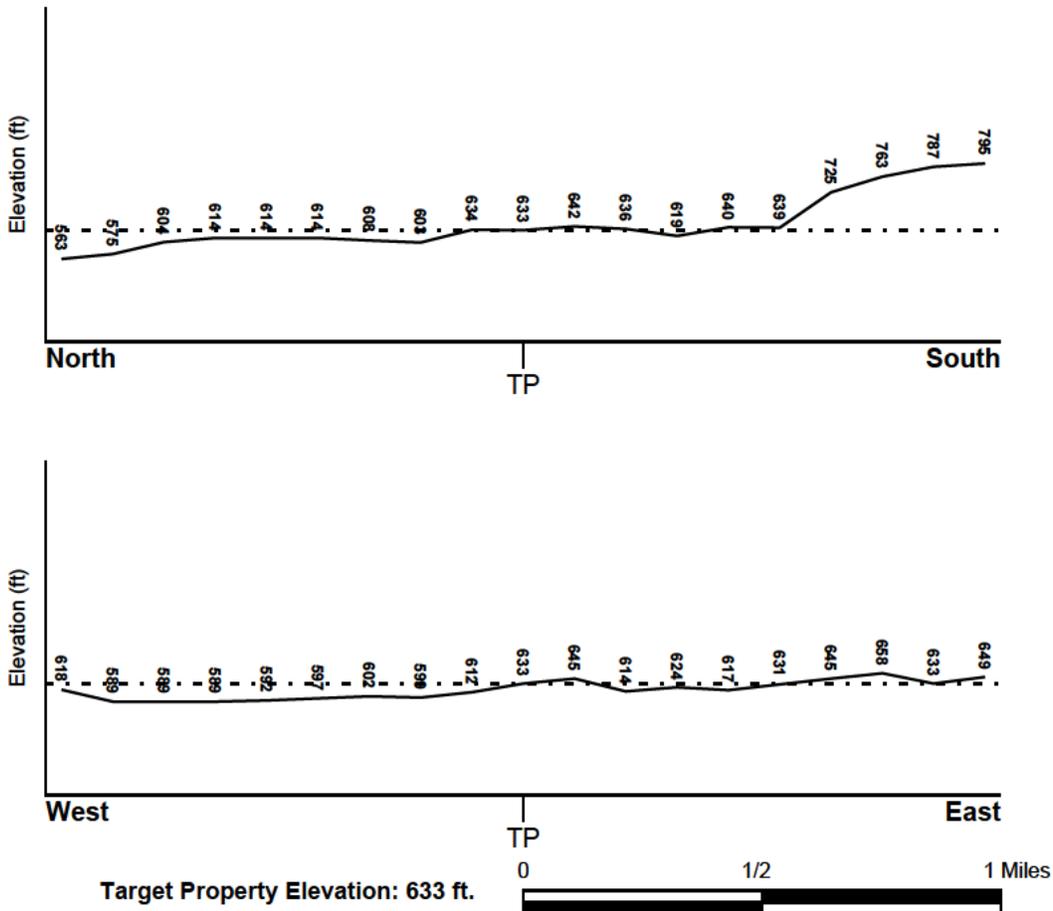

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SCHOHARIE, NY	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	36095C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SCHOHARIE	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Silurian
Series: Lower Silurian (Alexandrian)
Code: S1 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: TUNKHANNOCK

Soil Surface Texture: cobbly - silt loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	8 inches	cobbly - silt loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.00 Min: 3.60
2	8 inches	30 inches	gravelly - silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.00 Min: 3.60
3	30 inches	65 inches	gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 2.00	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: gravelly - silt loam
silt loam
very stony - silt loam
extremely gravelly - sand loam

Surficial Soil Types: gravelly - silt loam
silt loam
very stony - silt loam
extremely gravelly - sand loam

Shallow Soil Types: loam

Deeper Soil Types: loamy sand
fine sandy loam
stratified
very gravelly - sand
very gravelly - fine sandy loam
gravelly - loam
loam
very gravelly - coarse sandy loam
channery - loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

extremely gravelly - sand
gravelly - loamy sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Be kman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Site Report™

