Washington - Fire and High Winds
Denial of Appeal

Denied on July 1, 2011

On March 25, 2011, Governor Christine O. Gregoire requested a major disaster declaration due to fire and high winds during the period of February 12-13, 2011. The Governor requested Individual Assistance, Public Assistance, and Hazard Mitigation for the Sovereign Tribal Nation of the Confederated Tribes and Bands of the Yakama Nation. On April 21, 2011, the Governor’s request was denied. On June 7, 2011, Governor Gregoire appealed the denial. During the period of March 2-3, 2011 and on March 16, 2011, joint Federal, State, Tribal, and local Preliminary Damage Assessments (PDAs) were conducted in the requested counties and are summarized below. PDAs estimate damages immediately after an event and are considered, along with several other factors, in determining whether a disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments, and that Federal assistance is necessary.¹

On July 1, 2011, the Governor’s appeal for a major disaster declaration was denied based on the determination that the damage was not of such severity and magnitude as to be beyond the combined capabilities of the State, affected local governments, and voluntary agencies.²

Summary of Damage Assessment Information Used in Determining Whether to Declare a Major Disaster

Individual Assistance

- Total Number of Residences Impacted:³ 46
  - Destroyed - 16
  - Major Damage - 3
  - Minor Damage - 12
  - Affected - 15
- Percentage of insured residences:⁴ 11%
- Percentage of low income households:⁵ 87%
- Percentage of elderly households:⁶ -
- Total Individual Assistance cost estimate: $266,232

Public Assistance

- Primary Impact: Emergency protective measures
- Total Public Assistance cost estimate: $702,656
- Statewide per capita impact:⁷ $0.12
- Statewide per capita impact indicator:⁸ $1.30
- Countywide per capita impact: Yakima County ($3.16), Confederated Tribes

Note:

¹ Damage assessment is a process used to determine the extent of damage caused by a disaster. PDAs estimate damages immediately after an event and are considered, along with several other factors, in determining whether a disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments, and that Federal assistance is necessary.²

² On July 1, 2011, the Governor’s appeal for a major disaster declaration was denied based on the determination that the damage was not of such severity and magnitude as to be beyond the combined capabilities of the State, affected local governments, and voluntary agencies.³

³ Total Number of Residences Impacted: The total number of residences impacted by the disaster, including those that were destroyed, majorly damaged, minimally damaged, and affected in some way.⁴

⁴ Percentage of insured residences: The percentage of residences that were insured.⁵

⁵ Percentage of low income households: The percentage of households that are considered low income.⁶

⁶ Percentage of elderly households: The percentage of households that are considered elderly.⁷

⁷ Statewide per capita impact: The per capita impact for the state as a whole.⁸

⁸ Statewide per capita impact indicator: The per capita impact indicator for the state as a whole.
and Bands of the Yakama Nation ($22.20)

- Countywide per capita impact indicator: $3.27

---

1. The preliminary damage assessment (PDA) process is a mechanism used to determine the impact and magnitude of damage and resulting needs of individuals, businesses, public sector, and community as a whole. Information collected is used by the State as a basis for the Governor’s request for a major disaster or emergency declaration, and by the President in determining a response to the Governor’s request (44 CFR § 206.33).

2. When a Governor’s request for major disaster assistance under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (Stafford Act) is under review, a number of primary factors are considered to determine whether assistance is warranted. These factors are outlined in FEMA’s regulations (44 CFR § 206.48). The President has ultimate discretion and decision making authority to declare major disasters and emergencies under the Stafford Act (42 U.S.C. § 5170 and § 5191).

3. Degree of damage to impacted residences:
   - Destroyed – total loss of structure, structure is not economically feasible to repair, or complete failure to major structural components (e.g., collapse of basement walls/foundation, walls or roof);
   - Major Damage – substantial failure to structural elements of residence (e.g., walls, floors, foundation), or damage that will take more than 30 days to repair;
   - Minor Damage – home is damaged and uninhabitable, but may be made habitable in short period of time with repairs; and
   - Affected – some damage to the structure and contents, but still habitable.

4. By law, Federal disaster assistance cannot duplicate insurance coverage (44 CFR § 206.48(b)(5)).

5. Special populations, such as low-income, the elderly, or the unemployed may indicate a greater need for assistance (44 CFR § 206.48(b)(3)).

6. Ibid (44 CFR § 206.48(b)(3)).

7. Based on State population in the 2000 Census.
