

Resource Typing Definition for Public Health, Healthcare, and Emergency Medical Services
Emergency Medical Services

ADVANCED EMERGENCY MEDICAL TECHNICIAN

RESOURCE CATEGORY	Emergency Medical Services
RESOURCE KIND	Personnel
OVERALL FUNCTION	The Advanced Emergency Medical Technician (AEMT) is a health professional whose primary focus is to respond to, assess, and triage emergent, urgent, and nonurgent requests for medical care; apply basic and focused advanced knowledge and skills necessary to provide patient care and medical transportation; and facilitate access to a higher level of care when the patient's needs exceed the capability level of the AEMT
COMPOSITION AND ORDERING SPECIFICATIONS	<ol style="list-style-type: none"> 1. This position can be ordered as a single resource 2. Discuss logistics for deploying this position, such as working conditions, length of deployment, security, lodging, transportation, and meals, prior to deployment 3. This resource may not be available to order in all jurisdictions

Each type of resource builds on the qualifications of the type below it. For example, Type 1 qualifications include the qualifications in Type 2, plus an increase in capability. Type 1 is the highest qualification level.

COMPONENT	SINGLE TYPE	NOTES
DESCRIPTION	<p>The AEMT:</p> <ol style="list-style-type: none"> 1. Functions as part of a comprehensive Emergency Medical Services (EMS) response, community, health, or public safety system with medical oversight 2. Performs interventions with the basic and advanced equipment typically found on an ambulance 3. Provides focused advanced care and performs pharmacological interventions engineered to mitigate specific life-threatening conditions, medical conditions, and psychological conditions with a targeted set of skills beyond the level of an Emergency Medical Technician (EMT) 4. Functions as an important link between the scene and the healthcare system 	Not Specified