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary Page 3

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports Page 4

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information. Page 6

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1 DPW YARD 393 MAIN ST SCHOHARIE, NY 12157 EDR ID #S111317652
AREA	
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSD)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	YES - p4
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

NY SPILLS: Spills Information Database

Source: Department of Environmental Conservation

Telephone: 518-402-9549

Data collected on spills reported to NYSDEC as required by one or more of the following:
Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

Date of Government Version: 08/20/2012
Database Release Frequency: Varies

Date of Last EDR Contact: 08/23/2012
Date of Next Scheduled Update: 12/03/2012

Interview Documentation

Phase I ESA User Questionnaire

Page 1 of 4

In order to qualify for one of the *Landowner Liability Protections* (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"). The *User* of the Phase I ESA (i.e. client) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

I. FACILITY IDENTIFICATION

- 1. Complete Address: 114 Fort Rd Schoharie
- 2. Any known former addresses (e.g., pre-911 change): _____
- 3. Tax Lot ID: 72.6-2-19
- 4. Current Facility Name: Niagara Engine Co #6
- 5. Any known former facility names: Miller, Jack, A c/o Jack Miller Tractors

II. REQUIRED INFORMATION

1. Review of Title and Judicial Records for Environmental Liens or Activity Use Limitations (AULs) shall be conducted by the *User* of reasonably ascertainable recorded land title records and lien records that are filed infer federal, tribal state, or local law.

Has a title search been conducted for the property to comply with the User requirements noted above? Yes No Date of Title Search _____
(copy attached Yes No)

Based on the title search information, are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes No

If yes, please describe: (records attached Yes No)

Based on the title search information, are you aware of any AULs, such as engineering controls, land use restriction, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes No

If yes, please describe: (records attached Yes No)

The Chazen Companies

User Questionnaire

Page 2 of 4

2. As the *User* of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? (For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?) Yes No

If yes, please describe:

3. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? Yes No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes No

4. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of a release or threatened release? Yes No

For example, as the user:

a) Do you know the past uses of the property? Yes No

b) Do you know of the specific chemicals that are present or were once present at the property? Yes No

c) Do you know of spills or other chemical releases that have taken place at the property? Yes No

d) Do you know of any environmental cleanups that have taken place at the property? Yes No

The Chazen Companies
User Questionnaire
Page 3 of 4

e) Other _____

5. As the *User* of this Phase I ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
 Yes No

III. ADDITIONAL INFORMATION

1. Please identify the reason that you are requiring a Phase I ESA (check one or more of the boxes below). If no reason is selected, it shall be assumed that the purpose of the ESA is to qualify for landowner liability protection under CERCLA.

- CERCLA landowner liability defense
- Business Environmental Risk (i.e., understand potential environmental conditions that could materially impact the operation of the business associated with the parcel)
- Lending Institution Requirement
- Other (please describe below)

FEMA

2. Please identify the type of property and type of property transaction (i.e. sale, purchase, exchange, etc.)

3. Please identify all parties who will rely on the Phase I ESA report (if other than User, please provide specific company name and address). This questionnaire must also be completed by additional Users that will rely on the report.

4. Are you aware of any previous environmental site assessment reports, documents, correspondence, etc., concerning the property and its environmental condition?
 Yes No, if yes, please describe:

Have you attached copies of this documentation? Yes No

Phase I ESA User Questionnaire

Page 4 of 4

The Preparer of this User Questionnaire must complete and sign the following statement:

The questionnaire was completed by the *User*:

Name: John C Wolfe

Title: Building Chairman

Firm: Niagara Engine Co #6

Address: PO Box 428 Schoharie NY 12157

Phone Number: 518 295-7231 Fax Number: _____

Cell 518 496 7784

Date: 10/26/2012

User's relationship to the site (e.g., purchaser, lending agency, etc.) _____

Preparer represents that to the best of the Preparer's knowledge the above statements are true and correct and to the best of the Preparer's actual knowledge no material facts have been suppressed or misstated.

