

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or Floodway Boundaries have been determined, users are encouraged to consult the Flood Profile and Floodway Data Tables contained within the Flood Insurance Study (FIS) report that accompanies this FIS. Users should be aware that BFEs shown on this map represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. For construction and/or floodplain management purposes, users are encouraged to use the flood elevation data presented in the FIS in conjunction with the data shown on this FIS.

Elevation Reference Marks (ERM) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodway boundaries portrayed on this map. Users should be aware that these ERM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geodetic Survey (NGS) ERM's shown on this map, please contact the Information Services Branch of the NGS, at (301) 713-3242, or visit their website at www.ngs.noaa.gov. Map users should seek verification of non-NGS ERM monument elevations when using those elevations for construction or floodplain management purposes.

Coastal BFEs shown on this map apply only to areas of 0.1% National Geodetic Vertical Datum (NGVD). Users of this FIS should be aware that coastal flood elevations are also provided in the Summary of Significant Elevations table in the Flood Insurance Study report for this community. Elevations shown in the Summary of Significant Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIS.

This area protected from the one percent annual chance (100-year) flood by levees, dikes, or other structures subject to possible failure or overtopping during larger floods.

This area protected from the one percent annual chance (100-year) flood by levees, dikes, or other structures subject to possible failure or overtopping during larger floods.

This area protected from the one percent annual chance (100-year) flood by levees, dikes, or other structures subject to possible failure or overtopping during larger floods.

This area protected from the one percent annual chance (100-year) flood by levees, dikes, or other structures subject to possible failure or overtopping during larger floods.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDED BY 100-YEAR FLOOD

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponding); base flood elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined. For areas of annual fan flooding, velocities also determined.
- ZONE APB** To be protected from 100-year flood by Federal Flood Protection System under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity hazard (wave action); no base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard (wave action); base flood elevations determined.

OTHER FLOOD AREAS

- ZONE X** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile; and areas protected by levees from 100-year flood.
- ZONE D** Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

- Identified 1983
- Identified 1990
- Other Protected Areas

Coastal barrier areas are normally located within or adjacent to special flood hazard areas.

OTHER AREAS

- ZONE X** Area determined to be outside 500-year floodplain.
- ZONE D** Areas in which flood hazards are undetermined.

FLOODWAY AREAS IN ZONE AE

- Floodplain Boundary
- Floodway Boundary
- Zone D Boundary
- Boundary Dividing Special Flood Hazard Zones and Recreational/Drinking Area of Outstanding Coastal Base Flood Elevations Within Special Flood Hazard Zones.
- Base Flood Elevation Line; Elevation in Feet
- Cross Section Line
- Base Flood Elevation in Feet Where Uniform Within Zone*
- Elevation Reference Mark
- RM 7x
- RM 1.5

*Referenced to the National Geodetic Vertical Datum of 1983

NOTES

This map is part of the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all potential building damage Special Flood Hazard Areas. The community map repository should be consulted for more detailed data (BFEs, etc.) and for any information on floodway designations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AH, APB, AO, AV, V, VE and VI-V5.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The boundaries were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway within a zone area may be too narrow to show. Refer to Floodway Data Table where floodway width is shown at 1200 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For adjoining panels, see separately printed Map Index.

MAP REPOSITORY
 Department of Public Works, 5775 Fremont Boulevard #100
 Sacramento, California
 (Maps available for reference only, not for distribution.)

INITIAL IDENTIFICATION:
 JANUARY 10, 1975

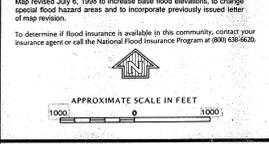

FLOOD HAZARD BOUNDARY MAP REVISION:
 DECEMBER 27, 1977

FLOOD INSURANCE RATE MAP EFFECTIVE:
 SEPTEMBER 15, 1978

FLOOD INSURANCE RATE MAP REVISIONS:
 SEPTEMBER 21, 1982 FEBRUARY 4, 1988
 NOVEMBER 15, 1989

Map revised July 6, 1998 to increase base flood elevations, to change special flood hazard areas and to incorporate previously issued letter of map revision.

To determine if flood insurance is available in the community, contact your insurance agent or call the National Flood Insurance Program at (800) 658-6624.
