

The Division of Ecological Resources recently adopted a new database system called Biotics. As a result of this change, the layout and contents of the database reports have been revised. Many of the fields included in the new reports are the same or similar to the previous report fields, however there are several new fields and some of the field definitions have been slightly modified. We recommend that you familiarize yourself with the latest field explanations.

Rare Features Database Reports: An Explanation of Fields

The Rare Features Database (Biotics) is part of the Natural Heritage Information System, and is maintained by the Division of Ecological Resources, Minnesota Department of Natural Resources (DNR).

Please note that the print-outs are copyrighted and may not be reproduced without permission

Field Name: [Full (non-abbreviated) field name, if different]. Further explanation of field.

-E-

Element Name and Occ #: [Element Name and Occurrence Number]. The Element is the name of the rare feature. For plant and animal species records, this field holds the scientific name followed by the common name in parentheses; for all other elements (such as native plant communities, which have no scientific name) it is solely the element name. Native plant community names correspond to Minnesota's Native Plant Community Classification (Version 2.0). The Occurrence Number, in combination with the Element Name, uniquely identifies each record.

EO Data: [Element Occurrence Data]. For species elements, this field contains data collected on the biology of the Element Occurrence* (EO), including the number of individuals, vigor, habitat, soils, associated species, peculiar characteristics, etc. For native plant community elements, this field is a summary text description of the vegetation of the EO, including structure (strata) and composition (dominant/characteristic species), heterogeneity, successional stage/dynamics, any unique aspects of the community or additional noteworthy species (including animals). Note that this is a new field and it has not been filled out for many of the records that were collected prior to conversion to the new database system. Some of the information meeting the field definition may be found in the General Description field.

EO ID#: [Element Occurrence Identification Number]. Unique identifier for each Element Occurrence record.

EO Rank: [Element Occurrence Rank]. An evaluation of the quality and condition of an Element Occurrence (EO) from A (highest) to D (lowest). Represents a comparative evaluation of: 1) quality as determined by representativeness of the occurrence especially as compared to EO specifications and including maturity, size, numbers, etc. 2) condition (how much has the site and the EO itself been damaged or altered from its optimal condition and character). 3) viability (the long-term prospects for continued existence of this occurrence - used in ranking species only). EO Ranks are assigned based on recent fieldwork by knowledgeable individuals.

Extent Known?: A value that indicates whether the full extent of the Element is known (i.e., it has been determined through field survey) at that location. If null, the value has not been determined.

-F-

Federal Status: Status of species under the U.S. Endangered Species Act: LE = endangered; LT = threatened; LE,LT = listed endangered in part of its range, listed threatened in another part of its range; LT,PDL = listed threatened, proposed for delisting; C = candidate for listing. If null or "No Status" the species has no federal status.

First Observed Date: Date that the Element Occurrence was first reported at the site in format YYYY-MM-DD. A year followed by "Pre" indicates that the observed date was sometime prior to the date listed, but the exact date is unknown.

-G-

General Description: General description or word picture of the area where the Element Occurrence (EO) is located (i.e., the physical setting/context surrounding the EO), including a list of adjacent communities. When available, information on surrounding land use may be included. Note that the information tracked in this field is now more narrowly defined than it was in the old database system, and some of the information still in this field more accurately meets the definition of the new EO Data field. We are working to clean up the records so that the information in the two fields corresponds to the current field explanations described herein. Also note that the use of uppercase in sentences in this field is not significant but rather an artifact of transferring data from the old database system to the new system.

Global Rank: The global (i.e., range-wide) assessment of the relative rarity or imperilment of the species or community. Ranges from G1 (critically imperiled due to extreme rarity on a world-wide basis) to G5 (demonstrably secure, though perhaps rare in parts of its range). Global ranks are determined by NatureServe, an international network of natural heritage programs and conservation data centers.

-L-

Last Observed Date: Date that the Element Occurrence was last observed to be extant at the site in format YYYY-MM-DD.

