

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repository should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where **Base Flood Elevations (BFEs)** and/or **Flowways** have been determined, users are encouraged to consult the Flood Profiles, Floodway Data tables and/or Summary of Stillwater Elevations tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (CBFEs) shown on this map apply only landward of 0.0 National Geodetic Vertical Datum of 1929 (NGVD-29). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Stillwater Elevations tables should be used for construction and floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the **Flowways** were computed at cross sections and interpolated between cross sections. The flowways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **flood control structures**. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures in this jurisdiction.

The **projection** used in the preparation of this map is Universal Transverse Mercator (UTM) zone 11. The horizontal datum is NAD83. CLARKE1966 spheroid. Differences in datum, projection or UTM zones used in the production of FIRMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of the FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

Spatial Reference System Division
National Geodetic Survey, NOAA
Silver Spring Metro Center
1315 East-West Highway
Silver Spring, Maryland 20910
301/713-3151

To obtain current elevation, description, and/or location information for **bench marks** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit their website at www.ngs.noaa.gov.

Base map information shown on this FIRM was provided in digital format by U.S. Bureau of Census TIGER files and have been geospatially corrected.

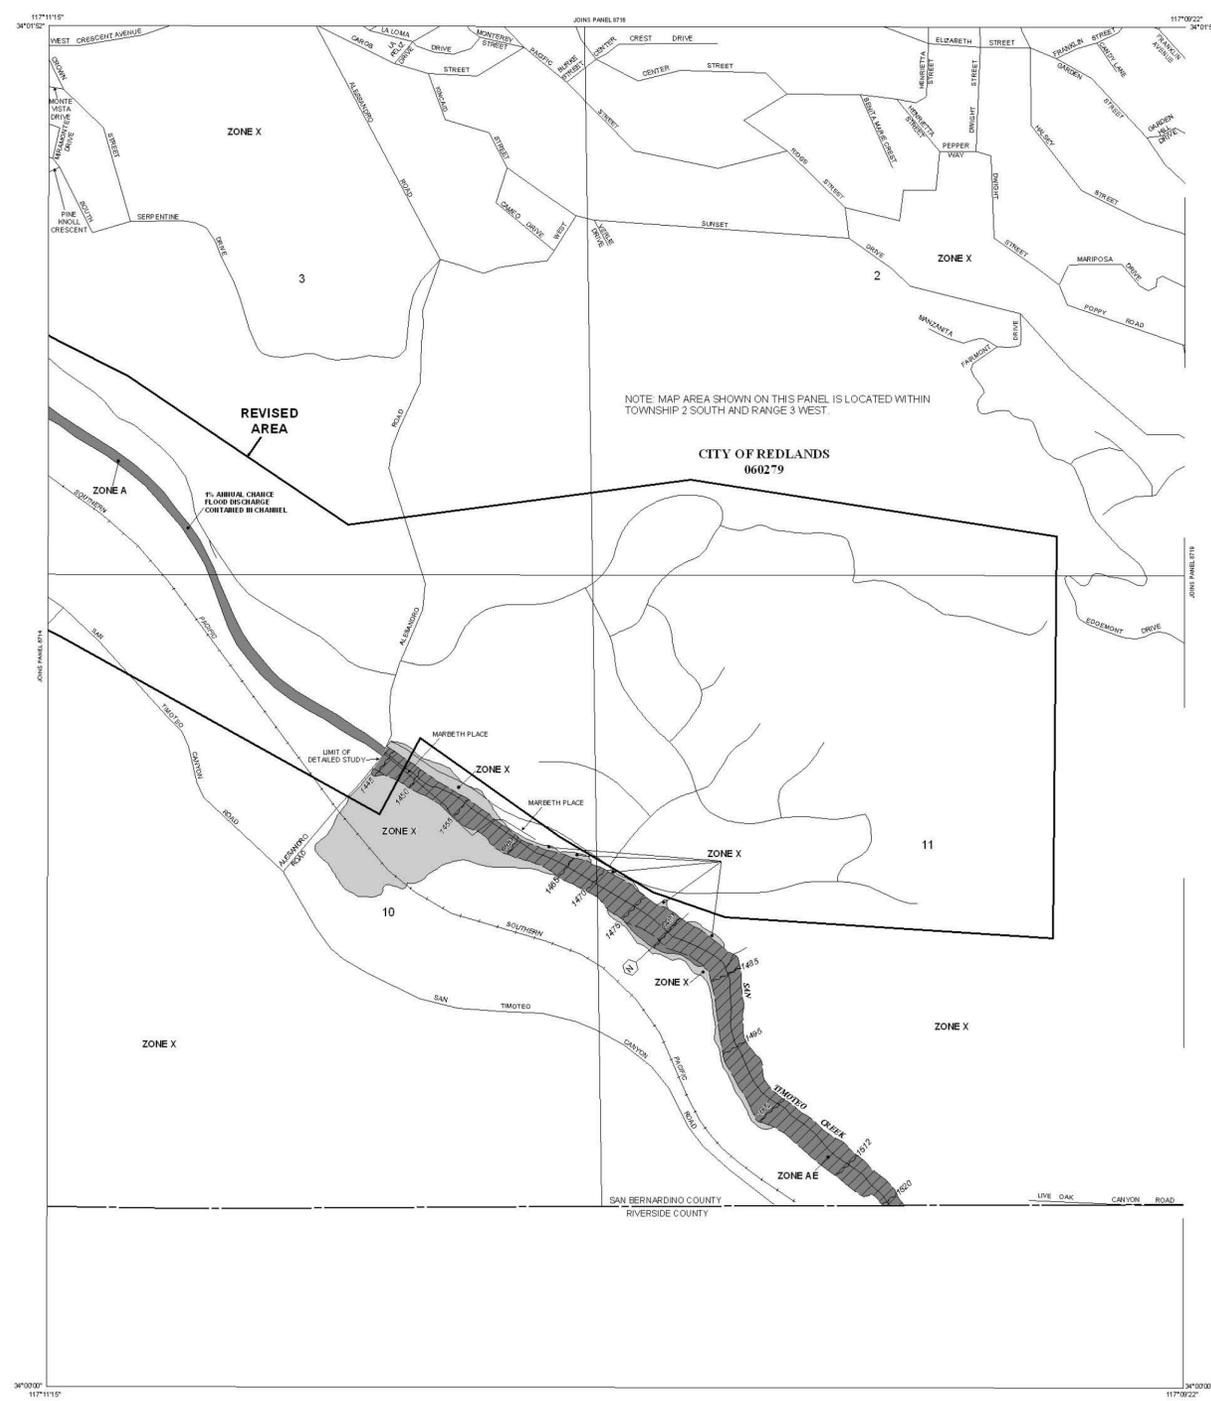

This map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FIRM for this jurisdiction. The floodplains and flowways that were transferred from the previous FIRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Profiles and Floodway Data tables in the Flood Insurance Study report (which contains authoritative hydraulic data) may reflect stream channel distances that differ from what is shown on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed **Map Index** for an overview map of the county showing the layout of map panels, community map repository addresses, and a Listing of Communities table containing National Flood Insurance Program dates for each community as well as a listing of the panels on which each community is located.

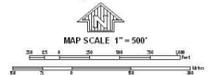

Contact the **FEMA Map Service Center** at 1-800-358-9616 for information on available products associated with this FIRM. Available products may include previously issued Letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by Fax at 1-800-358-9620 and its website at www.fema.gov.

