Types of FEMA Assistance

FEMA's Individuals and Households Program offers a range of grants to those affected by disasters who are uninsured or have unmet needs not covered by insurance and determined to be eligible for federal aid based on the type of damage sustained.

FEMA works with each household on a case-by-case basis so it's likely that even neighboring houses will not get the same type or level of assistance because of one or more variables. FEMA recommends that impacted residents apply directly with the agency and let disaster recovery specialists determine what assistance might be available.

Accepting a FEMA grant will not affect eligibility for Social Security, Medicare, Medicaid, Supplemental Nutrition Assistance Program (SNAP) benefits or other federal benefit programs.
