The Local Capacity Building Support Catalog contains resources useful to local governments recovering from severe disasters. It is a weekly compilation of time sensitive and ongoing trainings, toolkits, and technical assistance offered by over 40 federal and state departments, professional and trade associations, and national non-profit organizations. Most offerings are free or low cost.

The Catalog's purpose is to help local governments address knowledge and capacity gaps in disciplines necessary for long-term recovery. Local Governments should see the Catalog as a buffet of offerings that can be used to address their self-identified needs.

The following topics (and many more) are represented:
- Producing and Implementing Recovery Plans
- Mitigation, Resiliency, Sustainability
- Building Codes
- Volunteer and Donations Management
- Project Management
- Budgeting, Cash flow, and Financial Management
- Housing Development
- Economic Development
- Communications and Public Engagement
- Grant seeking and management
- FEMA and HUD funding training

Resources identified in this guide are compiled from readily available information or information provided by the organizations themselves. FEMA makes no endorsement of the training or resources, either its availability or content. Please contact CPCB-RSF@fema.dhs.gov with suggestions of additional offerings.

**TIME SENSITIVE OFFERINGS - MUST REGISTER**

**Course Title:** Inclusive Planning: Centering Community Voice in Equitable Development  
**Dates:** June 14, 2018 2:00 PM - 3:00 PM EDT  
**Register Here**

**Course Description:** Equitable development requires targeted efforts to ensure that disadvantaged communities and people of color benefit from development in their neighborhoods, cities, and regions — so those very communities must have a real and powerful voice in the decision-making and planning processes that guide development.

This webinar will share strategies and best practices for inclusive planning and other approaches that build power among community organizations and advocates to craft community-driven development approaches that can produce meaningful equity outcomes.

**Featured Speakers:**
- Vaughn Perry, Bridges Across the River (11th Street Bridge Park, Washington DC)
- Tony DeFalco, Verde/Living Cully (Portland)
- Tracey Ross, PolicyLink, moderator

**Format:** Webinar
Class Duration: 1 hour  
Audience: State emergency management leadership and agency staff who have a role in recovery planning and operations; other State agency and non-governmental partners who support state recovery planning and operations.  
Cost: Free  
Group Offering: All in Cities Initiative a project of Policy Link

Course Title: Setting Recipients up for Success: Federal Emergency Management Agency (FEMA) Grants Management Technical Assistance Program  
Dates: June 20, 2018 1:00 PM - 2:00 PM EDT Register Here  
Course Description: This session is ideal for beginners seeking an introduction to the concepts, principles, and terminology for successful grant management. Attendees will review a model framework for collaboration and communication between staff representing policy, financial and programmatic components. Compliance tools and resources will be shared.  
Learning Objectives:  
1. Explain grant lifecycle phases  
2. Identify Federal resources to support successful grant management  
3. Connect with grant management peers and other professionals  
Format: Webinar  
Class Duration: 1 hour  
Audience: Potential grant applicants or recipients/subrecipients with less than 2 years of experience with federal grants will benefit from the interactive discussions on the grant lifecycle.  
Cost: $60  
Group Offering: National Grants Management Association

Course Title: Recovery from Disaster: The Local Community Role  
Dates: August 27-30, 2018 Register Here  
Course Description: This 4-day course covers foundational concepts in disaster recovery and the latest guidance on recovery planning. Participants will either assess their own recovery plan or a sample against this national planning guidance. Following that, participants will discuss how a disaster recovery effort can be organized, managed, and led along with the types of challenges faced by recovery managers. Scenario activities throughout the course give participants the opportunity to target information strategies, address local capabilities and challenges, and analyze experiences from Joplin, Missouri. The capstone activity is meant to apply all of the knowledge acquired in the course, through further examination of all of the elements of a pre-disaster recovery planning document in the context of a realistic recovery scenario.  
Course Goals:  
• To increase participants' understanding of local responsibilities and challenges associated with disaster recovery.  
• To provide a forum for discussion of "lessons learned" in disaster recovery at the local level.  
• To prepare participants to develop and implement a pre-disaster recovery plan.  
Recommended Prerequisites:  
**Format:** Class  
**Delivery:** In person  
**Class Duration:** Four days  
**Audience:** State emergency management leadership and agency staff who have a role in recovery planning and operations; other State agency and non-governmental partners who support state recovery planning and operations.

**Cost:** No cost for the course itself. A stipend is provided to reimburse students for common-carrier transportation or POV; ground transportation between NETC and the designated airports using the campus shuttle service; lodging on campus; and the cost of the first piece of luggage up to 50 pounds, not to exceed $60 roundtrip for EMI students.

Students are responsible for purchase of a meal ticket and the cost of private ground transportation from the point of departure to the local airports and back, parking and tolls should they choose not to use the NETC Shuttle. The meal ticket price is approximately $125 per class for all 3 meals a day plus a morning and evening break.

