

Affected Environment/ Resource Area	Impacts				Mitigation	Agency Coordination/Permit s	Comments
	Negligible	Minor	Moderate	Major			
Geology & Soils	X						The implementation of construction BMPs will reduce sedimentation.
Hydrology & Floodplains (Executive Order 11988)	X						Site is outside designated FEMA 500 year floodplain according to FEMA floodplain maps.
Wetlands (Executive Order 11990)	X						The site does not contain jurisdictional wetlands.
Water Quality		X			Implement construction BMPs. Install silt fences/straw bales to reduce soil erosion and sedimentation. Construction contractor to cover any fill stored on site and implement requirements of NPDES stormwater discharge permit, if required.	NPDES stormwater permit or waiver to be obtained by construction contractor.	The drainage system will be required to meet local and county requirements,
Air Quality		X			Temporary roads should be constructed of permeable asphalt-like millings, gravel, or similar material to reduce airborne particles. Periodic wetting during construction and home removal would reduce fugitive dust.		County air shed is in attainment for criteria pollutants per the Clean Air Act.
Vegetation & Wildlife	X						The site would be seeded and /or used by the landowner in a manner consistent with applicable land use approvals after the temporary housing is removed.
Threatened & Endangered (Endangered Species Act Section 7)	X					USFWS (6/14/11) and MDC (6/15/11) determinations of "No Effect."	
Cultural Resources (National Historic preservation Act Section 106)	X				If unanticipated historic or cultural materials are discovered during construction, construction activities shall immediately cease within 100 feet of the materials until their cultural affiliation and ultimate disposition are determined in consultation with the Kansas SHPO, FEMA Environmental Liaison Officer and other interested parties.	SHPO determination of "No Effect" (6/14/11).	
Socioeconomic/Recreation	X						
Environmental Justice	X