Dear Ms. Kurilovitch:

This letter acknowledges receipt of your request, pursuant to the Freedom of Information Law (FOIL), for certain documents relating to the Village's involvement with the building Department and Assessor's Office for the John and Karen Miller property located at 114 and 118 Fort Road. Tax ID 72.6-2-19 and 72.6-2-20. This office will assemble and make available the requested information as soon as possible, but with an expected date no later than November 2, 2012.

The requested information should be readily available. Subsequent to review by our attorney, I will notify you that you may pick up the information or we will mail it to you. There will be the customary \$0.35 per page charge.

If you have questions or need additional information, please contact me.

Sincerely,

A handwritten signature in cursive script that reads "Leslie J. Price".

Re: Property 72.6-2-19 and 72.-6-2-20 John and Karen Miller Foil request

Dear Ms. Kurilovitch,

I have received your foil request in regards to the above property. The property is located in the Village of Schoharie.

The majority of the information you are requesting should be obtained from the Village Clerk Leslie Price. I have been in contact with Leslie Price and she will be forwarding the information on to you. The property cards would have been the only paper work I would have gathered for you and I did not want to charge you again for information Leslie Price already has.

If you have any questions, please do not hesitate to contact me at the number above.

Sincerely,

Pamela Foland

SC 644-645

Arlette Meader interviewed John Wolfe and Martin Shrederis of the Schoharie Fire Department on October 26, 2012. They did not have any knowledge of responses to chemical or petroleum spills on the site. They also did not have any knowledge of fires that the Schoharie Fire Department responded to. They were aware of a fire in the 1950's, which is discussed in appropriate sections of the report.

Jen talked to Ann Hendrix, town historian. She said that the fort is down the road, which was attacked by the British in 1780. The area was pretty isolated and then developed from there into ag, residential, and commercial businesses.

John Miller 58-295-7733

Acquired in 1980. Worked since 1968 on site.

Bought from Manz - started in 1953

Edward Kenzer owned ~ 3 yrs

Same act / operations

No buried tanks
3 ASTs currently on site

wooden
Burned 1955
He doesn't know
probably not buried
on site, since lot was
much smaller in 1955
175 x 175 ft. Pole Barn at
Boundary

concrete pad - former 2 car garage, he moved it next door
not heated

2nd conc pad w/ low walls. Kenzer bit it. New road bldg
took it down. Bank sold bldg. ~~not~~ used for storage
floor drains - he doesn't know where it goes or if it
was connected. Probably to pkg lot

Behind house - sand patch - formerly ^{Aboveground} swimming pool
AST leak - he doesn't know how long

Tractor Sales + Q Hut
NOFD

10-15
former FD plugged a few years ago
it went out of bldg. He thinks it
went to sewer. P.F. would fill up + get
cleaned up
'something w/ the State'

Tractor wash area -

Drum to drain H₂O from shop - would ^{pump} pump in drum to keep
H₂O out of Q Hut

Pipe outlet, no inlet; goes towards ~~the barn~~ driveway

Booths done, but not for him. No copy by Ag + markets said it was OK.

Subject: FOIL Request - Miller Property
Date: Wednesday, October 17, 2012 2:11:33 PM

To Whom it May Concern,

I am in the process of conducting a Phase I Environmental Site Assessment of a property located in the Village of Schoharie, Town of Schoharie, Schoharie County, NY. The property is owned by John and Karen Miller and is located at 114 and 118 Fort Road. It is identified as Tax ID 72.6-2-19 and 20.

I am looking for any information your Department may have on record pertaining to the property including well information (well logs, potable well water sample data), septic information, site plans, SPDES permits, etc.

Please contact me if there are any records available for the property.

