Subject: HMGP-DR-1786-LA, Project #160 Abbeville Hospital Safe Room

Good Morning Shona,

The project referenced above is for the construction of a new safe room located within the Abbeville Hospital in Vermilion Parish, LA. The Applicant intends on expanding the existing hospital's footprint to include the new safe room. The safe room coordinates and corresponding FIRM panel are as follows: Center of Future Safe Room (LAT. 29.97405246; LONG. -92.1085524); FIRM Panel 22113C0355F, dated January 19, 2011. There appears to be a FIS for this area.

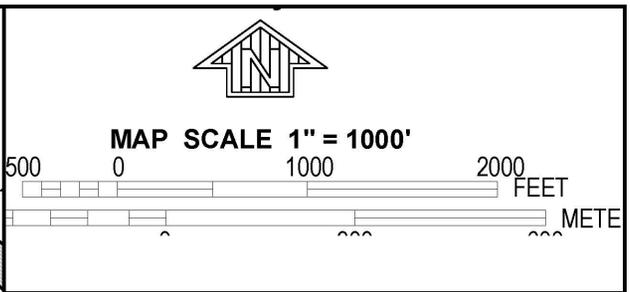

Before EHP can complete its review, we'll need to identify the 500-year elevation for inclusion in our Supplemental Environmental Assessment (SEA). Are you available to assist with this request? Based on the information provided above, would you be able to extract the elevation requirement for the this site?

FYA, I've attached the project design plans, letter from the Floodplain Administrator, FIRMette, scope, etc.

Let me know if there's anything else you need.

Thank you,

Sarah Carrino
