Re: Monroe County School District Temporary School at Smithland, Ms

Date: July 6i, 2011

As provided in Appendix C Programmatic Allowances of the Programmatic Agreement between FEMA and the Mississippi Department of Archives and History (MSDAH), "projects that are documented by FEMA as being performed in areas that have been archaeologically surveyed after 1992 with no recorded eligible archaeological site(s), or that are located in previously disturbed soils, do not require review by SHPO/THPO or Tribes". Per review of the MSDAH architectural and archaeological inventory which I accessed on June 27, 2011 the project area was surveyed in 1998 by professional archaeologist Jay Johnson (ref. 98-188). The survey included screened shovel tests. No sites were found, and the area was recommended as cleared of significant cultural resources. Accordingly, FEMA has determined that construction of the temporary school facility will have no effect on any properties listed in or eligible for listing in the National Register of Historic Places. No further Section 106 consultation will be conducted.
