

Flood Risk Analysis and Mapping (Rev. 11) FEMA Policy #204-078-1

BACKGROUND

This policy is applicable to Federal Emergency Management Agency (FEMA) staff delivering Risk Analysis and Mapping (Risk MAP), all mapping partners (contractors, cooperating technical partners, and other federal agencies) who perform flood risk projects on behalf of FEMA, and the National Flood Insurance Program (NFIP). Additionally, this policy may be pertinent to states, tribes, territories, local communities, homeowners and their consultants who are interested in the Flood Insurance Rate Map (FIRM) process.

This policy updates and supersedes the Standards for Flood Risk Analysis and Mapping – FP 204-078-1 (Rev 10) approved on Dec. 11, 2019.

The changes with this revision are:

Table 1: 2020 Maintenance Cycle: Standard Updates

| Standard Identification Number (SIDs) | Standards Change Description |
|--|---|
| SIDs 66, 69, 73, 75, 77, 78, 79, 128, 248, 335 | Updating to include edits and refinements associated with the 2D Floodway Significant Update. |
| SIDs 89, 96 | Updating to clarify the use of regulatory products and the applicability of this standard. |
| SID 99 | Rescinding standard in association with edits and refinements associated with the 2D Floodway Significant Update. |
| SIDs 101, 103, 229, 232, 256, 265, 274, 507 | Updating to clarify standard and align to current standard operating procedures. |
| SID 230 | Rescinding standard because this is covered by other standards and guidance. |
| SID 235 | Updating to comply with current style guide specifications. |
| SIDs 264, 272, 279, 280 | Updating to incorporate clarifications or corrections in the wording of the standard. |
| SID 415 | Updated to removed confusing language and emphasize the focus on quality. |

| Standard Identification Number (SIDs) | Standards Change Description |
|---------------------------------------|---|
| SID 417 | Align the Standard to current standard operating procedures regarding automated creation of Changes Since Last Firm (CSLF). |
| SID 424 | Rescinding standard because the tiling structure is no longer applicable. |
| SID 443 | Updating to direct information on National Flood Insurance Program policy and claims information to OpenFEMA. |
| SID 628 | Updating to reflect the automated creation of Changes Since Last Firm (CSLF) through Customer and Data Services (CDS) tools and removes it from the list of products required to align with model information. |
| SID 630 | Updating to establish understanding that Automated Map Production (AMP) output products will look different than current requirements, but that is ok. Quality control (QC) will still be required for the engineering and flood hazard information. |
| SID 640 | To keep Risk MAP IT systems secure and appropriately protect the privacy of individuals who are referenced in Risk MAP data, a User Account Management Plan is being established so that all Risk MAP Providers understand the protocols that must be followed and managed. |
| SID 641 | Updating as expired Provisionally Accredited Levee (PALs) are emerging issues and HQ requires more oversight on the use of an expired PAL on an updated regulatory product. |
| SID 642 | Updating because seclusion should no longer be used for a Risk MAP study unless a specific case or set of circumstances dictates its use. |
| SID 643 | New standard developed to address Coastal Zone Management Act (CZMA) consistency determination requirements |

PURPOSE

The purpose of this policy is to enable consistent performance by identifying the standards that must be followed in the delivery of the Risk Mapping, Assessment, and Planning (Risk MAP) program. These standards govern the performance of flood risk projects, processing of letters of map change and related Risk MAP activities.

PRINCIPLES

- 1. Ensure consistency in the deliverables of all flood risk projects so that they can support the NFIP and all its stakeholders.
- 2. Ensure a standard level of quality is met for all deliverables of a flood risk project.
- 3. Provide appropriate flexibility to FEMA Regional Offices and mapping partners to accommodate regional and local variability across the country.
- 4. Enhance the credibility of the NFIP and all flood risk mapping efforts.

REQUIREMENTS

Flood risk projects, regulatory NFIP map changes and other Risk MAP activities shall be performed in a consistent manner resulting in quality data and deliverables. The attached set of standards shall be followed in the delivery of Risk MAP.

Standards must be implemented based on the effective date and implementation description. The implementation description is chosen to avoid cost or scope impacts on existing task orders, cooperative agreements, or interagency agreements. If the implementation of a new standard as mandated by this policy requires a change to an existing agreement, coordinate with FEMA to modify the existing agreement as necessary. New standards may be implemented sooner in coordination with the FEMA Project Officer and Contracting Officer's Representative.

FEMA publishes substantial additional guidance to support implementation of and compliance with these standards. Users of these standards should also reference this guidance published on FEMA's web site at https://www.fema.gov/media-collection/guidance-femas-risk-mapping-assessment-and-planning.

Acting Assistant Administrator
Risk Management Directorate, Resilience

ADDITIONAL INFORMATION

Review Cycle

FEMA POLICY Standards for Flood Risk Analysis and Mapping #FP 204-078-1 (Rev. 11) will be reviewed, reissued, revised, or rescinded annually.