**Group Offering:** FEMA’s Emergency Management Institute  
**Contact:** Dianne Walbrecker, Dianne.walbrecker@fema.dhs.gov

---

**ONGOING RESOURCES**

**IN PERSON TRAININGS**

**Course Title:** New Public Assistance for Recipients and Applicants  
**Description:** Two day course designed to inform and educate State, Local, Tribal, and Territorial Governments about the New Public Assistance Delivery Model and the new Grants Portal. The course is designed to be a step-by-step approach, beginning with an overview of the New Public Assistance Delivery Model Structure, followed by a walkthrough of each of the operational phases. Each unit identifies, defines, and discusses Recipient and Applicant specific roles, functions, and actions. At the conclusion of the course, Applicants and Recipients will receive valid user names and passwords to access the live Public Assistance Grants Portal. Through access to the live platform, stakeholders will be able to complete their Organizational Profiles and conduct preparation activities for future disaster declarations.

**Format:** Class  
**Delivery:** In person  
**Class Duration:** Two-days  
**Audience:** Federal, State, and local government officials  
**Cost:** Free  
**Group Offering:** FEMA Public Assistance Division  
**Contact:** Tanya Shannon, tanya.shannon@fema.dhs.gov
Course Title: Procurement Disaster Assistance Team. Procurement Under FEMA Awards: Requirements for Recipients and Subrecipients When Procuring Services and Supplies with Funding under Stafford Act Grant Programs.

Description: The Procurement Disaster Assistance Team (PDAT) is a group of attorneys within FEMA’s Office of Chief Counsel that trains and advises Public Assistance staff on the Federal procurement requirements; works with Public Assistance staff to provide training and guidance to recipients and subrecipients on the Federal procurement requirements; and, when requested, provides general guidance regarding concerns with proposed recipient or subrecipient procurement actions.

Violations of the Federal procurement requirements can result in reduced Federal grant funding. This training will focus on the requirements set forth in the Uniform Rules so that participants can identify and avoid potential violations of the Federal procurement requirements. Topics include: overview and use of contracts by recipients and subrecipients; procurement by state, tribal, and local governments, hospitals, institutions of higher education, and other nonprofit organizations; competition; methods of procurement; cost or price analysis; contractor bonding requirements; and contract provisions.

A downloadable version of this course description is available here.

Format: Class
Delivery: In person
Class Duration: 4 hours
Audience: State, Local, and Tribal emergency management personnel, private nonprofit entities, and FEMA personnel.
Cost: Free
Group Offering: FEMA Public Assistance Division
Contact: Please contact your local FEMA staff to set up a training session. FEMA personnel in the field or at a Region will get in touch with PDAT, and we will work with the applicable parties to arrange a training. Our standard presentation is 4 hours long, and we can conduct both in-person trainings as well as live webinars. We request a minimum of 15 participants for all trainings and a maximum of 100 participants for our live webinars.

Course Title: GSA's Disaster Purchasing Program
How to Leverage the Federal Government’s Buying Power in Preparation, Response, and Recovery to a Natural Disaster

Description: This course provides an overview of the Government Service’s Administration (GSA) Disaster Purchasing Program for state and local governments. It outlines the details of the program and provides a tutorial on how to buy supplies and services from all GSA Schedule Contracts to facilitate recovery from a major disaster.

Format: Classroom with lecture and discussion
Delivery: In-person
Class Duration: 1.0 Hour to up to 1/2 day, depending on needs and discussion
Audience: State, City, County, and Municipal Governments; State-funded Independent School Districts, Colleges, and Universities.
Cost: Free
Group Offering: GSA - Customer and Stakeholder Engagement Office
Contact: Mark King, mark.king@gsa.gov, 512-364-3298
Course Title: Safety Assessment Program (SAP) Training
Description: The AIA building Safety-Assessment Program (SAP) training provides building officials, architects, and engineers nationwide with the technical knowledge and protocol to assess the safety, habitability and condition of buildings, and infrastructure in the aftermath of a disaster. Instructors of this all-hazards course share experiences from the field and walk attendees through interactive case studies demonstrating common damage and safety precautions. Qualified professionals will receive a Building Evaluator certificate and ID card from the State of California and Applied Technology Council field manual, and will be able to deploy into the field as a volunteer or through mutual aid assistance.
Format: Workshop
Delivery: In-person
Class Duration: Full day
Audience: Certified building officials and inspectors; Licensed architects; civil, structural, and geotechnical engineers
Cost: Varies
Group Offering: American Institute of Architects (AIA) Disaster Assistance
Contact: Rachel Minnery, rachelminnery@aia.org, (202) 626 7329

Course Title: CDBG Basics: Training for Practitioners
Description: The course will provide a basic, but comprehensive overview of the Community Development Block Grant (CDBG) Program. This course will provide a hands-on approach to learning the program through lecture and in-class exercises. Course participants will learn how to read the regulations, how to determine timeliness in spending CDBG funds, what activities are eligible under the program, how to document national objectives, and how to calculate Low-Mod Income (LMI) benefit. Participants will also learn important program definitions, the components of the Consolidated Plan and the Annual Action Plan, what's covered under the administration and planning activities, and grantee responsibility for monitoring sub-recipients. Class participants will also learn the difference between a sub-recipient, contractor, and a Community-Based Development Organization (CBDO) and their roles, as outlined in the regulations. Class participants will learn important financial administration information related to program management and other federal cross-cutting regulations related to the program.
Format: Classroom with lecture and discussion
Delivery: In-person
Class Duration: 3 Days
Audience: Local Governments receiving or applying for CDBG funding
Cost: $350 for members/$450 for non-members
Group Offering: National Community Development Association
Contact: Steve Gartrell, sgartrell@ncdaonline.org

