

FEMA COVID-19 Update

Release Date: April 23, 2021

WASHINGTON -- FEMA has achieved President Biden's goal of administering 200 million shots in 100 days, seven days ahead of schedule.

FEMA remains committed to the equitable distribution of vaccines, ensuring everyone who wants a vaccine can get one. The agency continues working with state governments and partners to open additional federal community vaccination center pilot sites, which include federal support and supplemental vaccine allocations.

Currently, there are 34 active or temporarily closed federal community vaccination centers and 40 mobile pop-up centers in 28 states. Additionally, 10 mobile vaccination units are operating in Connecticut, Maine, Maryland, Nevada, New Mexico and Oregon, bringing vaccinations to hard-to-reach and high-risk populations who cannot access services from fixed sites. Two units in South Dakota are supporting the Indian Health Services mission to vaccinate tribal communities across the Great Plains. These centers and units have administered more than 3.8 million vaccinations. Since March 30, mobile units have delivered more than 18,400 vaccines to individuals.

On April 21, President Biden [announced a tax credit](#) for small and medium-sized businesses to fully offset the cost of paid leave for employees to get vaccinated and recover from any after-effects of vaccination. This tax credit will apply to nearly half of all private sector employees in America.

The Internal Revenue Service [created a fact sheet](#) and the Department of the Treasury has created a [snapshot](#) to educate employers on how to claim the paid sick leave credit on their quarterly tax filings.
