Record of Environmental Consideration

See 44 Code of Federal Regulation Part 10.

Project Name/Number: Mayors Office of Technology / PW 4018 Version 1

<u>Project Location</u>: 3rd Floor City Hall Data Center, New Orleans, Louisiana Orleans Parish (N29.5715, W-90.0461)

<u>Project Description</u>: Project activities include removing and replacing installing 125 KVA UPS system and replacing 12 APC 1400 VA Smart UPS systems. Hazard mitigation will be accomplished by moving the air conditioning unit into the hot spot and installing additional air flow panels to prevent 125 KVA UPS system from overheating.

<u>Documen</u>	tation Requirements
☐ No Docu	mentation Required (Review Concluded)
Preserva	rsion) All consultation and agreements implemented to comply with the National Historic ion Act, Endangered Species Act, and Executive Orders 11988, 11990 and 12898 are d and no other laws apply. (Review Concluded)
	ion) All applicable laws and executive orders were reviewed. Additional information for ce is attached to this REC.

	project meets the criteria for an Alternative Arrangement (Government and Court Administration of project. This project has conditions and requires mitigation under the other EHP laws which are listed

Comments: This project meets the criteria for an Alternative Arrangement (Government and Court Administration Buildings) type of project. This project has conditions and requires mitigation under the other EHP laws which are listed under the NEPA level of environmental review in the project worksheet. Any changes to this approved scope of work will require submission to, and evaluation and approval by, the state and FEMA prior to initiation of any work, for compliance with the national environmental policy act. The applicant is required to obtain and comply with all local, state and federal permits and requirements. Non-compliance with the requirements noted above may jeopardize the receipt of federal funding.

V. Environmental Review Project Conditions

Project Conditions:

- 1. Per 44 CFR 9.11 (d)(9), applicant must comply with minimization standards in the placement of building contents, materials and equipment by disaster proofing of the building and/or elimination of such future losses by relocation of those building contents, materials and equipment outside or above the base floodplain (advisory base flood elevations).
- 2. Unusable equipment, debris and material shall be disposed of in an approved manner and location. In the event significant items (or evidence thereof) are discovered during implementation of the project applicant shall handle, manage, and dispose of petroleum products, hazardous materials and/or toxic waste in accordance to the requirements and to the satisfaction of the governing local, state and federal agencies.
- 3. Removal and disposal of debris containing household hazardous waste and certain categories of liquid wastes must be performed in accordance with all applicable federal and state laws, regulations, executive orders and guidelines. Lac Title 33 Part vii requires that specified items, including lead acid batteries, used oil filters, used motor oil, scrap tires, cfc's (refrigerants), radioactive waste or regulated infectious wastes must be segregated from and excluded from non-hazardous debris collection, staging, processing and disposal sites. Failure to comply with applicable legal requirements in debris collection and/or disposal operations will jeopardize federal funding. The clean-up or restoration/repair of sites damaged as a result of such operations are ineligible for federal funding. Previously obligated funding is subject to de-obligation if a determination of ineligibility is made.
- 4. Mercury containing devices this project potentially involves the disposal of metallic mercury containing electronic devices. The applicant is responsible for ensuring that these devices are recovered, recycled, reused or sequestered in accordance with the Louisiana Department of Environmental Quality (LDEQ) "Declaration of Emergency; Mercury-containing Devices and Electronic Equipment as Universal Waste" letter dated October 3, 2005.

Monitoring Requirements: None