Last Survey Date: Date of the most recent field survey for the Element Occurrence, regardless of whether it was found during the visit. If the field is blank, assume the date is the same as the Last Observed Date.

Location Description: County or Counties in which the Element Occurrence was documented followed by Township, Range, and Section information (not listed in any particular order). Each unique Township, Range, and Section combination is separated by a comma. In some cases, there are too many Township, Range, and Section combinations to list in the field, in which case, the information will be replaced with, "Legal description is too lengthy to fit in allotted space".

-M-

Managed Area(s): Name of the federally, state, locally, or privately managed park, forest, refuge, preserve, etc., containing the occurrence, if any. If this field is blank, the element probably occurs on private land. If "(Statutory Boundary)" occurs after the name of a managed area, the location may be a private inholding within the statutory boundary of a state forest or park.

MN Status: [Minnesota Status]. Legal status of plant and animal species under the Minnesota Endangered Species Law: END = endangered; THR = threatened; SPC = special concern; NON = tracked, but no legal status. Native plant communities, geological features, and colonial waterbird nesting sites do not have any legal status under the Endangered Species Law and are represented by a N/A.

-N-

NPC Classification (v1.5): Native plant community name in Minnesota's Native Vegetation: A Key to Natural Communities (Version 1.5). This earlier classification has been replaced by Minnesota's Native Plant Community Classification (Version 2.0).

-O-

Observed Area: The total area of the Element Occurrence, in acres, which is measured or estimated during fieldwork. If null, the value has not been determined.

Ownership Type: Indicates whether the land on which the Element Occurrence was located was publicly or privately owned; for publicly owned land, the agency with management responsibility is listed, if known.

-S-

Site Name: The name of the site(s) where the Element Occurrence is located. Sites are natural areas of land with boundaries determined and mapped according to biological and ecological considerations.

Survey Site #/Name: The name of the survey site, if applicable, where the Element Occurrence is located. Survey sites are sites that provide a geographic framework for recording and storing data, but their boundaries are not based on biological and ecological considerations. Minnesota County Biological Survey site numbers, if applicable, are also listed in this field.

Survey Type: Information on the type of survey used to collect information on the Element Occurrence.

Surveyor(s): Name(s) of the person(s) that collected survey information on the Element Occurrence.

State Rank: Rank that best characterizes the relative rarity or endangerment of the taxon or plant community in Minnesota. The ranks do not represent a legal status. They are used by the Minnesota Department of Natural Resources to set priorities for research, inventory and conservation planning. The state ranks are updated as inventory information becomes available. S1 = Critically imperiled in Minnesota because of extreme rarity or because of some factor(s) making it especially vulnerable to extirpation from the state. S2 = Imperiled in Minnesota because of rarity or because of some factor(s) making it very vulnerable to extirpation from the state. S3 = Vulnerable in Minnesota either because rare or uncommon, or found in a restricted range, or because of other factors making it vulnerable to extirpation. S4 = Apparently secure in Minnesota, usually widespread. S5 = Demonstrably secure in Minnesota, essentially ineradicable under present conditions. SH = Of historical occurrence in the state, perhaps having not been verified in the past 20 years, but suspected to be still extant. An element would become SH without the 20-year delay if the only known occurrences in the state were destroyed or if it had been extensively and unsuccessfully looked for. SNR = Rank not yet assessed. SU = Unable to rank. SX = Presumed extinct in Minnesota. SNA = Rank not applicable. S#S# = Range Rank: a numeric range rank (e.g., S2S3) is used to indicate the range of uncertainty about the exact status of the element. S#B, S#N = Used only for migratory animals, whereby B refers to the breeding population of the element in Minnesota and N refers to the non-breeding population of the element in Minnesota.

-V-

Vegetation Plot: Code(s) for any vegetation plot data that have been collected within this Element Occurrence (i.e., either Releve Number or the word "RELEVE" indicates that a releve has been collected).

