Scope of Project: Hurricane Creek Drainage Improvements
This project consists of clearing, reshaping, and rechanneling 14,284 LF of Hurricane Creek and tributaries. Includes replacement of a bridge, several culverts and related works.

Funded by FEMA through the Governor’s Office of Homeland Security and Emergency Preparedness

State Government

Governor: John Bel Edwards
Senator: Neil Riser
Representative: Steve Pytliant

President: Mr. Ben Clark
Vice President: Mr. Aubrey Bratton
Road Superintendent: Mr. Tim Stapleton
Secr./Treas.: Ms. Wanda Stowe
District 1: Mr. Kenneth "Speck" Graham
District 2: Mr. Lanny Dark
District 3: Mr. Ben Clark
District 4: Mr. Kevin Martin
District 5: Mr. Manuel Escalon
District 6: Mr. Glen Barnhill
District 7: Mr. Aubrey Bratton
SITE WORK NOTES

1. Contractor shall assume full responsibility for all construction work which may interfere with location of improvements as depicted on site plan.
2. Contractor shall inspect and review all plans and specifications, and all other items submitted with this proposal, prior to submission of a formal bid for this project.
3. Contractor shall be responsible for removing all temporary fences and signs in a workmanlike manner, and for removing all temporary utilities upon completion of work.
4. Contractor shall provide all necessary fencing, signs, and other temporary facilities necessary for the protection of the public and the work. Contractor shall maintain temporary fencing in place until the completion of the work.

GENERAL NOTES (EXISTING UTILITIES)

These notes shall apply to all sheets of these plans.
1. All utilities are represented in their normal position and are locatable in the embossed condition. It is understood that the embossed condition represents the exact location of all existing utilities and that the embossed condition is the final location of all existing utilities.
2. Contractor shall maintain temporary fencing and signs in a workmanlike manner, and shall remove all temporary fencing and signs upon completion of work.
3. Contractor shall maintain temporary fencing in place until the completion of the work.

CONTRACTOR'S UNDERSTANDING

It is understood and mutually agreed that by submitting a proposal, the Contractor acknowledges that he has carefully examined all documents which pertain to the work. The location of all utilities and all construction hazards are represented in the plans and specifications, and are to be used as a guide to the location of the work. The Contractor shall be responsible for all work performed in the area where the work is to be done, and shall be responsible for all injuries or damage to persons or property which may result from the work performed by the Contractor or his sub-contractors.

MATERIAL SUBMITTALS

The contractor is required to submit to the architect, by the 10th day after contract acceptance, the following materials: (1) a copy of the contract, a copy of the plans and specifications, the plans and specifications, and (2) a copy of the contract, a copy of the plans and specifications, and (3) a copy of the contract, a copy of the plans and specifications.

The contractor shall furnish the architect with a copy of the contract, a copy of the plans and specifications, and (4) a copy of the contract, a copy of the plans and specifications, and (5) a copy of the contract, a copy of the plans and specifications.

The contractor shall furnish the architect with a copy of the contract, a copy of the plans and specifications, and (6) a copy of the contract, a copy of the plans and specifications, and (7) a copy of the contract, a copy of the plans and specifications.

The contractor shall furnish the architect with a copy of the contract, a copy of the plans and specifications, and (8) a copy of the contract, a copy of the plans and specifications, and (9) a copy of the contract, a copy of the plans and specifications.

The contractor shall furnish the architect with a copy of the contract, a copy of the plans and specifications, and (10) a copy of the contract, a copy of the plans and specifications, and (11) a copy of the contract, a copy of the plans and specifications.

GENERAL EROSION AND SEDIMENT CONTROL NOTES:

1. This storm water pollution prevention plan (SPPP) contains the following documents: the procedures for erosion control plans, and forms. It shall be installed by the owner of the property or the manager of the property in accordance with the instructions of the contractor.

2. The owner and subcontractors shall be responsible for maintaining and understanding the procedures outlined in the erosion control plans and the Storm Water Pollution Prevention Plan (SWPPP).

3. Units of measurement on maps shall be in feet, unless otherwise noted, and have been surveyed for accuracy by the U.S. Geological Survey (USGS).

4. The use of plastic sheeting, site containers or other containment structures during construction shall be noted by the owner or the manager on the site.

5. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

6. This plan is intended to be used as a guide for the installation of erosion control measures. Details shall be revised as necessary during construction to ensure compliance with the requirements of the plan.

7. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

8. The owner and subcontractors shall be responsible for maintaining and understanding the procedures outlined in the erosion control plans and the Storm Water Pollution Prevention Plan (SWPPP).

9. Units of measurement on maps shall be in feet, unless otherwise noted, and have been surveyed for accuracy by the U.S. Geological Survey (USGS).

10. The use of plastic sheeting, site containers or other containment structures during construction shall be noted by the owner or the manager on the site.

11. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

12. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

NUISANCES:

1. Class I and Class II construction sites shall be enclosed with temporary fencing to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

2. The owner and subcontractors shall be responsible for maintaining and understanding the procedures outlined in the erosion control plans and the Storm Water Pollution Prevention Plan (SWPPP).

3. Units of measurement on maps shall be in feet, unless otherwise noted, and have been surveyed for accuracy by the U.S. Geological Survey (USGS).

4. The use of plastic sheeting, site containers or other containment structures during construction shall be noted by the owner or the manager on the site.

5. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

6. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

7. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

8. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

9. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

10. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

11. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

12. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

SEQUENCE OF CONSTRUCTION:

PHASE I:

1. Buildings, temporary structures, and other temporary facilities shall be installed in accordance with the construction plan.

2. Site preparation shall be completed to accommodate the construction activities.

3. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

4. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

5. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

6. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

7. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

8. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

9. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

10. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

11. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

12. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.

13. The purpose of this erosion control plan is to prevent soil erosion and sediment runoff by controlling construction activities and to ensure that all work is performed in a manner that protects the environment and public health.