Sincerely,

Jen

Re: 12-10-274

Dear Ms. Kurilovitch:

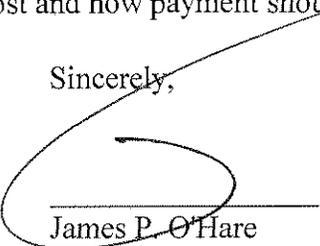

This will acknowledge receipt of your 10/17/2012 request for records under the Freedom of Information Law.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

It is estimated that within 20 business days we will complete your request or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble and review responsive documents.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

James P. O'Hare
Records Access Office

**Re: John and Karen Miller Property,
Tax ID: 72.6-2-19 and 20
114 and 118 Fort Road, Village of Schoharie, Town of Schoharie, Schoharie
County, NY**

Dear Ms. Galluzzo:

We are conducting a review of the above referenced property. We wish to review records on file with the Department pertaining to PBS registration and spills. Information of interest includes:

- PBS Reports
- Tank Closure Reports/documents
- Spill Reports
- Report of spill closure/investigation/remediation
- SPDES Permits
- Well water laboratory sampling data

Please send any correspondence concerning this matter to our Troy office. Thank you for your assistance.

Sincerely,

Jennifer Kurilovitch
Ecological and Wetland Scientist

Ms. Jennifer Kurilovitch
The Chazen Companies
547 River Street
Troy, NY 12180

Dear Ms. Kurilovitch:

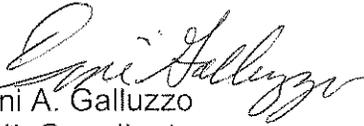

I am in receipt of your Freedom of Information Law (FOIL) Request No. **2012-432** regarding **John and Karen Miller Property**.

DEC staff are searching the files for the records and anticipate, but do not guarantee, providing you with all or some of the records on or about November 20, 2012.

Please call me at the number above on that date to determine whether the files are ready for your review. Upon completion of our search, you may schedule an appointment to review the files within the availability period of 30 days. Files are then generally returned to the respective DEC programs at the end of the 30-day period.

Additional information regarding New York State FOIL procedures may be obtained at <http://www.dec.state.ny.us/coog/foil.html>.

Sincerely

Toni A. Galluzzo
FOIL Coordinator

Appendix E: Qualifications

Arlette St. Romain Meader

SENIOR ENVIRONMENTAL SCIENTIST / PROJECT MANAGER

With 15 years as a professional environmental scientist, Ms. Meader has extensive experience conducting: site investigations and remediation, including brownfields projects, Phase I and Phase II Environmental Site Assessments; data collection and field inspections; soil sampling; groundwater well installation and monitoring; site remediation; and asbestos and lead paint surveys. Ms. Meader also has extensive experience with the preparation of environmental assessments/environmental impact statements under the Federal National Environmental Policy Act (NEPA). Her experience includes managing projects for military, municipal, commercial, resort, conservation, and private developer clients.

EDUCATION

- Bachelor of Science, Crop and Soil Environmental Sciences, Virginia Polytechnic Institute & State University, 1995

AFFILIATIONS

- National Association of Environmental Professionals
- National Ground Water Association
- Air and Waste Management Association

TRAINING

- OSHA Hazardous Waste Operations 40-Hour Technician Initial Course and refreshers
- CPR & First Aid
- Environmental Sampling Theory, 2009
- Sampling for Defensible Environmental Decisions, 2005
- ASTM Phase II Environmental Site Assessment Process, 2004
- US Dept of Energy Systematic Planning and Managing Uncertainty for Environmental Decision Making, 2002

PROJECT EXPERIENCE

PHASE I ENVIRONMENTAL SITE ASSESSMENTS

Managed Phase I ESAs in accordance with ASTM 1527 and the Environmental Protection Agency's All Appropriate Inquiries Rule. Sites have included agricultural lands, forested properties and camps, harbor areas, resort and golf course properties, medical centers, commercial properties, and industrial facilities. Other duties included training entry-level personnel to conduct thorough research, site reconnaissance and interviews, and draft accurate reports. During the 15 years of Phase I ESA preparation, updated reporting methodology to meet most recent ASTM standards and improve efficiency of report preparation and ensure defensibility of work product.

ENVIRONMENTAL BASELINE SURVEYS FOR DEPARTMENT OF DEFENSE

Managed and conducted Environmental Baseline Surveys (i.e., expanded Phase I ESAs) for U.S. Army acquisition of a 1,400-acre agricultural site and a 23,000-acre ranch site, for transfer of the former Naval Magazine facility, for roadway easements, and for U.S. Air Force land leases. Issues included unexploded ordnance, a firing range, and active farm and ranch lands. Designed sampling plan, provided oversight of field work, and prepared report documenting results of Phase II Environmental Baseline Survey sampling for base realignment and closure of Naval Air Station Barbers Point.

