

2011 National Evaluation Panel Project Factors

| National Evaluation Factor | Available Points |
|---|-------------------------|
| The application identifies sufficient technical and managerial staff and resources to successfully implement this project. | 200 |
| The application adequately describes how the costs and schedule will be managed and how successful performance will be ensured. | 300 |
| Project sub-application demonstrates that the proposed mitigation activity reduces the overall risks to the population and structures. | 250 |
| This project incorporates state, Indian tribal, private, and local community partnerships that will enhance its outcome. | 50 |
| The application describes outreach activities appropriate to the project that advance mitigation (e.g., signs, press releases, success stories, developing package to share with other communities, and losses avoided analysis). The completed project will serve as a model for other communities (i.e., the applicant intends to mentor other communities, Indian tribes or states and/or intends to prepare a description of the process followed in this project so that others may learn from the example). | 50 |
| The project offers long-term financial and social benefits. | 100 |
| The project protects a critical facility | 50 |
| HUD Sustainable Housing and Communities Initiative | |
| The subapplicant has identified sustainable principles in their project application. | N/A |
| The subapplicant has identified how the proposed activity relates to the HUD Sustainable Housing and Community initiative. | N/A |
| The subapplicant has described how the HUD Sustainable Housing and Community initiative relates to the proposed activity. | N/A |
| Total Points Available | 1000 |