* Element Occurrence – an area of land and/or water in which an Element (i.e., a rare species or community) is, or was, present, and which has practical conservation value for the Element as evidenced by potential continued (or historical) presence and/or regular recurrence at a given location. Specifications for each species determine whether multiple observations should be considered 1 Element Occurrence or 2, based on minimum separation distance and barriers to movement.

Data Security

Locations of some rare features must be treated as sensitive information because widespread knowledge of these locations could result in harm to the rare features. For example, wildflowers such as orchids and economically valuable plants such as ginseng are vulnerable to exploitation by collectors; other species, such as bald eagles, are sensitive to disturbance by observers. For this reason, we prefer that publications not identify the precise locations of vulnerable species. We suggest describing the location only to the nearest section. If this is not acceptable for your purposes, please call and discuss this issue with the Endangered Species Environmental Review Coordinator at (651) 259-5109.

NATURAL HERITAGE INFORMATION SYSTEM (NHIS) DATA REQUEST FORM

Please read the instructions on page 3 before filling out the form. Thank you!

WHO IS REQUESTING THE INFORMATION?

Name and Title Amanda Ratliff, Regional Environmental Officer

Agency/Company FEMA

Mailing Address 536 South Clark Street, 6th Floor Chicago Illinois 60605
(Street) (City) (State) (Zip Code)

Phone 312-408-5440 e-mail amanda.ratliff@dhs.gov Responses will be sent via email. If you prefer US Mail check here:

THIS INFORMATION IS BEING REQUESTED FOR A:

- Federal EA State EAW PUC Site Application Watershed Plan
- Federal EIS State EIS Local Government Permit Research Project
- NEPA Checklist AUAR
- Other (describe) _____

INFORMATION WE NEED FROM YOU:

- 1) Enclose a map of the project boundary/area of interest (topographic maps or aerial photos are preferred).
- 2) Please provide a GIS shapefile* (NAD 83, UTM Zone 15N) of the project boundary/area of interest.
- 3) List the following locational information* (attach additional sheets if necessary):

For Agency Use: Region / MCBS Status	County	Township #	Range #	Section(s) (please list all sections)	For Agency Use: TRS Confirmed <input type="checkbox"/>
	Anoka	N/A	N/A	17, UTM zone 15 (X,Y) 472594 , 5002761	

- 4) Please provide the following information (attach additional sheets if necessary):

Project Name: WCCO Transmitter Site

Project Proposer: FEMA

Description of Project (including types of disturbance anticipated from the project):

Replace an existing UST with a new 12,000-gallon UST, and replacement of the ancillary fuel system at the WCCO transmitter facility. The new UST will be located north of the existing UST, approximately 14 feet below ground surface (bgs). The new generator building addition will be located west of the current building as shown on attached figure, and is 18 feet by 16 feet in size. The ground disturbance anticipated to be necessary for the installation of the Proposed Action will total approximately 2,540 square feet, which includes the tank basins and associated pipe trenching.

Describe the existing land use of the project site. What types of land cover/habitat will be impacted by the proposed project?
Previously disturbed cleared land within the existing WCCO transmitter facility property.

List any waterbodies (e.g., rivers, intermittent streams, lakes, wetlands) that may be affected by the proposed project, and how they may be impacted (e.g., dewatering, discharge, riverbed disturbance).
No waterbodies located in the immediate vicinity. No waterbodies are expected to be impacted or disturbed.

To your knowledge, has the project undergone a previous Natural Heritage review? If so, please list the correspondence #: ERDB # _____. How does this request differ from the previous request (e.g., change in scope, change in boundary, project being revived, project expansion, different phase)?
No previous review known.

To your knowledge, have any native plant community or rare species surveys been conducted within the site? If so, please list:
No previous surveys known.

List any DNR Permits or Licenses that you will be applying for or have already applied for as part of this project:
No DNR permits have been applied for.

