14. Identify the proposed sequence of SDE inspections.  

Decide which subdivisions, neighborhoods, or areas will be inspected first, then next, and so on. The sequence will depend on the number of inspectors, their availability during the inspection process, the number of structures to inspect, and the proposed completion date of the inspections. The sequence may be revised as issues arise due to other post-disaster activities that may restrict or limit the inspection teams.

APPENDIX C
Sample Documents
Appendix C: Sample Documents

1. Letter of Introduction
2. NOTICE OF DETERMINATION – Substantial Improvement
3. NOTICE OF DETERMINATION – Substantial Damage
4. NOTICE OF DETERMINATION – Work Does Not Constitute Repair of Substantial Damage
5. Recommended Guidelines for Interaction with Structure Owners by SDE Inspectors
Dear Structure Owner or Occupant:

The bearer of this letter is on official business for the City of Floodville during the hours between 8:00 AM and 6:00 PM, Monday through Saturday.

As a result of the flooding that occurred between September 3 and 4, 2017, City staff will be inspecting buildings throughout the community for evidence of Substantial Damage. This evaluation is required by our Floodplain Management Ordinance dated April 8, 2005. These inspections apply to all structures within the 100-year floodplain as shown on the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), Panels 0100 through 0350 for Floodville dated June 19, 2008.

The inspectors will require approximately 30 minutes for a residential inspection and from 30 to 90 minutes for non-residential buildings to inspect for exterior and interior damage. They will record the required information used by the Floodville Department of Building Inspections to make Substantial Damage determinations. After the City has completed the determination process, a written determination will be mailed to the owners of the inspected structures.

Please be advised that all repairs, reconstruction, and new construction are subject to the provisions of the Floodville Building Code and may require a permit. Construction activities that are undertaken without a proper permit are violations and may result in citations, fines, the removal of the non-compliant construction, or other legal action.

If you refuse admittance to the inspectors, your address will be provided to our City Attorney for processing of a formal legal request to inspect the structure during normal business hours.

Questions regarding the inspection process may be directed to me or Mr. William Jones of the Building Department at 888-999-1212 between the hours of 7:30 AM and 5:00 PM, Monday through Friday, or e-mailed to william.jones@floodville.ny.gov.

Sincerely,

Lisa Donaldson, Chief Inspector
Department of Building Inspections
888-999-0000
lisa.donaldson@floodville.ny.gov
Dear [name of structure owner]:

The City of Floodville has reviewed your recent application for a permit to [describe proposed improvement/addition] for the existing residential structure located at [insert structure address], Floodville, NY 14056.

The Department of Building Inspections has determined that this structure is located within a mapped Special Flood Hazard Area on the Flood Insurance Rate Map (FIRM), Panel 0150, with an effective date of June 19, 2008. As required by our floodplain management ordinance or building code, we have evaluated the proposed work and determined that it constitutes Substantial Improvement of the building. This determination is based on a comparison of the cost estimate of the proposed work to the market value of the building (excluding land value). When the cost of improvements equals or exceeds 50 percent of the market value of the building, the work is considered to be Substantial Improvement under the requirements of the National Flood Insurance Program (NFIP) and the city’s Floodplain Management Ordinance dated April 8, 2005.

As a result of this determination, you are required to bring the building into compliance with the flood damage-resistant provisions of the City regulations and/or code [cite pertinent sections].

We would be pleased to meet with you and your designated representative (architect/builder) to discuss the requirements and potential options for bringing the structure into compliance. Several issues must be addressed to achieve compliance. The most significant requirement is that the lowest floor, as defined in the regulations/code, must be elevated to or above the base flood elevation (BFE) [or the elevation specified in the regulations/code] on the FIRM. You may wish to contact your insurance agent to understand how raising the lowest floor higher than the minimum required elevation can reduce NFIP flood insurance premiums.

Please resubmit your permit application along with plans and specifications that incorporate compliance measures. Construction activities that are undertaken without a proper permit are violations and may result in citations, fines, the removal of the non-compliant construction, or other legal action.

Sincerely,

Lisa Donaldson, Chief Inspector
Department of Building Inspections

Substantial Damage
Sample Letter to Notify Structure Owner of Determination

NOTICE OF SUBSTANTIAL DAMAGE DETERMINATION (RESIDENTIAL)

Dear [name of structure owner]:

The City of Floodville has reviewed your recent application for a permit to repair [describe proposed improvement/addition] for the existing residential structure located at [insert structure address], Floodville, NY 14056. These repairs are required as a result of flood damage from the storms of August 26–28, 2017.

