

*Physical Security Enhancement
Scenario #1*

The Hawaii Port Authority is proposing upgrades to physical security at Warehouse #2 on South Aolele Street in Honolulu, HI. Six (6) panoramic cameras will be installed at the corners and central beams of the warehouse to enhance security in and around the warehouse facility. Several photographs are attached.

In addition, an electronic access control panel and alarm will be installed on a bollard 400 feet from the warehouse, requiring a total ground disturbance of approximately 400' x 3', at a depth of 12 - 16 inches required to trench for a utility connection. The control panel will be mounted on existing bollards measuring approximately 36" in height.
