

Resilience Analysis and Planning Tool (RAPT): Data Layers and Sources

RAPT Data Layers

Table 1 lists the data layers available in the Resilience Analysis and Planning Tool (RAPT), accessible at <https://www.fema.gov/rapt>. RAPT helps emergency managers and local leaders visually assess challenges to resilience. The tool includes hazard and infrastructure information, as well as 20 community resilience indicators identified in the [Community Resilience Indicator Analysis: County-level Analysis of Commonly Used Indicators from Peer-Reviewed Research: 2020 Update](#) (CRIA) conducted by the Federal Emergency Management Agency (FEMA) and Argonne National Laboratory. Table 2–Table 5 on the following pages provide the data sources for each data layer category.
