HURRICANE RITA SURGE INUNDATION
and
ADVISORY BASE FLOOD ELEVATION MAP
Terrebonne Parish, Louisiana
Date of Event: September 24, 2005
Date of Map: February 23, 2006
Map Number: LA-Q101

Advisory Base Flood Elevations
This map shows Advisory Base Flood Elevations (ABFE's) developed by FEMA. Please see http://www.fema.gov/hazards/floods/recoverydata/ pdf/terrebonne_counter11-30-2005.pdf for more information on how they were determined.

Estimated Rita Surge Elevations
6 ft

Maps for advisory purposes only - Not for insurance rating purposes

Data Sources:
Jewett Imagery: USDA, National Agriculture Imagery Program, 2004
Jewett Data and Analysis: FEMA Flood Insurance Rate Maps (Terrebonne Parish), 1981-1982
High Water Marks: TR 94 (Identified and Surveyed by LECU, 2003)

For more information on these advisory maps, please see http://www.fema.gov/hazards/floods/recoverydata/la_tower_ahrm

For insurance rating purposes, refer to the currently effective Flood Insurance Rate Maps (FIRMs), available from your local government or the FEMA Map Service Center (1-800-358-9644 or http://msc.fema.gov).

Notes:
1. Measured in feet relative to the National Geodetic Vertical Datum of 1929 (NGVD 29). To convert from NGVD 29 to North American Vertical Datum of 1988 (NAVD 88), subtract 0.6 feet.
2. Range estimated from surveyed, surge only high water marks. Local survey effects (wave heights and wave runups) are not included in these elevations.
3. *Data selection (AFL, PHF, or PHF TS) shown applies in all jurisdictions located in the shaded zone, with zone boundaries collaboratively provided. These DFS reflect floodplain of 1 foot above current, Effective State Flood Elevations (EFEs), shown on each community's Flood Insurance Rate Map (FIRM).
4. In areas outside of the AFE zone, refer to the community's effective FIRM for additional flood hazard information, where applicable.