The Department of Building Inspections has determined that this structure is located within a mapped Special Flood Hazard Area on the Flood Insurance Rate Map (FIRM), Panel 0150, with an effective date of June 19, 2008. As required by our floodplain management ordinance or building code, we have evaluated the proposed repairs and determined that the damage constitutes Substantial Damage for the structure. This determination is based on a comparison of the cost estimate of the proposed cost of repairs to the pre-damage market value of the structure (excluding land value). When the cost of repairs equals or exceeds 50 percent of the pre-damage market value of the structure, the damage is considered to be Substantial Damage under the requirements of the National Flood Insurance Program (NFIP) and the city’s Floodplain Management Ordinance dated April 8, 2005.

As a result of this determination, you are required to bring the structure into compliance with the flood damage-resistant provisions of the City regulations and/or code [cite pertinent sections].

We would be pleased to meet with you and your designated representative (architect/builder) to discuss the requirements and potential options for bringing the structure into compliance. Several issues must be addressed to achieve compliance. The most significant requirement is that the lowest floor, as defined in the regulations/code, must be elevated to or above the base flood elevation (BFE) [or the elevation specified in the regulations/code] on the FIRM. You may wish to contact your insurance agent to understand how raising the lowest floor higher than the minimum required elevation can reduce NFIP flood insurance premiums.

Please resubmit your permit application along with plans and specifications that incorporate compliance measures. Construction activities that are undertaken without a proper permit are violations and may result in citations, fines, the removal of the non-compliant construction, or other legal action.

Sincerely,

Lisa Donaldson, Chief Inspector

Dear [name of structure owner]:

The City of Floodville has reviewed your recent application for a permit to repair [describe proposed improvement/addition] for the existing residential structure located at [insert structure address], Floodville, NY 14056. These repairs are required as a result of flood damage from the storms of August 26–28, 2017.

The Department of Building Inspections has determined that this structure is located within a mapped Special Flood Hazard Area on the Flood Insurance Rate Map (FIRM), Panel 0150, with an effective date of June 19, 2008. As required by our floodplain management regulations and/or building code, we have evaluated the proposed repair work and determined that the damage does not constitute Substantial Damage for this structure. This determination is based on a comparison of the cost estimate of the proposed cost of repairs to the pre-damage market value of the structure (excluding land value). When the cost of repairs is less than 50 percent of the pre-damage market value of the structure, the damage is not considered to be Substantial Damage, so no additional requirements apply for this structure.

Please be advised that we may need to make another determination if you elect to perform work other than that described and defined in your current permit application, including additional renovations or upgrades or the building of an addition. Construction activities that are undertaken without a proper permit are violations and may result in citations, fines, the removal of the non-compliant construction, or other legal action.

Questions regarding the inspection process may be directed to me or Mr. William Jones of the Building Department at 888-999-1212 between the hours of 7:30 AM and 5:00 PM, Monday through Friday, or e-mailed to william.jones@floodville.ny.gov.

Sincerely,

Lisa Donaldson, Chief Inspector
Department of Building Inspections

Recommended Guidelines for Interaction with Structure Owners by SDE Inspectors

1. The objectives of the SDE inspections are to accurately collect the data required for the Substantial Damage determinations through rapid visual inspections and then move on to the next structure. The initial inspections may require more than 30 minutes for a residential structure. After the first 2 to 3 days of residential inspections, the inspection time should be 15 minutes or less per structure, as the inspectors gain experience and feel more comfortable with the inspections.

2. Remember that you are entering someone’s property and structure, or place of business on official City business. Therefore, conduct yourself in a professional manner and be respectful of personal property. Many of these owners and occupants have suffered significant financial losses.

3. The inspections will be conducted between the hours of ____ AM and ____ PM, Monday through Friday (or Monday through Saturday), until all required structures have been inspected. This is in accordance with the inspection guidance provided in the community Letter of Introduction that you will be carrying during the inspection period.

4. Given the extensive damage, many of the homes and buildings may be unoccupied. Our community legal counsel has determined that we can enter open, unoccupied structures. The structure must be unlocked and open, without any signs or other visible postings forbidding trespassing on the property or within the structure. Therefore, you may have little or no contact with some of the occupants as you complete the inspections.

5. When approached by a structure owner or occupant, verify that the building being inspected is theirs and then hand them a community Letter of Introduction. In general, structure owners and occupants will be curious and possibly suspicious of the inspections. Explain that you are only there to inspect for damage and record the required data. The Letter of Introduction should be handed out to anyone who requests information about the inspections.

6. If you feel threatened in any manner, return to your vehicle and call the police and then the SDE Manager with the address and type of threat.