Course Title: Implementing and Managing Long-Term Recovery: A Training for Local Governments
Description: Provides an introduction to recovery implementation, offering a survey of what’s needed to manage and achieve long term recovery from a local government perspective. Ideally, the class is taken after a community has created a Recovery Plan or has determined which recovery projects it would like to implement.
Format: Workshop with lecture and discussion
Delivery: In-person
Class Duration: ½ day to full day depending on needs of community and time allotted for discussion
Audience: Mayor, Deputy Mayor, Municipal Finance Officer, Municipal Project Manager, Non-municipal stakeholders active on Recovery Steering Committees
Cost: Free
Group Offering: FEMA – Community Planning and Capacity Building (CPCB) Recovery Support Function (RSF)
Contact: Michael Gumpert, michael.gumpert@fema.dhs.gov 720-415-6499

Course Title: Public Participation and Community Revitalization
Description: Course provides overview of public participation demands, P2 frameworks, process design and technique selection, communications, lessons learned from major recent disaster experiences, and best practice case studies on successful community transformations.
Format: Workshop
Delivery: In-person
Class Duration: Half-day/Full-day
Audience: Municipal staff and Elected Officials, civic institutions, community stakeholders and non-profit leaders
Cost: Free
Group Offering: Center for Communities by Design, American Institute of Architects
Contact: Joel Mills, Senior Director, Center for Communities by Design, (202) 626-7405, joelmills@aia.org

Course Title: Public Participation or Involvement, Community Visioning and/or Risk Communication
Description: Provides training in use of collaborative tools and processes to use internally or externally, training in or development of public involvement and outreach approaches, working with a community to develop a community vision for recovery, supporting community planning efforts, etc.
Format: Webinar, workshops, public meeting, brownbag, etc.
Delivery: In-person or webinar
Class Duration: 1 hour to one-week, depending on needs of community and time allotted for discussion
Audience: Community staff and elected officials
Cost: Free
Group Offering: USACE Institute for Water Resources, Collaboration and Public Participation Center of Expertise
Contact: Melanie Ellis, Regional Outreach Coordinator for the USACE Southwestern Division at Melanie.J.Ellis@usace.army.mil

Course Title: Environmentally Sustainable Business
Description: Provides an introduction to the concepts of environmental sustainability, sustainable business case studies, and sustainability plan development. Ideally, the class information is incorporated early in business recovery and rebuilding.
Format: Workshop with lecture and discussion
Course Title: Environmental Sustainability Planning and Assessment

Description: Provides an introduction to the concepts of environmental sustainability and how to develop and implement a sustainability plan for municipal government including carbon accounting and greenhouse gas emissions reduction. Ideally, the class information is incorporated early in recovery planning.

Format: Workshop with lecture and discussion

Delivery: In-person

Class Duration: ½ day to full day depending on needs of community and time allotted for discussion

Audience: City government including mayors, financial officers, fleet and facilities managers

Cost: Free

Group Offering: DHS-IP-Infrastructure Development and Recovery

Contact: Cherie Peacock, cherie.peacock@hq.dhs.gov, 703-235-2531

Course Title: Implementing and Digital Historic Preservation Survey and Assessment for Disaster Response

Description: Provides an introduction to response and recovery implementation of a digital historic preservation survey and assessment strategy following a disaster. Using GIS and GPS tools, the strategy, based on one implemented following Hurricane Katrina, focuses on developing a fast and efficient data collection/exchange to help document and assess the condition of historic resources, facilitating the National Historic Preservation Act Section 106 obligations of jurisdictions. In addition the fully developed methodology addresses the documentation of resources through accurate GPS data collection for mitigation purposes.

Format: Workshop with lecture and discussion

Delivery: In-person or webinar

Class Duration: ½ day to full day depending on needs of the audience and time allotted for discussion

Audience: Incident command team members, cultural resource specialists, recovery/response team members (federal, state and local)

Cost: Free

Contact: Deidre McCarthy, deidre_mccarthy@nps.gov, 202-354-2141

Course Title: GIS for Cultural Resources: An Introduction

Description: These two training courses complement each other, but can be taken independently from each other. The Introduction course provides a basic understanding of GIS functionality as applied to cultural resource management in general. The Advanced course provides a discussion of emerging
concepts and approaches to applying GIS/GPS/Mobile Mapping to cultural resources. Both courses use ESRI ArcGIS technology and software.

**Format:** Workshop with lecture and discussion  
**Delivery:** In-person  
**Class Duration:** 2 full days for the Introduction course; 1 full day for the Advanced course depending on needs of the audience and time allotted for discussion  
**Audience:** Incident command team members, cultural resource specialists, recovery/response team members (federal, state and local)  
**Cost:** Free  
**Group Offering:** NPS - Cultural Resource GIS Facility, [https://www.nps.gov/crgis/training.htm](https://www.nps.gov/crgis/training.htm)  
**Contact:** Deidre McCarthy, deidre_mccarthy@nps.gov, 202-354-2141

