LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFE's) and/or Floodway have been determined, users are encouraged to consult the Flood Profiles and Floodway Data Tables contained within the Flood Insurance Study (FIS) report that accompanies this FIS. Users should be aware that BFE's shown on the Flood Insurance Study (FIS) report are not intended to be used for flood insurance rating purposes and should be used only as a guide to the source of flood elevation information. Accordingly, flood elevation data shown on the FIS should be adjusted to reflect the actual elevation of the ground surface at the location of the structure for purposes of construction or flood management purposes.

BFE elevations listed on this map were obtained and/or developed in accordance with the National Flood Insurance Program (NFIP) Flood Insurance Study (FIS) and Floodway Data Tables. Users should be aware that BFE elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Flood Insurance Program (NFIP) BFE's shown on this map, please contact the Information Services Branch at (408) 233-3344, or visit their website at www.fema.gov. Map users should seek verification of the non-NFIP elevation elevations when using these elevations for construction or flood management purposes.

Coastal BFE's shown on this map may apply only to landward of 0.9' MSL. Users of this FIS should be aware that coastal flood elevations are also provided in the Summary of Estimator Elevations Table in the Flood Insurance Study report for this community. Elevations shown in the Summary of Estimator Elevations Table should be used for construction and/or flood management purposes when they are higher than the elevations shown on this FIS.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponds); base flood elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on steep terrain); average depths determined; elevations of sheet flow floodway velocities also determined.
- ZONE A99** To be elevated from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity hazard (wave action); base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.
- ZONE D** Areas determined to be outside 500-year floodway.
- ZONE X** Areas in which flood hazards are determined.

UNDEVELOPED COASTAL BARRIERS

- Identified 100 Year Flood Hazard Area
- Identified 500 Year Flood Hazard Area
- Otherwise Predicted Areas

Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

Floodway Boundary

Zone D Boundary

Boundary (Including Special Flood Hazard Zones) and Boundary (Including Areas of Different Coastal Base Flood Elevations) Within Special Flood Hazard Zones

Base Flood Elevation Line; Elevation in Feet; See Map Index for Elevation Datum.

Cross Section Label

Base Flood Elevation in Feet Where Located Within Zone; See Map Index for Elevation Datum.

Elevation Reference Mark

RM7

River Mile

* Referenced to the National Geodetic Vertical Datum of 1929

NOTES

This map is for use in administering the National Flood Insurance Program; it does not represent a warranty, an offer of insurance, or a contract. Flood insurance coverage is provided through the National Flood Insurance Program. The community map repository should be consulted for more detailed data on BFE's and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AH, AO, A99, V, VE, and X. Areas of 500-year flood include Zones X, D, and VE. Areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile are also included in Special Flood Hazard Areas. Areas of 500-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile are also included in Special Flood Hazard Areas. Areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile are also included in Special Flood Hazard Areas.

Boundaries of the Floodways were computed at cross sections and interpolated between cross sections. The Floodways were based on hydrologic considerations with respect to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Tables where floodway width is shown at 1:200 scale.

Coastal BFE's shown are current as of the date of this map. The user should consult appropriate community officials to determine if appropriate limits have changed subsequent to the issuance of this map.

This map may incorporate appropriate boundaries of Coastal Boundaries (Source: System Units and/or Otherwise Protected Areas established under the Coastal Barrier Improvement Act of 1984 (P.L. 98-562)).

For community map revision history prior to countywide map, see Section 6.6 of the Flood Insurance Study Report.

For updating map panels and base map source see separately printed Map Index.

FLOOD INSURANCE RATE MAP EFFECTIVE
AUGUST 2, 1982

FLOOD INSURANCE RATE MAP REVISIONS:
Map revised February 15, 1980 to change flood hazard zones, zone designations, base flood elevations, coastal base flood elevations, and floodway boundaries.
Base flood elevations from 1980 to 1982 to revise flood elevations, to change base flood elevations, to change zone designations, to change special flood hazard areas, and to update coastal limits.
For descriptions of elevation reference marks, see panel 060377 00001 of the Flood Insurance Study Report.

Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

For descriptions of elevation reference marks, see panel 060377 00001 of the Flood Insurance Study Report.

To determine flood insurance coverage, consult your insurance agent or call the National Flood Insurance Program at (800) 538-6620.