7. Structure owners and occupants with additional questions should be directed to call the point-of-contact identified in the Letter of Introduction. Try to avoid lengthy conversations as much as possible. Many of the conversations will become repetitive and will unnecessarily slow down the rate of inspections.

8. Unless specifically directed by the SDE Manager, do not try to explain the Substantial Damage determination process, what the results might mean for the structure owner, or any State or Federal buyout or other post-disaster grant or funding program.

9. Under the SDE Manager’s direction, explain that building permits may be required for any reconstruction, repairs, or new construction in the aftermath of the disaster. Also, any reconstruction, repairs, or new construction conducted without a proper permit may be considered non-compliant
construction and could result in daily fines, removal of the non-compliant construction, or other legal action.

10. For locked properties or properties where the owner or occupant is present but refuses to allow you inside, simply record the address, a name and telephone number (if available), the reason for the refusal, and then hand the owner or occupant the Letter of Introduction before moving on to the next structure.

11. Before entering a structure, verify that the floor is safe to walk on, and then enter carefully. Refrain from pulling pieces of plaster, tearing out drywall or ceilings, or tearing back wallpaper or drywall for the assessment of the damage on the percent breakdown section of the *Damage Inspection Worksheet* of the SDE tool.

Guidance for a Contractor or Community Estimate of Repairs
This page intentionally left blank.
Required and Recommended Elements to be Included
In a Contractor or Community Estimate of Repairs

ALL STRUCTURES

Address or Location: ________________________________________________________________

Community: ________________________________________________________________

ITEMS THAT MUST BE INCLUDED (check box on left if present):

All structure elements, including:

☐ 1. Foundations (e.g., slab-on-grade, basement, crawlspace)
☐ 2. Monolithic or other types of concrete slabs
☐ 3. Bearing walls, tie beams, trusses
☐ 4. Joists, beams, subflooring, framing, ceilings
☐ 5. Interior non-bearing walls
☐ 6. Exterior finishes (e.g., brick, stucco, siding)
☐ 7. Windows and exterior doors
☐ 8. Roofing, gutters, and downspouts
☐ 9. Hardware
☐ 10. Attached decks and porches
☐ 11. ________________________________________________________________
☐ 12. ________________________________________________________________
☐ 13. ________________________________________________________________
☐ 14. ________________________________________________________________
☐ 15. ________________________________________________________________
ITEMS THAT MUST BE INCLUDED (check box on left if present):

All interior finish elements, including:

☐ 1. Floor finishes (e.g., hardwood, ceramic, vinyl, linoleum, stone, carpeting over subflooring)
☐ 2. Bathroom tiling and fixtures
☐ 3. Wall finishes (drywall, paint, stucco, plaster, paneling, tile, and marble)
☐ 4. Built-in cabinets (kitchen, utility, entertainment, storage, and bathroom)
☐ 5. Interior doors
☐ 6. Interior finish carpentry
☐ 7. Built-in bookcases and furniture
☐ 8. Hardware
☐ 9. Insulation
☐ 10. 
☐ 11. 
☐ 12. 
☐ 13. 
☐ 14. 
☐ 15. 
ITEMS THAT MUST BE INCLUDED (check box on left if present):

All utility and service equipment, including:

☐ 1. HVAC equipment
☐ 2. Plumbing fixtures and piping
☐ 3. Electrical service panel, wiring, outlets, and switches
☐ 4. Light fixtures and ceiling fans
☐ 5. Security systems
☐ 6. Built-in appliances
☐ 7. Central vacuum systems
☐ 8. Water filtration, conditioning, or recirculation systems
☐ 9. 
☐ 10. 
☐ 11. 
☐ 12. 
☐ 13. 
☐ 14. 
☐ 15. 

Guidance for a Contractor or Community Estimate of Repair
ITEMS THAT MAY BE EXCLUDED:

☐ 1. Trash removal and clean-up
☐ 2. Costs to temporarily stabilize a structure so that it is safe to enter and evaluate
☐ 3. Costs to obtain or prepare plans and specifications
☐ 4. Land survey costs
☐ 5. Permit fees and inspection fees
☐ 6. Carpeting and re-carpeting installed on top of the sub-flooring or finished floor
☐ 7. Outside improvements, including landscape, irrigation, sidewalks, driveways, fences, yard lights, swimming pools, pool enclosures, and detached accessory structures costs required for minimum necessary work to correct existing violations of health, safety, sanitary, or building codes
☐ 8. Plug-in appliances such as washing machines and stoves
☐ 9. 
☐ 10. 
☐ 11. 
☐ 12. 
☐ 13. 
☐ 14. 
☐ 15.
