

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

- ZONE A: No base flood elevations determined.
- ZONE AE: Base flood elevations determined.
- ZONE AH: Flood depths of 1 to 3 feet (usually areas of ponding); base flood elevations determined.
- ZONE AD: Flood depths of 1 to 3 feet (usually shear flow or sloping terrain); average depths determined. For areas of minimal flat flooding; velocities also determined.
- ZONE ABB: To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.
- ZONE V: Coastal flood with velocity hazard (wave action); no base flood elevations determined.
- ZONE VE: Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X: Area of 500-year flood; area of 100-year flood with average depth of less than four or with drainage area less than 1 square mile; and areas protected by levees from 100-year flood.

OTHER AREAS

- ZONE X: Areas determined to be outside 500-year floodplain.
- ZONE D: Areas in which flood hazards are underdeveloped coastal barriers.

Identified 1981 (diagonal lines) / **Identified 1997** (cross-hatch) / **Observed Protected Areas** (stippled)

Coastal barrier areas are normally located within or adjacent to special flood hazard areas:

- Floodplain Boundary (dashed line)
- Floodway Boundary (dotted line)
- Zone D Boundary (dash-dot line)

Boundary Dividing Special Flood Hazard Zones and Boundary Dividing Areas of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones (solid line)

Base Flood Elevation Line: Elevation in Feet* (line with 'D' markers)

Cross Section Line (line with 'D' markers)

Base Flood Elevation in Feet Within Uniform Within Zone (line with 'D' markers)

Elevation Reference Mark (line with 'D' markers)

River Mile (line with 'D' markers)

*Referenced to the National Geodetic Vertical Datum of 1929

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all potential features outside Special Flood Hazard Areas. The community map repository should be consulted for more detailed data on BEs, and for any information on floodway determinations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AH, AD, AV, V, VE, and VE-1.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1:200 scale.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For adjoining panels, see separately printed Map Index.

MAP REPOSITORY
Department of Utilities 5770 Freppert Boulevard #100
Sacramento, California
(Maps available for reference only, not for distribution.)

INITIAL IDENTIFICATION:
JANUARY 15, 1975

FLOOD HAZARD BOUNDARY MAP REVISION:
DECEMBER 27, 1977

FLOOD INSURANCE RATE MAP EFFECTIVE:
SEPTEMBER 15, 1978

FLOOD INSURANCE RATE MAP REVISIONS:
SEPTEMBER 21, 1982 / FEBRUARY 4, 1988
NOVEMBER 15, 1989

Map revised July 6, 1998 to increase base flood elevations, to change special flood hazard areas and to incorporate previously issued letter of map revision.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 638-6620.

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and floodway boundaries have been determined, users are encouraged to consult the Flood Profiles and Floodway Data Tables contained within the Flood Insurance Study (FIS) report. That FIS report contains detailed information on BFEs shown on this map, please contact the Information Services Branch of the NCEM at (301) 713-3242 or visit their website at www.nce.gov. Map users should seek verification of non-NCEM elevation data presented in this FIS in conjunction with the data shown on the FIS.

Elevation Reference Marks (ERMs) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodway boundaries portrayed on this map. Users should be aware that these ERM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geodetic Survey (NGS) ERMs shown on this map, please contact the Information Services Branch of the NCEM at (301) 713-3242 or visit their website at www.nce.gov. Map users should seek verification of non-NGS ERM elevation data presented in this FIS in conjunction with the data shown on the FIS.

Coastal BFEs shown on this map apply only to landward of or National Geodetic Vertical Datum (NGVD). Users of this FIS should be aware that coastal flood elevations are also provided in the Summary of Stillwater Elevations table in the Summary of Stillwater Elevations community. Elevations shown in the Summary of Stillwater Elevations table should be used for construction, and/or floodplain management purposes when they are higher than the elevations shown on this FIS.