**Course Title:** Historic Preservation and Hazard Mitigation Planning  
**Description:** An introduction to historic preservation concerns and hazard mitigation planning. Explains how a community can focus on their National Register of Historic Places listed, or eligible properties to prioritize risk due to various natural events. Discussion of how Hazard Mitigation plans function and efforts to integrate cultural resources concerns into such a plan, to help prepare for the next event.  
**Format:** Lecture, 45 minutes  
**Delivery:** In-person, possibly web-based  
**Audience:** Local governments, commission staff, residents  
**Cost:** Free  
**Group Offering:** NPS - State, Tribal, Local Plans and Grants Division  
**Contact:** Megan Brown, megan_brown@nps.gov (202) 354-2062

**Course Title:** Historic Preservation and Certified Local Governments  
**Description:** An introduction to the Certified Local Government program. Jointly administered by the National Park Service (NPS) and the State Historic Preservation Offices (SHPOs), each local community works through a certification process to become recognized as a Certified Local Government (CLG). Once certified CLGs become an active partner in the Federal Historic Preservation Program. Local, State, and Federal governments work together to help communities save the irreplaceable historic character of places. Participants will learn about the certification process and understand the fiscal and technical support assistance available.  
**Format:** Lecture, 45 minutes  
**Delivery:** In-person, possibly web-based  
**Audience:** Local governments, commission staff  
**Cost:** Free  
**Group Offering:** NPS - State, Tribal, Local Plans and Grants Division  
**Contact:** Megan Brown, megan_brown@nps.gov (202) 354-2062

**Course Title:** Rural and Small Systems Sustainable Utility Management  
**Description:** This workshop will help utilities address a full range of challenges and move toward sustainable management of their operations and infrastructure, including how to deliver increasingly
efficient, and higher quality services; how to improve long-term sustainability and increase resiliency; and how to use the Small Systems Guidebook to Sustainable Utility Management to make improvements at your system. Utilities will learn how to make improvements in ten key management areas, at a pace consistent with their most pressing challenges.

**Format:** Workshop with lecture, discussion and group exercises

**Delivery:** In-person

**Class Duration:** full day (@7 hours)

**Audience:** Utility Managers, Town Managers, Elected Officials and other Community Leaders

**Cost:** Free

**Group Offering:** USDA RD – Community Planning and Capacity Building (CPCB) Recovery Support Function (RSF)

**Contact:** You may contact a Technical Assistance Provider in your state or region:

National Rural Water Association: https://nrwa.org/state-associations/

Rural Community Assistance Partnership: https://rcap.org/getting-assistance/

---

**Course Title: 2015 International Building Codes Essentials**

**Description:** This seminar focuses on the basic concepts of the 2015 International Building Code (IBC). These concepts provide a basis for the correct utilization of the code. A clear understanding of the identified requirements allows the code user to apply the IBC in specific situations and helps to build an understanding of the intent of the code when asked to make a judgment on code compliance. This course will also help the code user to correctly locate code requirements. It will also provide a basis for the correct use and application of the code as well as to begin to develop a procedure for applying them. It will address the organization of the code and how it relates to the IBC family of International Codes (I-Codes).

**Format:** Workshop with lecture and discussion

**Delivery:** Virtual Classroom

**Class Duration:** ½ day to full day depending on needs of community and time allotted for discussion – 6 hours

**Cost:** Free

**Group Offering:** International Code Council – The Learning Center

**Contact:** Tracy L Lendi, tlendi@iccsafe.org or Allison Street, astreet@iccsafe.org, 1-888-422-7233

---

**Course Title: 2015 International Existing Building Codes Overview**

**Description:** This seminar will introduce critical concepts of the 2015 International Existing Building Code® (IEBC®). It will provide a basis for the correct use and application of the code. It will build an understanding of the intent of the code through detailing basic tables, categorizations and a case study.

**Format:** Workshop with lecture and discussion

**Delivery:** Virtual Classroom

**Class Duration:** ½ day to full day depending on needs of community and time allotted for discussion

**Cost:** Free

**Group Offering:** International Code Council – The Learning Center

**Contact:** Tracy L Lendi, tlendi@iccsafe.org or Allison Street, astreet@iccsafe.org, 1-888-422-7233

---

**Course Title: Nonstructural Flood Risk Adaptive Measures Workshop**

**Description:** Workshop provides an understanding of physical and nonphysical flood risk adaptive measures such as elevation, flood proofing, acquisition/relocation, public alert warning, evacuation...
planning, emergency preparedness planning, and other tools for reducing flood risk and life loss, expediting future flood event recovery, and increasing resiliency.

**Format:** Classroom workshop with PowerPoint presentations, lectures, and open discussion

**Delivery:** In-person

**Class Duration:** 4-, 6-, or 8- hours depending on educational desires of State and local officials

**Audience:** State Hazard Mitigation Officials, State floodplain administrators, community officials, interested residents and business owners.

**Cost:** Free

**Group Offering:** USACE NFPC (USACE National Nonstructural Flood Proofing Committee)

**Contact:** Randall Behm, Randall.l.behm@usace.army.mil, 402-995-2322

---

**Course Title:** Natural Hazard Mitigation Association (NHMA) Workshops on Resilience and Disaster Risk Reduction

**Description:** NHMA (National Hazard Mitigation Association) workshops include expert presentations, tools and resources, and team-building exercises. Presentations are custom-tailored to help you improve your community’s safety and resilience and to identify issues for resolution and implementation in mitigation plans and projects.

