Territory of Guam – Tropical Storm Halong
FEMA-4191-DR

Declared September 10, 2014

On August 30, 2014, Governor Eddie Baza Calvo requested a major disaster declaration due to Tropical Storm Halong during the period of July 28-31, 2014. The Governor requested a declaration for Individual Assistance, Public Assistance and Hazard Mitigation for the Territory of Guam. During the period of August 7-13, 2014, joint federal, territory, and local government Preliminary Damage Assessments (PDAs) were conducted in the requested areas and are summarized below. PDAs estimate damages immediately after an event and are considered, along with several other factors, in determining whether a disaster is of such severity and magnitude that effective response is beyond the capabilities of the territory and the affected local governments, and that Federal assistance is necessary.¹

On September 10, 2014, President Obama declared that a major disaster exists in the Territory of Guam. This declaration made Public Assistance requested by the Governor available to the territory and eligible local governments and certain private nonprofit organizations on a cost-sharing basis for emergency work and the repair or replacement of facilities damaged by Tropical Storm Halong in the Territory of Guam. This declaration also made Hazard Mitigation Grant Program assistance requested by the Governor available for hazard mitigation measures for the Territory of Guam.²

Summary of Damage Assessment Information Used in Determining Whether to Declare a Major Disaster

Individual Assistance

- Total Number of Residences Impacted:³ N/A

  Destroyed - -
  Major Damage - -
  Minor Damage - -
  Affected - -

- Percentage of insured residences:⁴ -
- Percentage of low income households:⁵ -
- Percentage of elderly households:⁶ -
- Total Individual Assistance cost estimate: N/A
Public Assistance

- Primary Impact: Emergency protective measures and damage to buildings and equipment
- Total Public Assistance cost estimate: $1,563,438
- Territory per capita impact: $9.81
- Statewide per capita impact indicator: $1.39

---

1. The Preliminary Damage Assessment (PDA) process is a mechanism used to determine the impact and magnitude of damage and resulting needs of individuals, businesses, public sector, and community as a whole. Information collected is used by the State as a basis for the Governor’s request for a major disaster or emergency declaration, and by the President in determining a response to the Governor’s request (44 CFR § 206.33).

2. When a Governor’s request for major disaster assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (Stafford Act) is under review, a number of primary factors are considered to determine whether assistance is warranted. These factors are outlined in FEMA’s regulations (44 CFR § 206.48).

3. Degree of damage to impacted residences:
   - Destroyed – total loss of structure, structure is not economically feasible to repair, or complete failure to major structural components (e.g., collapse of basement walls/foundation, walls or roof);
   - Major Damage – substantial failure to structural elements of residence (e.g., walls, floors, foundation), or damage that will take more than 30 days to repair;
   - Minor Damage – home is damaged and uninhabitable, but may be made habitable in short period of time with repairs; and
   - Affected – some damage to the structure and contents, but still habitable.

4. By law, Federal disaster assistance cannot duplicate insurance coverage (44 CFR § 206.48(b)(5)).

5. Special populations, such as low-income, the elderly, or the unemployed may indicate a greater need for assistance (44 CFR § 206.48(b)(3)).

6. Ibid (44 CFR § 206.48(b)(3)).

7. Based on State population in the 2010 Census.

8. Statewide Per Capita Impact Indicator for FY14, Federal Register, October 1, 2013.
