

Southwest Florida Water Management District MMMS – Business Plan Summary

Data based on the Southwest Florida Water Management District (SWFWMD) dated 2006 and other FEMA sources

REGIONAL AND STATE VIEW

Federal FY06 Region IV Funding Distribution Total \$36,304,423

Source: State percentage received of total FY06 Flood Map Modernization Regional production budget according to internal FEMA procurement data (PALT). SWFWMD 3.9%; Florida 15.7%

PURPOSE OF BUSINESS PLAN SUMMARY

The Map Modernization Management Support (MMMS) Business Plan Summary was compiled by reviewing the Federal Fiscal Year (FY) 2005-2009 MMMS Business Plans and FY 2007 updates. These business plans were submitted to the Department of Homeland Security's Federal Emergency Management Agency (FEMA) by FEMA's MMMS partners.

The spring 2007 Business Plan Summary is being published at the crossroads of FEMA's mid-program evaluation and the end-state conditions of Map Modernization. This year, the summary reflects the MMMS partners' approach to and the effects of FEMA's mid-course adjustment, in addition to outlining their accomplished and planned MMMS activities, highlighting the MMMS partner's approach to meeting the goals of and program vision for Map Modernization. FEMA's mid-course adjustment is a redirection of improving and updating the Nation's flood hazard identification maps. FEMA will now focus on developing flood

maps that meet new higher standards for mapping and for a greater allocation of resources to those communities at greatest flood risk. The "end state conditions" refer to how successful the flood mapping effort is at the end of Map Modernization in FY 2010.

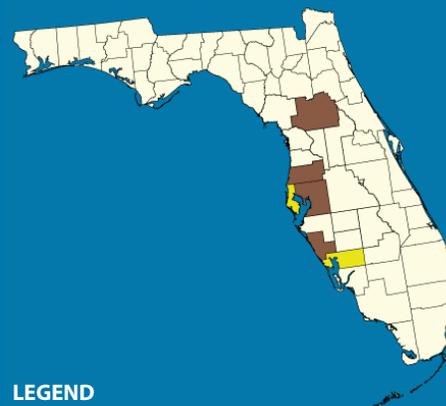

STATE VISION FOR MAP MODERNIZATION AND IMPLEMENTATION

The Southwest Florida Water Management District's (the District) vision is to continue map production for the 12 remaining counties through FY 2009 and to assume full responsibility for the management and maintenance of the Digital Flood Insurance Rate Maps (DFIRMs) over the five-year period between FY 2005 and FY 2009. The District plans to incrementally build its capabilities and take responsibility for all program activities except for printing and map distribution.

SIGNIFICANT ACCOMPLISHMENTS AND STRENGTHS OR SUCCESS STORIES

Since it was created in 1961, the mission of the District has remained essentially the same – to manage and protect water and related natural resources. Our areas of responsibility now encompass water supply, flood protection, water quality and natural systems. Moreover, there is growing recognition that the integration of all these areas is essential to effective planning and watershed-based management of the resource. Additionally, the District has been active in floodplain mapping for over 35 years. The District has funded over 594 water resource projects in the Cooperative Funding Program totaling over \$800 million from 1988-2001. In FY 2004, the District funded over \$5.4 million towards cooperative funding projects with flood protection benefits.

SIGNIFICANT COOPERATIVE EFFORTS WITH PARTNERS

FEMA and the District executed a Cooperating Technical Partners (CTP) Memorandum of Agreement on September 14, 2001. As a CTP, the District has executed and is currently implementing four Mapping Activity Statements (MAS) for the following counties: Hernando, Pasco, Sarasota, and Marion.

ACCOMPLISHED ACTIVITIES FY06

- Updated the plan

MMMS ACTIVITIES PLANNED FY07

- Digital base map inventory and sharing
- Assessment of community mapping needs
- Outreach
- Update Business plan
- Training efforts to state and local officials
- Coordination and effort in building partnerships
- Increased staffing
- Compliance and map adoption
- Digital map adoption
