**RE: FEMA 4020-DR-NY PW#6871
Neversink Ballfields Environmental Assessment, Facility Replacement Project
Town of Neversink, Sullivan County NY**

Dear Ms. Piwonka-Bernstein:

We received your letter dated July 31, 2014 kindly providing continuing Section 106 notification for the above-referenced project.

We have reviewed the Environmental Assessment and determined we do not have cultural resource concerns with the project plans because the project is on previously disturbed soils.

However, should any cultural materials inadvertently be discovered, we request that the project be halted and that we immediately be notified.

We do not require any further involvement on the project. Thank you for the notification.

Respectfully,

Bonney Hartley
Tribal Historic Preservation Assistant