We focus on “Tools You Can Use;” and is based on the NHMA Disaster Risk Reduction Curriculum. Workshops topics are selected to enable your organization to learn about and apply the latest mitigation practices best suited to your particular community.

Workshops may be short, one-day presentations, or two- to three-days. A Workshop may focus on only one topic (e.g., legal aspects), or may include a broader spectrum, e.g., multi-hazards, sustainable and resilient development.

**Format:** In person workshop

**Delivery:** In person

**Audience:** Whole Community: officials, floodplain managers, planners, developers and all others involved in community development and redevelopment decision-making

**Cost:** Varies depending on length, travel costs and number of instructors

**Group Offering:** Natural Hazard Mitigation Association and the Resilient Neighbors Network

**Contact:** Kim Thiele, nathazma@gmail.com. Website: www.nhma.info

---

**Course Title:** Using FEMA Guidance to Administer the NFIP Substantial Improvement/Substantial Damage Requirements

**Description:** This workshop will focus on using the Substantial Improvement/Substantial Damage Desk Reference (FEMA P-758) to administer the NFIP requirements in local floodplain management regulations and building codes. The workshop covers the basics of making Substantial Improvement/Substantial Damage determinations while illustrating how the Desk Reference is organized and the level of detail that it has on all aspects of the Substantial Improvement/Substantial Damage requirements.

There are many factors that local officials need to consider and several scenarios they may encounter while administering the Substantial Improvement/Substantial Damage requirements, which are required by the International Codes. Emphasis is placed on all aspects of buildings that must be brought into compliance, which depend on flood zone and building occupancy. Some of the more common examples are discussed, including interior-only improvements, lateral and vertical additions, and historic structures. Following this workshop, the learner will understand and be able to effectively administer
Substantial Improvement/Substantial Damage requirements. Learners already familiar with Substantial Improvement/Substantial Damage requirements will further their understanding of how administering Substantial Improvement/Substantial Damage responsibilities fits into the overall picture of floodplain management through day-to-day and post-disaster activities.

**Format:** Workshop  
**Delivery:** In person  
**Class Duration:** One-day  
**Audience:** State and local officials; State and local floodplain managers; Building officials  
**Cost:** Free  
**Group Offering:** FEMA Building Science Branch  
**Contact:** John Ingargiola, john.ingargiola@fema.dhs.gov, 202-646-3452

**Course Title:** FEMA Best Practices for Flood and Wind Mitigation  
**Description:** This is offered as either a half-day or one-day course. It discusses wind and flood mitigation techniques that equal or exceed I-Code requirements for both riverine and coastal areas. The course provides information on improving hazard resistance for retrofitting projects and new construction of residential buildings. It consolidates information from recently updated FEMA guidance publications, including: Coastal Construction Manual (FEMA P-55, 2011), Engineering Principals and Practices for Retrofitting Flood-Prone Residential Structures (FEMA P-259, 2012), Wind Retrofit Guide (FEMA P-804, 2010), and the Flood Resistant Design CodeMaster (S.K. Ghosh & Associates, 2011).  
**Format:** Workshop  
**Delivery:** In person  
**Class Duration:** Half-day or One-day  
**Audience:** State and local officials; Architects; Code officials; Contractors/b builders; Engineers; Inspectors  
**Cost:** Free  
**Group Offering:** FEMA Building Science Branch  
**Contact:** John Ingargiola, john.ingargiola@fema.dhs.gov, 202-646-3452

**Course Title:** Local Officials Guide to Coastal Construction (FEMA P-762)  
**Description:** This one-day course is designed to provide local officials with the information or reference to the information that they need to effectively conduct their duties in coastal communities. The course is based primarily on FEMA P-762, Local Official’s Guide to Coastal Construction. The course will cover (1) design considerations; (2) regulations, codes, and standards; (3) permitting and inspections; (4) load paths, coastal foundations, and structural systems; (5) and roof coverings and building envelopes, including windows, doors, and openings. The regulatory requirements that coastal officials must understand and enforce (including the connection between National Flood Insurance Program (NFIP) guidelines and applicable building codes and standards) and the permitting and inspection processes make this course essential for officials in coastal communities, but also best practices, accumulated from findings after recent hurricanes and coastal events, are shared with the students, so that course attendees may positively influence coastal construction with the lessons FEMA has gathered after recent storms. The course enhances the effectiveness of actions of coastal officials in their communities to
make construction stronger and less vulnerable to coastal storms by focusing on helping officials reach a thorough understanding of issues unique to coastal environments.

**Course Title: The Flood Provisions of the International Codes and ASCE 24**

**Description:** This one-day workshop presents basic information needed to understand the flood provisions of the International Codes and ASCE 24, *Flood Resistant Design and Construction*, and the importance of coordinating local floodplain management ordinances with building codes. The 2009 and later editions of the I-Codes contain flood-resistant provisions that FEMA has determined to be consistent with the NFIP. Participants will learn how the I-Code provisions are consistent with the NFIP regulations; understand the relationship between the I-Codes and ASCE 24: learn about distinctions between the I-Codes and ASCE 24, and the NFIP regulations; and learn the importance of coordinating the I-Codes with local floodplain management ordinances.

