

FEMA

**FINDING OF NO SIGNIFICANT IMPACT
CORYELL COUNTY COMMUNICATION TOWER
GATESVILLE, TEXAS
HOMELAND SECURITY GRANT PROGRAM
PROJECT # 2009-SS-T9-0064 (10691)**

BACKGROUND

In accordance with 44 Code of Federal Regulations (CFR) for the Federal Emergency Management Agency (FEMA), Subpart B, Agency Implementing Procedures, Part 10.9, an Environmental Assessment (EA) has been prepared pursuant to Section 102 of the National Environmental Policy Act (NEPA) of 1969, as implemented by the regulations promulgated by the President's Council on Environmental Quality (CEQ; 40 CFR Parts 1500-1508). This EA informed FEMA's decision on whether to prepare an Environmental Impact Statement (EIS) or a Finding of No Significant Impact (FONSI).

The proposed project is to construct a 460-foot guyed wire telecommunications tower that will be located at 31.4458444 N Latitude and 97.7038972 W Longitude, approximately 600 feet south of Rocky Road in Gatesville, Coryell County, Texas. The Texas Department of Public Safety has been awarded funding under the 2009 Homeland Security Grant Program (HSGP) to fund the Proposed Action. The funding grant number is 2009-SS-T9-0064 (10691). This program provides funding to public safety agencies to construct and implement equipment and programs that will increase and protect critical communications infrastructure in the event of a natural disaster, terrorism event, as well as during routine operations.

Two project alternatives were considered in this EA: 1) No Action; and 2) Construction of a 460-foot guyed wire telecommunications tower (Proposed Action). Under the No Action alternative, Coryell County would continue to rely on existing communication infrastructure which does not provide sufficient coverage throughout the county. This would leave emergency response unchanged and results in a lower level of overall public safety because Coryell County and the surrounding counties emergency responders would remain at risk due to lack of radio coverage. Lack of adequate communication directly impacts command, control, rescue, event analysis, and other critical operations. The No Action Alternative would not address the needs for Coryell County and surrounding areas.

The Proposed Action will consist of the construction of a 460-foot guyed wire telecommunications tower. The Proposed Action site will be located on a 0.61-acre parcel of land that is currently developed with a 280-foot guy-wire tower, two equipment shelters, a propane tank, and a standalone emergency generator. The existing 280-foot telecommunications tower, one of the equipment shelters and the propane tank will be removed, and the existing propane-powered generator will be replaced with a new diesel-powered emergency generator. The proposed 460-foot tower will be constructed on a 10-foot by 10-foot area adjacent to the

remaining 10-foot by 12-foot equipment shelter. Anchors will be equally spaced at three places to provide for guyed wires. There will be three (3) sets of six (6) guy wires for a total of 18 wires. The tower's surface impact area (including the guy wire anchors) will be less than 0.10 acre.

A public notice was posted in the Gatesville Messenger newspaper on April 14, 2012, and the draft EA was made available for comment at the City of Gatesville Public Library, located at 111 North 8th Street, Gatesville, TX; the Coryell County Courthouse, located at 620 E. Main Street, Gatesville, TX; and on the FEMA website for a 15-day public comment period. No comments were received from the public during the 15-day comment period.

FINDINGS

The Proposed Action as described in the EA will not adversely impact geology, soil, seismicity, water resources, wetlands, floodplains, coastal resources, wildlife and fish, threatened or endangered species, migratory birds, historic properties, American Indian or religious sites, air quality, noise, infrastructure, utilities, traffic, waste management or socioeconomic resources. Positive long-term impacts to socioeconomic and environmental justice are anticipated since the project will provide better communication between emergency and first responders in the event of an emergency, natural disaster or terrorist action. During the construction period, short-term impacts to soils, air quality, water quality, waste management, noise, traffic, and health and safety are anticipated. All populations, including minority and low-income populations, will benefit from the Proposed Action. All adverse impacts require conditions to minimize and mitigate impacts to the proposed project site and surrounding areas.

CONDITIONS

The following conditions must be met as part of this project. Failure to comply with these conditions may jeopardize the receipt of federal funding.

1. This review does not address all federal, state and local requirements. Acceptance of federal funding requires recipient to comply with all federal, state and local laws. Failure to obtain all appropriate federal, state and local environmental permits and clearances may jeopardize federal funding.
2. Excavated soil and waste materials must be managed and disposed of in accordance with applicable local, state, and federal regulations. If contaminated materials are discovered during the construction activities, the work will cease until the appropriate procedures can be implemented and permits obtained. Any hazardous materials discovered, generated, or used during construction will be handled and disposed of in accordance with applicable local, state, and federal regulations.

3. Construction will take place during daytime hours and equipment will meet all local, state, and federal noise regulations.
4. Construction contractors will be required to comply with the federal and state health and safety regulations.
5. In the event that archeological deposits, including any Native American pottery, stone tools, bones, or human remains, are uncovered, the project shall be halted and the applicant shall stop all work immediately in the vicinity of the discovery and take reasonable measures to avoid or minimize harm to the finds. All archeological findings will be secured and access to the sensitive area restricted. The applicant will inform FEMA immediately and FEMA will consult with the State Historic Preservation Office (SHPO) or Tribal Historic Preservation Office (THPO) and Tribes and work in sensitive areas cannot resume until consultation is completed and appropriate measures have been taken to ensure that the project is in compliance with the National Historic Preservation Act (NHPA).
6. Any change to the approved scope of work will require re-evaluation for compliance with NEPA and other Laws and Executive Orders.

CONCLUSIONS

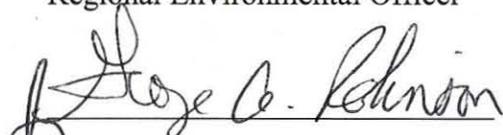

Based on the findings of the EA, coordination with the appropriate agencies, and adherence to the project conditions set forth in this FONSI, FEMA has determined that the proposed project qualifies as a major federal action that will not significantly affect the quality of the natural and human environment, nor does it have the potential for significant cumulative effects. As a result of this FONSI, an EIS will not be prepared (44 CFR Part 10.9) and the proposed project as described in the attached EA may proceed.
