Emergency Operations Center (EOC) References and Resources Tool

Purpose and EOC Overview

This document provides EOC leaders and staff with a set of best practices, checklists, references, links and essential guidance related to EOC operations and administration.

An EOC is a physical or virtual location from which leaders of a jurisdiction or organization coordinate information and resources to support incident management activities (on-scene operations). This reference guidance provides essential tips, considerations, and resources in establishing and operating physical and virtual EOCs. An EOC:

- Is a coordination structure to collect, analyze, and share information
- Supports resource needs and requests, including allocation and tracking
- Coordinates plans and determines current and future needs
- Provides coordination and policy direction

For more information, visit EOC Toolkit

EOC Structure Types, Benefits, Training and Skillsets

<table>
<thead>
<tr>
<th>EOC Organizational Structure Type</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICS or ICS-like Structure</td>
<td>The ICS organizational structure is familiar to those with ICS training. It most closely aligns with the structure used for on-scene incident management.</td>
</tr>
<tr>
<td>Incident Support Model</td>
<td>This structure puts the EOC director in direct contact with those conducting situational awareness and information management. It streamlines resource sourcing, ordering, and tracking.</td>
</tr>
<tr>
<td>Departmental Structure</td>
<td>By operating in the context of their normal relationships, department/agency representatives can function in the EOC with minimal preparation and startup time.</td>
</tr>
</tbody>
</table>

EOC Skillsets and User Guide

- Supports standardized qualifications for EOC personnel
- Flexible enough to accommodate EOCs of all sizes
- Allows EOC Leaders to mix and match skillsets to create the right combination of skills and abilities for their EOCs
- Helps create a national vocabulary for mutual aid

EOC How to Quick Reference Guide

- Introduces the considerations related to EOC setup, operational activities, and deactivation
- Informs EOC development that successfully meets a jurisdiction’s specific needs

EOC-Related Training

- IS-2200 Basic EOC Functions
- F/L/G-2300 Intermediate EOC Functions

Virtual EOCs- Federal Example

National Business Emergency Operations Center (NBEOC) is FEMA’s virtual clearing house for two-way information sharing between public and private sector stakeholders to help people before, during, and after disasters. In support of major disasters and emergencies, FEMA’s Office of Response and Recovery, Private Sector Division operates the NBEOC under Emergency Support Function (ESF) #14 (Cross-Sector Business and Infrastructure) within the National Response Coordination Center (NRCC). The NBEOC uses virtual tools – including web-based platforms and dashboards – to communicate and coordinate with members. During emergency operations, the NBEOC provides access to real-time situational awareness about the incident and ground truth on the needs of affected survivors and communities. Visit [https://www.fema.gov/business-industry/national-business-emergency-operations-center](https://www.fema.gov/business-industry/national-business-emergency-operations-center)

Virtual EOC Best Practices

- Establish activation, operation, and deactivation criteria, processes and procedures with all virtual EOC partners and participants
- Define clear roles and responsibilities as part of an activated virtual EOC
- Conduct partner training and exercising in all relevant virtual EOC operations
- Ensure the requisite technology to support internet connectivity (web-based functions), voice and video conferencing, real-time status monitoring, alerts/notifications, and telecommunications, mobile/radio communications is available and operational 24x7x365
- Monitor, track, report, and maintain other documentation on event status, personnel tracking, staging, deployment and tracking of resources
- Incorporate lessons learned in ongoing comprehensive virtual EOC planning and coordination

**COVID-19 Best Practice Information: Emergency Operations Centers**

This document describes considerations that state, local, tribal, territorial (SLTT) governments could use to safely operate EOCs.

**COVID-19 Pandemic Operational Guidance for the 2020 Hurricane Season**

This document provides actionable guidance to SLTT officials to prepare for response and recovery operations and encourages personal preparedness measures amidst the ongoing COVID-19 pandemic.