**Format:** Workshop  
**Delivery:** In person  
**Class Duration:** One-day  
**Audience:** State and local officials; Building code officials; Floodplain management, hazard mitigation, planning, and building officials  
**Cost:** Free  
**Group Offering:** FEMA Building Science Branch  
**Contact:** John Ingargiola, john.ingargiola@fema.dhs.gov, 202-646-3452

**Course Title: Reducing Flood Losses through the International Codes**

**Description:** This half-day course provides an overview of the joint International Code Council/FEMA publication, *Reducing Flood Losses Through the International Codes: Coordinating Building Codes and Floodplain Management Regulations* (Fourth Edition 2014). This course, and the guide in more detail, helps State and local officials integrate the International Codes® (I-Codes) into their current floodplain management regulatory processes related to structures, buildings, and other development in special flood hazard areas in order to meet the requirements to participate in the NFIP. Topics include: approaches for coordinating the I-Codes and local floodplain management regulations; advantages and considerations when relying on the flood provisions of the codes; differences between the NFIP regulations and the I-Code requirements; questions for States and communities to answer to know whether and how to modify existing floodplain management regulations to coordinate with the I-Codes; modifications that can be adopted to incorporate higher standards in the I-Codes; and an introduction to model code-coordinated ordinances prepared by FEMA.

**Format:** Workshop  
**Delivery:** In person
Course Title: Better Built Communities Start with Code Improvements

Description: This course is meant to increase the resiliency of a community through the short- and long-term recovery process after a disaster. Ideally, this training is taken when a community is ready to adopt building codes for the local rebuilding process. It promotes the Coastal Construction Code Supplement that was created by community leaders and Building Code Officials in Coastal Alabama to close the gap between existing building codes and the Insurance Institute for Business and Home Safety’s (IBHS) FORTIFIED Home™ Technical Standards. It is meant to be adopted in addition to local building codes and includes the recommendations of the IBHS construction method, FORTIFIED Home™. This supplemental code is updated regularly by IBHS to keep it current based on the latest science and testing conducted at its research Institute. These additions have been proven to greatly improve the performance of a home during hurricanes and wind-driven rain, by reducing damage, insurance costs and losses during severe weather events.

Format: Training with lecture and discussion; follow-up certifications possible

Delivery: In-person (or webinar)

Class Duration: ½ day to full day depending on needs of community and time allotted for discussion

Audience: Mayor, Deputy Mayor, City Manager, City Council Members, County Commissioners, County Supervisors, Alderpersons, Planning Director, Building Official, Municipal Project Manager, Non-municipal stakeholders active on Recovery Steering Committees

Group Offering: Smart Home America and Insurance Institute for Business and Home Safety

Cost: Free

Contact: Henry “Hank” Hodde, hank@smarthomeamerica.org, 251-206-5634

Course Title: Local Mitigation Planning Workshop

Description: Covers the fundamentals of the mitigation planning requirements for communities to develop new or updated local mitigation plans that address community priorities and meet the requirements established in 44 CFR Section 201.6. This workshop describes the requirements for the planning process, stakeholder involvement, assessing risks, and developing effective mitigation strategies. Finally, the basic elements of the plan review, approval, and update cycle are discussed, including tips for implementing and maintaining an approved plan, tracking performance, keeping stakeholders involved, and preventing plans from lapsing or expiring.

Format: Workshop, Lecture

Delivery: In person

Cost: Free

Group Offering: FEMA Mitigation

Contact: Planners interested in attending or hosting field offerings of G-318 or other training should contact the appropriate FEMA Regional Office
SELF GUIDED TRAINING

Course Title: Community Facilities Infrastructure Toolkit: USDA Rural Development’s Community Facilities Programs’ guide to infrastructure development
Description: Provides guidance through the Concept Development, Planning, Design, Environmental Compliance, Finance and Construction phase of essential community facility infrastructure developments located in communities with a population not in excess of 20,000
Format: Electronic Tool Kit
Delivery: Self-Guided
Class Duration: This Self-Guided document provides flexibility which builds on the targeted individual needs of the reader. For expedited knowledge and education, the Tool Kit’s sections can be easily selected based on the organization’s need and stage of the proposed infrastructure development.
Audience: Mayor, Deputy Mayor, Municipal Finance Officer, Municipal Project Manager, Fiscal Advisors, Development Districts and Non-municipal stakeholders active on Recovery Steering Committees
Cost: Free
Group Offering: Local USDA Rural Development State Offices and Field teams are available to assist in person with the Tool Kit’s Content and agency Community Facility Program
Contact: Terence McGhee, Terence.mcghee@wdc.usda.gov, 615-783-1349

Course Title: Introduction to Finding Grants
Description: Are you new to the field of grant seeking? Discover what funders are looking for in nonprofits seeking grants and how to find potential funders in this introductory course. You will learn the 10 most important things you need to know about finding grants, including: Who funds nonprofits and what are their motivations. What do funders really want to know about the organizations they are interested in funding. How do you identify potential funders and make the first approach.
Format: Self-paced, E-learning
Delivery: Self-Guided
Cost: Free
Group Offering: The Foundation Center
Contact: fctraining@foundationcenter.org

