

Flood Risks After a Wildfire Increases the Need for Flood Insurance

Release Date: Jun 10, 2022

The Time to Purchase Flood Insurance is Now

Flooding is the nation's number one natural disaster. Yet statistics indicate most people ignore the threat and fail to buy flood insurance. FEMA is committed to building a culture of preparedness throughout our nation. Insurance is the first line of defense.

Ask your insurance agent about purchasing a policy through the National Flood Insurance Program (NFIP). If you don't have a provider, visit floodsmart.gov/flood-insurance-provider to be taken to a list of agencies offering flood insurance in New Mexico.

Premiums are based on specific characteristics that help identify the building's unique flood risk and associated premium. Characteristics include:

- Where the property is located
- How it is built
- What is built and covered (replacement cost and coverage).

Out-of-pocket expenses after a flood include insurance deductibles, evacuation costs, lodging, food, gas, and more. Flood insurance can make all the difference when disaster strikes. Properties located in high-risk areas have at least a one-in-four chance of flooding during a 30-year mortgage. Payments are calculated on the value of the structure minus the depreciation at the time of the disaster.

In addition to coverage for structures, NFIP offers content coverage.

/

FEMA assistance is not the same as insurance. Disaster assistance covers the basic needs for a home to be livable. Insurance may give additional coverage. NFIP payments are not dependent on state or federal disaster declarations.

Visit [floodsmart.gov](https://www.floodsmart.gov) to find out your property's flood risk and to get an estimate for your NFIP premium.

To address many of the common myths and rumors during the New Mexico wildfires, FEMA activated a rumor/myth webpage. You can access it online at [fema.gov/nm-rumors](https://www.fema.gov/nm-rumors).
