PURPOSE OF BUSINESS PLAN SUMMARY

The Map Modernization Management Support (MMMS) Business Plan Summary was compiled by reviewing the Federal Fiscal Year (FY) 2005-09 MMMS Business Plans and FY06 updates from the business plans submitted to the Department of Homeland Security's Federal Emergency Management Agency (FEMA). The business plan summary highlights the proposed and completed MMMS activities that each FEMA MMMS Partner has undertaken, presents how the FEMA Regional Office allocated its funding from FEMA Headquarters to each State in Federal FY05, and identifies risk factors that may have impacted the FEMA MMMS Partner's resources. All of these categories are shown in relation to the Flood Map Modernization mapping schedule.

STATE VISION FOR MAP MODERNIZATION AND IMPLEMENTATION

The Division of Water's vision for Map Modernization is to provide more accurate and complete flood hazard information for Ohio communities. Additionally, Ohio

communities will have accurate, up-to-date flood maps. This information will result in better decisions concerning the flood risk and development alternatives for flood hazard areas across Ohio. At the same time, the State's vision includes using Map Modernization as an opportunity for outreach to communities and technical assistance to improve local floodplain management programs. Ohio is participating in Map Modernization because the State has value to add to the process through the establishment of priorities, technical assistance to and coordination with communities, applying engineering expertise to assist in flood map production and our mandate to coordinate flood risk reduction for Ohio.

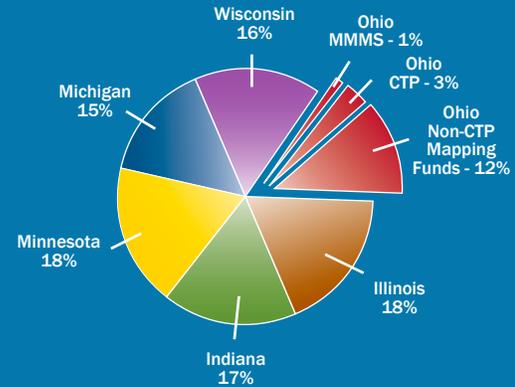

SIGNIFICANT ACCOMPLISHMENTS AND STRENGTHS OR SUCCESS STORIES

Traditionally, the Ohio Department of Natural Resources (DNR), Division of Water (DOW), has participated in the updating of FEMA flood maps. That participation focused on community technical assistance to a large extent and on flood mapping production to a much lesser extent. Goals of the DNR include:

- The Floodplain Management Program will implement High Performance Work Place tools, strategies and processes to ensure efficiency, outstanding customer service, and high employee satisfaction.
- The Floodplain Management Program will use partnerships, education and public awareness, technical assistance, and integration of technology to effectively influence land use and development decisions statewide.
- The DOW will have a clear understanding of the Floodplain Management Program's mandates and the actions and resources required to support them.

REGIONAL AND STATE VIEW

Federal FY05 Region V Funding Distribution Total \$17,136,035

Source: State percentage received of total FY05 Flood Map Modernization Regional production budget according to internal FEMA procurement data (PALT). Ohio 16%

ACCOMPLISHED ACTIVITIES FY05

- Administration of Map Modernization activities
- Partnership building
- Pre-scoping and scoping participation
- Outreach

MMMS ACTIVITIES PLANNED FY06

- Participate in activity reporting and tracking
- Attend Map Modernization coordination meetings
- CTP Technical Assistance
- Update Ohio's Map Modernization web site

FEMA'S OBJECTIVES FOR FLOOD MAP MODERNIZATION

- Establish and maintain a premier data collection and delivery system
- Achieve effective program and project management
- Build and maintain mutually beneficial partnerships
- Expand and better inform the user community

SIGNIFICANT PARTNERSHIPS

The DOW will track Cooperating Technical Partner (CTP) agreements created and workshops conducted. The DOW's goal will be to develop CTP agreements with two counties per year in addition to conducting quarterly coordination meetings with all CTPs and other agencies. Increased awareness of the CTP program will be achieved through quarterly coordination meetings with prospective CTP communities, development of CTP agreements, and monitoring of active agreements. Technical assistance includes providing this to communities for reviewing CTP activities, Memorandum of Understanding templates, and outreach to notify communities of the CTP framework.

UNMET NEEDS OF OHIO'S MAP MODERNIZATION PROGRAM

Activities within the State's Map Modernization program are funded through MMMS, CTP, Community Assistance Program, and the Ohio General Revenue Fund. Should funding be reduced by FEMA, there currently is no spare capacity to absorb those costs. The DOW feels that training in Map Needs Update Support System updates and Mapping Information Platform training is needed.
