

Formal National Dam Safety Review Board (NDSRB) Request to National Inventory of Dams (NID) Workgroup

11/07/2016

Issue: In accordance with the recommendation of the NDSRB, FEMA is requesting the NID Work Group to look into the development of recommendations of actions, productions and/or services that would assist low-performing states to improve their performance outcome.

Action Required: It is requested that the NID Workgroup lead an effort to explore the following and report out on their findings at the January meeting:

- a. Identify states with a low performance rating in either of the three National Dam Safety Program performance areas: inspections; emergency action plans; and condition assessments.
- b. Working with the identified states, determine the challenges within each low performing state program that impedes their ability to improve performance.
- c. Develop recommendations (with an implementation plan) for actions, productions and/or services that would assist low-performing states to improve their performance outcome.
- d. Provide written recommendations to the NDSRB for their consideration and brief finding and recommendations at the April 2017 meeting.

Deadline: April 26, 2017

Discussion/Considerations: The NID Work Group may supplement their membership, as needed, by inviting members of federal, state or non-governmental organizations to support this effort.