DUE DILIGENCE, PRE-DEVELOPMENT, AND ONGOING SAMPLING

Prepared and implemented sampling and analysis plans for numerous due diligence projects for sites including a former Girl Scouts camp, a recreational vehicle sales and repair facility, a former incinerator site, a former munitions transfer area, and former U.S. Navy lands. Provided oversight of contractors to install soil borings and monitoring wells, and to excavate contaminated soil. Conducted soil sampling and well installation; collected samples of groundwater, soil air and stockpiles; evaluated disposal alternatives; and prepared site investigation reports. Performed long-term groundwater monitoring and soil vapor extraction system monitoring for service station sites following underground storage tank closure.

BROWNFIELD CLEANUP PROGRAM AND ENVIRONMENTAL RESTORATION PROGRAM PROJECTS, NEW YORK

Project Manager for Brownfields site in Albany, two Environmental Restoration Program projects in Franklin County, and two in Warrensburg. Contaminants include petroleum, polychlorinated biphenyls (PCBs), and tetrachloroethylene (PCE). Worked with NYSDEC to develop sampling approaches to provide sufficient data but also minimize sampling efforts and costs. Provided oversight of Work Plan implementation; managed field activities that include tank closures and soil and groundwater sampling. Efforts include management of project budget, evaluating analytical data, and preparing reports with proposed remedial actions for agency review. Remedial investigation activities and remedial alternatives analysis tasks conducted to allow for potential future site development.

CONCEPT PLAN STUDIES, FEDERAL NEPA, AND STATE LEVEL EA AND EIS DOCUMENTS

Worked on multi-disciplinary teams evaluating feasibility of sites for development of military facilities. Tasks included: researching environmental conditions; preparing abatement costs for hazardous materials; developing approaches and costs for managing soil contamination; and evaluating design for applicability to Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ credits.

Managed preparation of NEPA documents for various Department of Defense agencies. Environmental Assessment or Categorical Exclusion documentation for projects that included sewer line replacement, a telescope mirror coating facility, and land transfers. Prepared land use and recreation sections of Environmental Impact Statement for proposed Army Transformation to a Stryker Brigade Combat Team.

Russell Urban-Mead, CPG, LEED® AP

As an Environmental Scientist/Hydrogeologist for the past 20 years, Mr. Urban-Mead has been involved in the evaluations of public water sources, remediation of contaminated groundwater sites, and development of aquifer management programs. He also identifies and develops sources of groundwater supply for private and community clients. He is familiar with air permitting requirements and Indoor Air Quality investigations. He identifies safe yield pumping limits, aquifer boundary conditions, and impacts of interference between multiple wells. He evaluates geology, hydrogeology, and soil conditions through geologic mapping, pumping tests, stream gauging, water quality sampling, and in-situ hydraulic conductivity tests.

EDUCATION

- MA, Geology (Hydrogeology), Rensselaer Polytechnic Institute, 1991
- BA, Geology, Carleton College, 1985

TRAINING

- OSHA 40hr HAZWOPER with annual 8hr refreshers and medical monitoring
- OSHA 8hr Supervisor Certification
- Understanding Mold Contamination in the Indoor Environment
- DNAPL Site Characterization and Remediation Techniques
- Penn State Field Techniques for Small Watershed Assessment
- Horizontal Drilling Applications, Cook College, NJ UST Regulatory Training

REGISTRATION

- Certified Professional Geologist, 10328

AFFILIATIONS

- National Groundwater Association
- Geologic Society of America
- International Association of Hydrogeologists
- NYS Council of Professional Geologists
- American Water Resource Association
- American Institute of Professional Geologists

PROJECT EXPERIENCE

WESTCHESTER COUNTY DEPARTMENT OF PLANNING, NY

Reviewed groundwater data describing northern Westchester County and developed recommendations suitable for inclusion into Westchester Counties Croton Plan.