Course Title: Introduction to Proposal Writing
Description: Are you new to proposal writing, or do you need a refresher on the basics? Get a thorough overview of how to prepare a standard project proposal for a foundation grant. After completing this course, you will:
Know what to include in your proposal
Be equipped with a few best practices in proposal writing
Have a basic understanding of the proposal process and gain confidence to get started

**Format:** Self-paced, E-learning  
**Delivery:** Self-Guided  
**Cost:** Free  
**Group Offering:** The Foundation Center  
**Contact:** fctraining@foundationcenter.org

---

**Course Title:** Introduction to Project Budgets  
**Description:** Are you ready to start fundraising for your project or idea, but don’t know what and how much to ask for? If preparing a budget for your foundation grant is holding you back, come learn the basic elements of how to draft a project budget with confidence. This class will provide you with step-by-step instructions on how to generate a standard project budget for a foundation proposal. We will discuss:
- The basic components of a project budget including income and expenses
- How to estimate the realistic cost of a project
- What other financial documents you may also need to submit with your proposal

**Format:** Self-paced, E-learning  
**Delivery:** Self-Guided  
**Cost:** Free  
**Group Offering:** The Foundation Center  
**Contact:** fctraining@foundationcenter.org

TOOLKITS

CDBG-DR Toolkit
Produced by: HUD
Description: This toolkit is for grantees who are receiving a CDBG-DR allocation from HUD. Whether you are a new CDBG-DR grantee or an experienced one, this toolkit has something for you. The CDBG-DR Toolkit provides the information you need to set up and run an effective, compliant CDBG-DR Program. It incorporates guidance on program rules, lessons learned from previous CDBG-DR grantees, and sample tools to give you a head start on your program design and implementation. (If you want to know more about CDBG-DR and how it differs from CDBG, see the CDBG-DR Program page.) Program Launch walks through the key things you need to know when you receive a CDBG-DR allocation. It provides critical information on program rules and offers tips and tools for establishing the systems, procedures, and capacity you need to implement compliant and effective CDBG-DR-funded programs. Program Implementation describes important design considerations and provides implementation tools for common CDBG-DR activities including Homebuyer, Homeowner Rehabilitation, Rental Rehabilitation, Buyouts, Small Business Loans, and more. This guidance was developed by ICF and HUD based on engagements with CDBG-DR grantees. Because no two grantees are identical and every disaster presents new challenges, the tools should be adapted to meet your local circumstances and recovery needs.

Community Recovery Management Toolkit
Produced by: FEMA Community Planning and Capacity Building
Description: The Community Recovery Management Toolkit is a compilation of guidance, case studies, tools, and training to assist local communities in managing long-term recovery following a disaster. The materials provided in this toolkit are aimed at providing guidance and resources to help local officials and community leaders to lead, organize, plan for, and manage the complex issues of post-disaster recovery.

Community Facilities Infrastructure Toolkit
Produced by: USDA Rural Development’s Community Facilities Programs’ guide to infrastructure development
Description: Provides guidance through the Concept Development, Planning, Design, Environmental Compliance, Finance and Construction phase of essential community facility infrastructure development
APA’s Disaster Recovery Resources
Produced by: American Planning Association
Description: Contains Disaster-specific research, education, and communication resources to support disaster recovery efforts.

APA’s Post Disaster Recovery Briefs
Produced by: American Planning Association
Description: Succinct 3 to 4 page how-to guides on Affordable Housing, Economic Recovery, Recovery Planning, Financial Recovery, Planning Resilient Infrastructure, Hazard Mitigation

Emergency Management Virtual Toolkit for Education Agencies Serving K-12 Schools
Produced by: Readiness in Emergency Management in Schools
Description: This toolkit, which is divided into three sections—develop high-quality emergency operations plans (EOPs), engage youth and the community and connect with other emergency management practitioners—provides users with an opportunity to populate their own education agency’s Website or emergency management Webpage with the latest Federal school emergency management training and technical assistance resources and information for schools in their state or district.

OTHER TECHNICAL ASSISTANCE

HUD to the Rescue: NSP Technical Assistance
Offered by: HUD
Description: At a standstill with your Neighborhood Stabilization Program (NSP) grant? Have problems you just can’t solve on your own? New to NSP and the Disaster Recovery Grant Reporting System (DRGR), and it’s a mystery? Want to close your grant but feel overwhelmed?
Good News! NSP Technical Assistance is here for you!

NSP Technical Assistance (TA) is geared toward identifying DRGR issues, assessing grantee closeout readiness, and resolving any programmatic issues that are delaying grantees from closing out NSP grants.
It’s easy and fast: You can get approved within 48 hours.
Email: nsp-questions@hud.gov
Who can request: Grantees, HUD CPD Representatives, and TA providers
Information needed: Grantee name, grant number, grantee contact person (email and phone number), assigned CPD Representative, and short summary of issues to address
What you can expect: Up to 30 hours of remote TA
1. Initially up to 14 hours of remote (telephone) grant assessment and follow up
2. TA addresses both DRGR and programmatic issues using a shared screen to allow TA provider and grantee to collaborate on documents
3. Grantee agrees to complete any follow up actions identified by the TA provider before the next call.
4. You may extend the assistance up to another 16 hours of remote TA, as needed.
5. If at any time the TA provider deems the issues identified more extensive than remote TA can address, then the grantee or HUD field office may request intensive on-site TA through the TA portal at https://www.hudexchange.info/program-support/.

