

CALCULATING OVERTIME PAY

All salaries from A-1 to C-1 are calculated at time and one-half for overtime.

Example: \$21.51 regular hourly rate for C-1
 \$10.76 overtime rate for C-1
 \$32.27 time and one-half for C-1

Salaries between C-2 and D-1 will receive the capped amount at \$32.91 for overtime, and anyone above the D-2 will be paid the same as their regular hourly rate for overtime.

These figures change yearly with the cost of living increase.