INFORMATION WE PROVIDE TO YOU:

- 1) The response will include a Natural Heritage letter. If applicable, the letter will discuss potential impacts to rare features.
 Check here if this information is being requested for a formal environmental review document (e.g., EAW, EIS) and your company/agency has a staff ecologist who will be making the impact determination and you do not want DNR staff to provide any interpretation of impacts.
- 2) The response will also include an Index Report of known aggregation sites and known occurrences of federally and state-listed plants and animals* within an approximate one-mile radius of the project boundary/area of interest.
 Check here if you would also like geologic features and rare species with no legal status included in the report.
- 3) If desired, a Detailed Report that contains more information on each occurrence can be obtained. Please note that the Detailed Report may contain specific location information that is protected under *Minnesota Statutes*, section 84.0872, subd. 2, and, as such, the Detailed Report may not be included in any public document (e.g., an EAW). The Index Report and Natural Heritage letter can be included in any public environmental review document.
 Check here if you would also like to receive a Detailed Report.

FEES / TURNAROUND TIME

There is a fee* for this service. Requests generally take 3-4 weeks from date of receipt to process, and are processed in the order received. Rush requests* are processed in 2 weeks or less if workloads allow, but are not guaranteed.

- Check here to RUSH this request. You will be charged an additional \$50.

I have read the entire form, and the information supplied above is complete and accurate. I understand that material supplied to me from the Minnesota Natural Heritage Information System is copyrighted and that I am not permitted to reproduce or publish any of this copyrighted material without prior written permission from the Minnesota DNR. Further, if permission to publish is given, I understand that I must credit the Minnesota Division of Ecological Resources, Minnesota Department of Natural Resources, as the source of the material.

Chicago, IL 60605

RE: WCCO Transmitter Site -- replacement of existing underground storage tank and generator equipment with new underground storage tank and equipment
Coon Rapids, Anoka County
SHPO Number: 2009-1893

Dear Ms. Ratliff:

Thank you for the opportunity to review and comment on the above project. It has been reviewed pursuant to the responsibilities given the State Historic Preservation Officer by the National Historic Preservation Act of 1966 and the Procedures of the Advisory Council on Historic Preservation (36CFR800).

Based on available information, we conclude that **no properties** listed on or eligible for listing on the National Register of Historic Places will be affected by this project

Please contact our Compliance Section at (651) 259-3455 if you have any questions regarding our review of this project.

Sincerely,

A handwritten signature in black ink, appearing to read 'Britta L. Bloomberg'.

**Re: Request for Project Review – Primary Entry Point Administrative Council –
Replace Existing Underground Storage Tank and Generator Equipment with New
Underground Storage Tank and Equipment – WCCO Transmitter Site Coon Rapids,
MN**

Dear Ms. Bloomberg:

The Federal Emergency Management Agency (FEMA) is re-submitting a request for project review under Section 106 of the National Historic Preservation Act of 1966 for the WCCO Transmitter Site Environmental Assessment that was previously submitted by Terracon Consulting Engineers on March 26, 2009. The original consultation request failed to disclose this activity as a federally funded activity.

The proposed action will include the replacement of an existing underground storage tank (UST) with a new 12,000 gallon, double-walled fiberglass reinforced plastic UST with automatic tank monitoring and leak protection equipment, and replacement of the ancillary fuel system. A new electric generator will be installed at the site inside an addition to the existing generator building. The new UST will be located north of the existing UST and the new addition to the generator building will be located west of the current building. The proposed action is located at 3237 Coon Rapids Boulevard, Coon Rapids, Minnesota (latitude/longitude).

A project description and exhibits including a USGS map, an aerial photograph, proposed schematics, and site photographs are attached. Please review and provide comments to me on the impacts to historical resources at the letterhead address. If you have any questions or require additional information, please call me at (312) 408-5440 or email me at amanda.ratliff@dhs.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "A. Ratliff", written over a white background.

