Comments: The main building was constructed in 1967.
7/12/2006 - Historic review complete: the structure does not meet the 50-year-criterion, nor does it possess the level of exceptional importance required by Criteria consideration G of the National Register guidelines to be considered eligible for the National Register of Historic Places. Therefore, the proposed work will have no effect on historic properties. Scope of work indicates ground disturbing activities associated with the demolition and rebuild of the structure within its pre-disaster footprint. Ground disturbance will be minimal and limited to the replacement of the CMU block foundation piers. Upon consultation of SHPO data, there are no known archaeological sites within .5 miles of the project area. Demolition must follow the lower impact demolition stipulations & additional protocols which are attached. The stipulations and protocols should be explicit in the demolition contract. Failure to comply with these stipulations & additional protocols will jeopardize receipt of Federal funding. If during the course of work, archaeological artifacts (prehistoric or historic) or human remains are discovered, the applicant shall stop work in the vicinity of the discovery and take all reasonable measures to avoid or minimize harm to the finds. The applicant shall inform their Public Assistance (PA) contacts at FEMA, who will in turn contact FEMA Historic Preservation staff. The applicant will not proceed with work until FEMA Historic Preservation staff have completed consultation with the Louisiana State Historic Preservation Officer (SHPO). In addition, if unmarked graves are present, compliance with the Louisiana Unmarked Human Burial Sites Preservation Act (R.S. 8:671 ET SEQ.) is required. The applicant shall notify the law enforcement agency of the jurisdiction where the remains are located within twenty-four hours of the discovery. The applicant shall also notify FEMA and the Louisiana Unmarked Burial Sites Board (call the Louisiana Division of Archeology at 225-342-8170) within seventy-two hours of the discovery. If this scope of work and/or the footprint/location of the new building changes, this project will need to be resubmitted for further Section 106 review prior to ground disturbing activities taking place outside of the pre-disaster footprint of the building. -Katherine Zeringue, Historic Preservation Specialist/Archaeologist

Comments: See letter from Don Fairley to Mr. Russ Watson with USF&WS, dated 09/14/2005. Specifically, FEMA has determined that restoration projects funded with federal resources will not have adverse impacts on migratory birds or other fish and wildlife reserves. These determinations are based on the understanding that the conditions outlined in the Louisiana Endangered Species Summary are met.

Comments: 07/10/2006 - The Jefferson Parish is enrolled in the National Flood Insurance Program (NFIP), as of 10-01-71. Site is located within an "Ae" zone, area of 100-yr flooding, base flood elevation determined, as per Flood Insurance Rate Map (FIRM) panel number 22051C0045E, dated 03-01-84. Project is the replacement of building, equipment and components, as per 44 CFR 9.11, mitigation or minimization standards must be applied. Where possible, building contents, materials, and equipment (mechanical or electrical) must be elevated to or above advisory base flood elevations. In compliance with EO 11988, an 8-step process was completed and is attached. Per 44 CFR 9.12, applicant must publish a final public notice 15 days prior to the start of construction activities. Final public notice is to be forwarded to the LAGOHS/OEP and FEMA for inclusion in the permanent project files. A. Cramer FPM Specialist.

IV. Extraordinary Circumstances

Based on the review of compliance with other environmental laws and Executive Orders, and in consideration of other environmental factors, review the project for extraordinary circumstances.

* A "Yes" under any circumstance may require an Environmental Assessment (EA) with the exception of (ii) which should be applied in conjunction with controversy on an environmental issue. If the circumstance can be mitigated, please explain in comments. If no, leave blank.

Yes

- (i) Greater scope or size than normally experienced for a particular category of action
- (ii) Actions with a high level of public controversy
- (iii) Potential for degradation, even though slight, of already existing poor environmental conditions;
- (iv) Employment of unproven technology with potential adverse effects or actions involving unique or unknown environmental risks;
- (v) Presence of endangered or threatened species or their critical habitat, or archaeological, cultural, historical or other protected resources;
- (vi) Presence of hazardous or toxic substances at levels which exceed Federal, state or local regulations or standards requiring action or attention;
- (vii) Actions with the potential to affect special status areas adversely or other critical resources such as wetlands, coastal zones, wildlife refuge and wilderness areas, wild and scenic rivers, sole or principal drinking water aquifers;
- (viii) Potential for adverse effects on health or safety; and
- (ix) Potential to violate a federal, state, local or tribal law or requirement imposed for the protection of the environment.
- (x) Potential for significant cumulative impact when the proposed action is combined with other past, present and reasonably foreseeable future actions, even though the impacts of the proposed action may not be significant by themselves.