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-336-2627) or visit the FEMA website at www.fema.gov.

LEGEND

- SPECIAL FLOOD HAZARD AREAS (SFHA) SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD
 - ZONE AE: Base Flood Elevation determined.
 - ZONE A: No base flood elevation determined.
 - ZONE AH: Flood depths of 1 to 3 feet (usually areas of ponds); base flood elevations determined.
 - ZONE AO: Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of shallow fan flooding, velocities also determined.
 - ZONE AR: Area of special flood hazard formerly protected from the 1% annual chance flood event by a flood control system that was subsequently identified. Zone AR indicates that the former flood control system is being restored to provide protection from the 1% annual chance of greater flood event.
 - ZONE AS: Area to be protected from 1% annual chance flood event by a Federal flood protection system under construction; no base flood elevations determined.
 - ZONE AV: Coastal flood zone with velocity hazard (wave action); no base flood elevations determined.
 - ZONE VE: Coastal flood zone with velocity hazard (wave action); base flood elevations determined.
 - FLOODWAY AREAS IN ZONE AE
 - OTHER FLOOD AREAS
 - ZONE XE: Areas of 0.2% annual chance flood; areas of 1% annual chance flood with average depths of less than 1 foot or with average wave less than 1 square mile; and areas protected by levees from 1% annual chance flood.
 - OTHER AREAS
 - ZONE XZ: Areas determined to be outside the 0.2% annual chance floodplain.
 - ZONE 0: Areas in which flood hazard is undetermined, but possible.
 - COASTAL BARRIER RESOURCES SYSTEM (CBRS) AREAS
 - OTHERWISE PROTECTED AREAS (OPAs)
 - Floodplain boundary
 - Floodway boundary
 - Zone 0 boundary
 - CBRS and OPA boundary
 - Boundary dividing Special Flood Hazard Area of different Base Flood Elevations. Flood depths or flood velocities.
 - Base Flood Elevation line and value: elevation in feet
 - Base Flood Elevation value where uniform within zone: elevation in feet
 - Cross Section line
 - Traversed line
 - Geographic coordinates referenced to the North American Datum of 1983 (NAD 83)
 - 100-year Universal Transverse Mercator grid values, zone 11
 - 600,000 FT 500-foot grid lines
 - Bench mark (see explanation in Notes to Users section of the FIRM panel)
 - River Mile
 - MAP REPOSITORY
 - EFFECTIVE DATE OF COUNTYWIDE FLOOD INSURANCE RATE MAP
 - MATCH TO PANEL
 - EFFECTIVE DATE OF RESUBMISSION TO THIS PANEL
- For community map revision history prior to computerized mapping, refer to the Community Map History table included in the Flood Insurance Study report for this jurisdiction.
- To determine if flood insurance is available in the community, contact your insurance agent or call the National Flood Insurance Program at 1-800-638-9620.