Texas A&M Community Resilience Collaborative - TEXAS SPECIFIC RESOURCE

Offered by: Texas A&M Community Resilience Collaborative
Description: What does the CRC do for the Texas coast?
- Facilitates and leads project management of planning processes including comprehensive planning, hazard mitigation planning and environmental planning.
- Facilitates community and stakeholder engagement in planning processes.
- Provides technical assistance and transfers and translates planning data and tools to support decision making.
- Educates and trains community elected and appointed officials and staff on planning resources, tools and best practices.
- Conducts applied research on social vulnerability, coastal planning, risk perception, hazard mitigation, ecosystem services and the economic impacts of coastal hazards.
- Facilitates multi-jurisdictional watershed planning to protect water quality and quantity and to mitigate stormwater runoff.
- Supports research and fills information gaps in the current understanding of ecosystem management best practices.
- Provides service/transformational learning opportunities for university students – the next generation of coastal stakeholders and leaders.

Contact: Dr. John Jacob, jjacob@tamu.edu

Community Planning Assistance Teams

Offered by: American Planning Association
Description: Volunteer planning teams tailored specifically to a community's needs. Members offer their time and expertise to people and places where additional resources are needed. This program is supported by volunteer professionals, community contributions, and grant funding.

Contact: Shannon Burke, sburke@planning.org
The Safety Assessment Program

Offered by: American Institute of Architects

Description: A disaster strikes, and one of the first tasks for a community is to determine whether the buildings are safe for habitation. Trouble is, the structures that must be examined typically outnumber the quantity of trained city inspectors by far.

The AIA Safety Assessment Program (SAP) Training has an answer: It provides architects, engineers, building officials and inspectors with the knowledge and protocol to evaluate homes, buildings, and infrastructure in the aftermath of a disaster. This professional expertise is provided as a volunteer service and is based on the State of California’s training program. It has benefited numerous communities, resulting in thousands of safety evaluations and saving municipalities millions of dollars. The Safety Assessment Program Training is a technical training program that includes Applied Technology Council (ATC) 20 Post-earthquake Safety Evaluation of Buildings and ATC-45 Safety Evaluation of Buildings after Wind Storms and Floods. The SAP reference sheet provides information on how to organize and host an AIA SAP training.

State-led Silver Jackets Team

Offered by: USACE Institute for Water Resources, National Silver Jackets Program

Description: Interagency Silver Jackets teams can provide assistance with recovery, mitigation and future preparedness. Teams have conducted a diverse array of activities including planning and analysis projects, community outreach, training for flood risk awareness and nonstructural flood risk mitigation, preparing emergency response plans, etc., reviewed grant applications and assisted with updates to HMPs - to name a few activities. They could assist a community in areas where a collaborative, coordinated effort is needed or work on an effort that might not be fulfilled elsewhere.

GA contact is Jeffrey Morris, jeffrey.s.morris@usace.army.mil

NMHA Peer Consults

Offered by: National Hazard Mitigation Association

Description: A NMHA Peer Consult is an intensive visit by a small, select group of mitigation experts. Each team is selected to address the unique and specific challenges that your organization or community defines. An NMHA team may include peer Resilient Neighbors Network Community Officials, legal, financial, planning, engineering, architecture and building experts, as well as experts on community organization, social and public health, targeted to a specific set of issues or local project area.

Preparation for a NHMA Peer Consult includes documentation of present conditions, reports, and related information to serves as advanced briefing for the team. A preliminary visit by an NMHA team member may assist in such preparation. Once preparation is in order, the NHMA Peer Consult will include a schedule of on-site meetings, from three- to four-days with you and your local team, working intensively in addressing the brief. Such visits typically include field inspection of areas of concern, one-
on-one or team intensives (peer to peer), and presentations to larger groups, possibly public meetings as appropriate. Deliverables are defined in advance and delivered (in DRAFT form) before team departure.

Immediate Economic Development Support
Offered by: International Economic Development Council
Description: Community organizations may request a qualified economic development professional to provide services locally for economic recovery tasks such as business outreach and counseling, setting up or staffing a business recovery center, developing public outreach processes, training, or doing business case management, among other tasks. Each volunteer will be deployed for one week. Volunteers will be experienced economic developers with relevant experience. We ask the local host organization to arrange for hotel and local transportation, but all travel costs will be covered by IEDC, thanks to support from the US EDA Austin regional office.

Access Puerto Rico Assistance

Long-term Economic Development Technical Assistance
Offered by: International Economic Development Council
Description: IEDC Technical Assistance Teams provide focused resources for community economic development recovery needs. TA teams have been used to create new private-public partnerships for regional growth, for downtown and business community recovery and revitalization, and for economic scans and strategic plan adjustments.

Contact: For more information, contact Lynn Knight, lknight@iedconline.org

Grantwriting Mentor Matching
Offered by: Grantwriters Professional Association
Description: Grantwriting Mentor Matchings is an online tool – including a searchable database – that facilitates the establishment of mentoring relationships on grantwriting. It is user-driven, allowing registered Mentees to search among registered Mentors using specified criteria to find individuals whose experience and expertise match areas in which they wish to be mentored. Likewise, registered Mentors can search for and identify potential Mentees.

Cost: Free with membership which starts at $153 per year
