

# Dam Safety Collaborative Technical Assistance Interest Form

---

Helping communities at risk of dam-related flooding to better understand their risk landscape and the potential consequences of dam-related emergencies.

## Summary

FEMA is offering a Collaborative Technical Assistance (CTA) series to help communities at risk of dam-related flooding to better understand their risk landscape and the potential consequences of dam-related emergencies. There is no cost to the applicant to participate in CTA. The CTA will include planning for emergencies related to operational discharges or dam-related infrastructure failure.

CTA is a two-way commitment. FEMA will provide participating communities with the necessary expertise, coaching, and tools. In turn, each community is expected to identify a project manager who will attend all relevant sessions and ensure project milestones are met. The CTA is an interactive process that requires continued, dedicated involvement from participating communities.

CTA series is flexible, scalable, and adaptable. After communities assess their capabilities, they should consider participating in the entire series. FEMA will collaboratively work with communities to develop a framework of sessions that best fit the community's level of capability.

For more information, visit <https://www.fema.gov/emergency-managers/risk-management/dam-safety/technical-assistance>.

## Session Participants

Session participants include local, state, and federal emergency managers; dam owners and operators; private sector representatives; community planners; floodplain management professionals; nonprofit partners; and other individuals and organizations facing dam-related emergencies.

## Time Commitment

Approximately 8-10 months in length. Customized CTA variations available upon request.

8-10 hour per month: Includes conferences calls, in-person meetings, webinars, workshops.
