

## Community Needs Scoping and Introduction / Goals and Objectives

### Collaborative Technical Assistance (CTA) Delivery team

FEMA and contract support.

### Core Team

Local emergency managers, dam owners and operators, local public safety officials, and others who are lead researchers and planners.

### Collaborative Team

Stakeholders with a role and responsibility in dam risk management.

### Kickoff

This session provides an overview of the following topics: the CTA concept, planning for dam emergencies, stakeholder engagement framework options, and the development of draft goals and objectives.

### Frame the Issues – Identify and Collect Information

The session will empower participants to develop risk- and data-informed community profiles. Participants will discuss key concepts and methods to improve information collection and gaps and develop a community profile.

FEMA works collaboratively with communities to set their own goals and objectives. Below are common results set by communities for this session.

- **Format:** In-person
- **Result:**
  - ✓ Participants will gain an understanding for how this offering will support their planning efforts. Furthermore, the core team will conduct limited research and analysis regarding dam hazards and associated consequences in the community.
  - ✓ Following this session, participants will have a better understanding of the community structure and the specific focus areas of concern for planning considerations.