Attention: Mr. Dennis Gimmestad, Government Programs & Compliance Officer

Re: WCCO Transmitter Site
Applicant Name: Primary Entry Point Administrative Council, Inc.
3237 Coon Rapids Boulevard
Coon Rapids, Anoka County, Minnesota
Terracon Project No. 25089063

Dear Mr. Gimmestad:

Primary Entry Point Administrative Council, Inc. (PEPAC) and Federal Emergency Management Agency (FEMA) are proposing to expand an existing electrical generator room and decommission an existing fuel system with the installation of a new 12,000-gallon diesel underground storage tank (UST) and auxiliary fuel system at the WCCO tower facility located at 3237 Coon Rapids Boulevard, Coon Rapids, Anoka County, Minnesota. In accordance with the National Environmental Policy Act of 1969, the Council of Environmental Quality (CEQ) regulations implementing NEPA (40 Code of Federal Regulations [CFR] Parts 1500-1508), and FEMA regulations for NEPA compliance (44 CFR Part 10), Terracon is compiling an Environmental Assessment to fully understand and consider the environmental consequences of the proposed project.

In order to satisfy Section 106 requirements of the National Historic Preservation Act of 1966 (NHPA), Terracon requested a search of the Minnesota Historical Society's files regarding the presence of previously known archeological sites and historic properties in the vicinity of the site. According to the file review results, no archeological sites were identified within the proposed site's section, township, and range. The database search identified the Aranda Giddings Farmstead within the site's search area. Complete address information for this historic property was not included in the database results. Terracon requests a review of the proposed site plans (attached) by the Minnesota SHPO to determine if the PEPAC proposed action will adversely impact archeological and/or historic architectural properties in the area. Your response is sought in compliance with Section 106 of the NHPA.

Terracon is submitting this letter, on behalf of PEPAC, to seek a letter of no effect or no adverse effect. Your confirmation on this matter would be greatly appreciated.

Please feel free to contact our office if you have any questions concerning this project.

Sincerely,
TERRACON

Subject: RE: file search request

THIS EMAIL IS NOT A PROJECT CLEARANCE.

This message simply reports the results of the cultural resources database search you requested. The database search produced results for only previously known archaeological sites and historic properties. Please read the note below carefully.

No archaeological sites were identified in a search of the Minnesota Archaeological Inventory and Historic Structures Inventory for the search area requested. A report containing the historic properties identified is attached.

The result of this database search provides a listing of recorded archaeological sites and historic architectural properties that are included in the current SHPO databases. Because the majority of archaeological sites in the state and many historic architectural properties have not been recorded, important sites or structures may exist within the search area and may be affected by development projects within that area. Additional research, including field survey, may be necessary to adequately assess the area's potential to contain historic properties.

If you require a comprehensive assessment of a project's potential to impact archaeological sites or historic architectural properties, you may need to hire a qualified archaeologist and/or historian. If you need assistance with a project review, please contact Kelly Gregg-Johnson in Review and Compliance @ 651-259-3455 or by email at kelly.greggjohnson@mnhhs.org.

The Minnesota SHPO Survey Manuals and Database Metadata and Contractor Lists can be found at <http://www.mnhhs.org/shpo/survey/inventories.htm>.

SHPO research hours are 8:00 AM – 4:00 PM Tuesday-Friday.

The Office is closed on Mondays.

file search request

From: Hupp, Susan D. [mailto:sdhupp@terracon.com]
Sent: Friday, April 17, 2009 11:22 AM
To: Cinadr, Thomas
Subject: file search request

Tom,

Thanks for your help over the phone this morning. As we discussed, I need a file search conducted for historic properties for the following location:

Section 17, Township 31 North, and Range 24 West

I look forward to receiving this file search next week. Have a good weekend,

RECORD OF CONVERSATION

Project:	WCCO Transmitter Site	Date:	5/27/09
Project Number:	25089063	Time:	9:30 AM
Terracon Representative:	Susan Hupp	Page:	1 of 1

Person Calling:	Tom McCauley
Agency:	White Earth Reservation Tribal Council
Location:	White Earth, Minnesota
Phone Number:	Not given

Conversation: Mr. McCauley contacted Terracon in response to the consultation follow-up letter dated May 22, 2009. Mr. McCauley stated that his database does not keep track of sites of historical and/or archeological significance for Anoka County, Minnesota. For that reason, Mr. McCauley stated that he is not able to comment on the WCCO Transmitter Site project, and wished us luck in the future with our project.

