

List of Fiscal Year 2008 Pre-Disaster Mitigation Grant Recipients

The Pre-Disaster Mitigation (PDM) grant program is administered by FEMA to provide a consistent source of funding to States, Territories, Tribes, and local governments for pre-disaster mitigation planning and projects primarily addressing natural hazards. Funding these plans and projects reduces overall risks to the population and structures, while also reducing the reliance on funding from actual disaster declarations.

Approximately \$54 million was made available for competitive grants for the Fiscal Year (FY) 2008 PDM program. FEMA will award each State at least \$500,000 for the highest ranked submitted sub-application(s) that meet PDM eligibility requirements. The remainder of available funds will be awarded on a nationally competitive basis to the highest ranked sub-applications in accordance with the FY 2008 PDM program guidance.

FEMA has selected the following FY 2008 PDM grants for further review in preparation for funding. As pre-award activities, including environmental/historic preservation reviews, are completed, grants will be awarded.