PUTNAM COUNTY DIVISION OF PLANNING, NY

Reviewed local and county-wide groundwater data, gauged streams, geo-referenced 5,500 well logs, conducted statistical well performance analysis, to prepare a hydrogeologic summary of county groundwater resources. Worked with inter-municipal committee to develop a County-wide groundwater management plan.

DUTCHESS COUNTY WATER AND WASTEWATER AUTHORITY, NY

Developed an ongoing County-wide groundwater monitoring program, including ongoing monitoring of streams, groundwater levels in multiple wells, infiltration rates, and preliminary groundwater quality parameters. Also helped develop the County's Water Supply Protection Strategy. Ongoing research identifying aquifer recharge rates and sustainable densities for domestic wells and septic systems.

TOWN OF DOVER, DUTCHESS COUNTY, NY

Lead hydrogeologist and Project Manager. Town-wide Groundwater Resource Assessment, identifying aquifer safe yield, recharge areas, enumeration of existing groundwater hazards. Project was subsequently expanded to cover 6-municipality area for the full watershed containing Dover.

NATURE CONSERVANCY, DUTCHESS AND PUTNAM COUNTIES, NY

Lead Hydrogeologist and Project Manager. Groundwater Resource Assessment for 97 square mile watershed, outlining groundwater flow regimes in the watershed and identifying critical recharge areas providing baseflow groundwater support to TNC critical habitat areas. All maps presented in GIS formats.

PRIVATE CLIENT, DUTCHESS COUNTY, NY

Groundwater investigation leading to installation of new public water supply wells providing 700,000 gallons per day from a suite of bedrock wells.

TOWN OF LAGRANGE, DUTCHESS COUNTY, NY

Groundwater investigation leading to installation of new public water supply wells providing over 750,000 gallons per day from wells in glacial sediments.

PRIVATE CLIENT, ULSTER COUNTY, NY

RI/FS and Remedy Implementation at Class 2 Inactive Hazardous Waste Site. Chlorinated solvents. Bedrock and overburden aquifer impacts. Remedy included intercept trenches, public water supply, and hydraulic control.

PRIVATE CLIENT, SULLIVAN COUNTY, NY

Subsurface Investigation and Remedy Implementation at a gas station site near a public water supply well. Overburden aquifer impacts to till and outwash formations. Remedy included soil vapor extraction and hydraulic control.

PRIVATE CLIENT, DUTCHESS COUNTY, NY

Project Manager. Bedrock Aquifer Investigation and Remedy Improvement at site previously remediated by others. Assessment of off-site bedrock impacts, plume definition, and improved remedy design. Remedy includes installation of supplemental hydraulic control.

PRIVATE CLIENTS, DUTCHESS COUNTY, NY

Groundwater investigation associated with closure of various landfills, including evaluations leading to reductions in landfill leachate discharges.

PRIVATE CLIENT, SULLIVAN COUNTY, NY

Groundwater investigation leading to installation of high capacity well field for proposed agricultural enterprise, yield in excess of 400,000 gpd.

PRIVATE CLIENT, COLLEGE IN HUDSON VALLEY

Director of Investigation. Mold and ventilation evaluation in an instructional building. Investigation included health questionnaire for select employees, fungal sampling, affected area delineation, and remedy definition, staff briefing. Fungus stachybotrys was identified in select areas due to roof leaks.

PRIVATE CLIENT, SCHOOL DISTRICT IN WESTCHESTER COUNTY

Director of Investigation. Identified source of offensive odors in two classrooms, evaluated fungal amplification in an elementary classroom library, assessed ventilation adequacy in many classrooms and related instructional areas, performed compliance monitoring during building renovations to ensure particulate level controls and ventilation adequacy. Participated in faculty communications.

PRIVATE CLIENT, OFFICE BUILDING IN DUTCHESS COUNTY

Evaluated ventilation rates, air handling unit filter conditions, and examined site for evidence of fungal infestation. Provided project QA/QC for Chazen Industrial Hygienist conducting assessment.