Date: May 27, 2009

Project #: WCCO Transmitter Site, Coon Rapids, MN
Project 25089063

Booshoo,

The Ketegitigaaning Ojibwe Nation THPO (Lac Vieux Desert Chippewa) received your requests for comments or interest concerning the National Historic Preservation Act, Section 106 request for review and comment to the effect on historic and cultural sites within the proposed project area. The LVD Tribal Historic Preservation Office has no interests documented at this time in the proposed project areas. It is LVD's belief that many prehistoric sites and Indian historic sites in the area have not yet been identified or documented. LVD is among the many Tribes initiating the process of assisting in this endeavor. LVD urges you to consult other Indian Tribes in your immediate area that may have interests in your project area, if you have not already done so.

If the scope of work changes in any way, or if artifacts or human remains are discovered, please notify LVD immediately so we can assist in making an appropriate determination. LVD urges you to consult other Indian Tribes in your immediate area that may have interests in your project area, if you have not already done so.

Please forward any future request for review of historic and cultural properties according to the National Historic Preservation Act Section 106 to giiwegiizhigookway Martin, Officer, Tribal Historic Preservation Office. Please keep us informed of future projects as LVD plans to increase our efforts to identify and document sites in the area.

Miigwetch,

/s/ *Giiwegiizhigookway Martin*

RE: **Proposed expansion of an existing generator room and decommissioning of an existing fuel system with the installation of a new 12,000-gallon diesel UST**
WCCO Transmitter Site, Coon Rapids, Anoka County, Minnesota
LL-THPO Number: 09-091-NCRI

Dear Ms. Hupp:

Thank you for the opportunity to comment on the above-referenced project. It has been reviewed pursuant to the responsibilities given the Tribal Historic Preservation Officer (THPO) by the National Historic Preservation Act of 1966, as amended in 1992 and the Procedures of the Advisory Council on Historic Preservation (38CFR800).

I have reviewed the documentation; after careful consideration of our records, I have determined that the Leech Lake Band of Ojibwe does not have any concerns regarding sites of religious or cultural importance in this area.

Should any human remains or suspected human remains be encountered, all work shall cease and the following personnel should be notified immediately in this order: County Sheriff's Office and Office of the State Archaeologist. If any human remains or culturally affiliated objects are inadvertently discovered this will prompt the process to which the Band will become informed.

Please note: The above determination does not "exempt" future projects from Section 106 review. In the event of any other tribe notifying us of concerns for a specific project, we may re-enter into the consultation process.

You may contact me at (218) 335-2940 if you have questions regarding our review of this project. Please refer to the LL-THPO Number as stated above in all correspondence with this project.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Gina M. Lemon'.

Tribal Consultation Request
Applicant Name: Primary Entry Point Administrative Council, Inc.
Site Name: WCCO Transmitter Site
3237 Coon Rapids Boulevard
Coon Rapids, Anoka County, Minnesota
Terracon Project No. 25089063

Dear Mr. McCauley:

Our client, Primary Entry Point Administrative Council, Inc. (PEPAC), is proposing to expand an existing generator room and decommission an existing fuel system with the installation of a new 12,000-gallon diesel underground storage tank (UST) and auxiliary fuel system at the WCCO tower facility located at 3237 Coon Rapids Boulevard, Coon Rapids, Anoka County, Minnesota (Proposed Action). In accordance with the National Environmental Policy Act (NEPA), PEPAC is required to evaluate the potential environmental impacts of their facilities and operations. The Proposed Action's location is at township 31 north, range 24 west, section 17, longitude W93° 20' 50" and latitude N45° 10' 31".

The Native American Graves Protection and Repatriation Act (NAGPRA) Native American Consultation Database identified the White Earth Reservation Tribal Council as a tribal entity that may attach religious and cultural significance to Historic Properties that may be affected by the proposed above referenced project in Anoka County, Minnesota. We are requesting your comments on the Proposed Action pursuant to Section 106 of the National Historic Preservation Act, for inclusion in the Environmental Assessment that we are conducting.

For your convenience, a suggested response letter is attached. Please respond to this letter within 30 days. Thank you for your response in this matter. If you wish to respond by email, I may be reached at sdhupp@terracon.com. If you have any questions, please do not hesitate to call our office at (303) 423-3300.

Sincerely,

Susan Hupp

Re: Environmental Assessment
Tribal Consultation Request
Applicant Name: Primary Entry Point Administrative Council, Inc.
Site Name: WCCO Transmitter Site
3237 Coon Rapids Boulevard
Coon Rapids, Anoka County, Minnesota
Terracon Project No. 25089063

Dear Mrs. Rachal:

Our client, Primary Entry Point Administrative Council, Inc. (PEPAC), is proposing to expand an existing generator room and decommission an existing fuel system with the installation of a new 12,000-gallon diesel underground storage tank (UST) and auxiliary fuel system at the WCCO tower facility located at 3237 Coon Rapids Boulevard, Coon Rapids, Anoka County, Minnesota (Proposed Action). In accordance with the National Environmental Policy Act (NEPA), PEPAC is required to evaluate the potential environmental impacts of their facilities and operations. The Proposed Action's location is at township 31 north, range 24 west, section 17, longitude W93° 20' 50" and latitude N45° 10' 31".

The Native American Graves Protection and Repatriation Act (NAGPRA) Native American Consultation Database identified the Sokaogon Chippewa (Mole Lake) Community of Wisconsin as a tribal entity that may attach religious and cultural significance to Historic Properties that may be affected by the proposed above referenced project in Anoka County, Minnesota. We are requesting your comments on the Proposed Action pursuant to Section 106 of the National Historic Preservation Act, for inclusion in the Environmental Assessment that we are conducting.

For your convenience, a suggested response letter is attached. Please respond to this letter within 30 days. Thank you for your response in this matter. If you wish to respond by email, I may be reached at sdhupp@terracon.com. If you have any questions, please do not hesitate to call our office at (303) 423-3300.

Sincerely,

Susan Hupp
Staff Environmental Scientist

Re: Tribal Consultation Response Letter
Applicant Name: Primary Entry Point Administrative Council, Inc.
Site Name: WCCO Transmitter Site
3237 Coon Rapids Boulevard
Coon Rapids, Anoka County, Minnesota
Terracon Project No. 25089063

Dear Ms. Hupp:

I have reviewed your Consultation Request under Section 106 of the National Historic Preservation Act regarding the Proposed Action referenced above and offer the following response as indicated by the box that is checked and my initials.

- NO INTEREST _____ (Initials of duly authorized Tribal official)
I have determined that there is not a likelihood of eligible properties of religious and cultural significance to the Sokaogon Chippewa (Mole Lake) Community of Wisconsin in the Proposed Action construction area.
- REQUEST ADDITIONAL INFORMATION _____ (Initials of duly authorized Tribal official)
I require the following additional information in order to provide a finding of effect for this proposed undertaking: _____
- NO EFFECT _____ (Initials of duly authorized Tribal official)
I have determined that there are no properties of religious and cultural significance to the Apache Tribe that are listed on the National Register within the area of potential effect or that the proposed project will have no effect on any such properties that may be present.
- NO ADVERSE EFFECT _____ (Initials of duly authorized Tribal official)
I have identified properties of cultural and religious significance within the area of effect that I believe are eligible for listing in the National Register, for which there would be no adverse effect as a result of the proposed tower construction project.
- ADVERSE EFFECT _____ (Initials of duly authorized Tribal official)
I have identified properties of cultural and religious significance within the area of potential effect that are eligible for listing in the National Register. I believe the proposed communication tower construction project would cause an adverse effect on these properties.