Authorities

The mapping program for the NFIP, implemented through Risk MAP, is established through the National Flood Insurance Act of 1968, as amended and the Biggert-Waters Flood Insurance Reform Act of 2012 (BW-12), as amended (42 U.S.C. 4001 et seq.). The mapping program is governed by the implementing regulations at Code of Federal Regulations - Title 44 (44 CFR) parts 59-72. The statutes and regulations establish the core requirements for the mapping program.

This policy represents FEMA's interpretation of these statutory and regulatory requirements and/or sets forth standard operating procedures. The policy itself does not impose legally enforceable rights and obligations but sets forth a standard operating procedure or agency practice that FEMA employees and contractors follow to be consistent, fair, and equitable in the implementation of the agency's authorities.

These standards are to be applied in addition to the legal requirements set out in the applicable statutes and regulations. For the most part, the applicable statutory and regulatory requirements are not repeated in this policy. Readers must refer to the statutes and regulations in addition to these standards.

Definitions

Flood risk projects are projects implemented under the Risk MAP program to engage with communities and provide flood risk information.

Guidance is a recommended method to meet the standard. Guidance assumes a working knowledge of common industry terminology and methodologies. Accepted approaches are not limited to this recommended approach; mapping partners may use other methods to meet or exceed the standard.

Guidelines and Standards Steering Committee is comprised of FEMA headquarters and regional employees and contractors responsible for maintenance and coordination of Risk MAP standards and guidance.

Mapping Partners are FEMA Production and Technical Services Contractors, Cooperating Technical Partners, and Other Federal Agencies (OFA) performing tasks on a flood risk project.

Program standards are a required element that supports the vision, goals and objectives of the program. Exceptions must be obtained through coordination with FEMA headquarters Risk Analysis Division leadership.

Risk MAP is the FEMA program that maintains flood maps for the NFIP and works with local governments to increase awareness of flood risk and provide flood risk information that leads to actions to reduce risk.

Standards exceptions are project-specific variances to Risk MAP standards, approved by appropriate Risk MAP officials.

Working standards are required elements of a project that are typically applied by specialists (such as engineers, planners, GIS specialists, etc.).

Monitoring and Evaluation

Compliance will be monitored through the Risk MAP Quality Assurance Management Plan.

Standards for Flood Risk Analysis and Mapping

Table 2: Standards for Flood Risk Analysis and Mapping

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------------|---------------------|---|
| 1 | 4/1/2003 | Existing standard Already implemented | Project Initiation | Program Standard | All Flood Risk Projects and LOMCs must be tracked in the MIP. |
| 2 | 4/1/2003 | Existing standard Already implemented | Project Initiation | Working Standard | A Project Management Team shall be formed as soon as a Flood Risk Project is initiated, and this team shall manage the project for its entire lifecycle. |
| 3 | 4/1/2003 | Existing standard Already implemented | Project Initiation | Program Standard | When a community is initially considered for a Flood Risk Project involving a new or revised flood hazard analysis, FEMA must establish and maintain a community case file per Code of Federal Regulations Title 44 CFR 66.3. |
| 4 | 10/1/2009 | Existing standard Already implemented | Project Initiation | Program Standard | All newly initiated Flood Risk Projects must be watershed-based, except for coastal and small-scale Flood Risk Projects related to levee accreditation status. |
| 5 | 11/30/2019 | Existing standard Already implemented | Project Planning | Program Standard | No flooding source will receive a lower level of regulatory flood map product than what currently exists on effective maps. |
| 6 | 11/30/2015 | Existing standard Already implemented | CNMS | Working Standard | Both flood hazard validation and needs assessment processes must follow the CNMS Technical Reference and the results must be stored within the national CNMS database. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------|---------------------|---|
| 7 | 6/17/2011 | Existing standard Already implemented | CNMS | Working Standard | Community-specific requests to update the FIRM outside of the NVUE validation process and LOMR process must be documented in the CNMS database as mapping requests for the FEMA Regional office review and consideration. |
| 8 | 6/17/2011 | Existing standard Already implemented | CNMS | Working Standard | The CNMS database shall be updated for engineering reference information, validation status, and map issues throughout all pertinent phases of the Flood Risk Project. |
| 9 | 6/17/2011 | Existing standard Already implemented | CNMS | Program Standard | The CNMS database shall be the sole authority for reporting flood map update needs. |
| 10 | 6/17/2011 | Existing standard Already implemented | CNMS | Working Standard | For a studied flooding source to go from 'UNVERIFIED' to '"VALID" status within the CNMS database, the flooding source must be reanalyzed. |
| 11 | 6/17/2011 | Existing standard Already implemented | CNMS | Working Standard | When the last assessment date of the Modernized or Paper Inventory exceeds five years, the Validation Status shall be changed by FEMA Headquarters (HQ) or its designee to 'Unknown' and shall require reassessment. |
| 12 | 6/17/2011 | Existing standard Already implemented | Project Planning | Program Standard | Each fiscal year, the regions shall have a plan to evaluate all CNMS flooding sources within a 5-year period. |
| 13 | 6/17/2011 | Existing standard Already implemented | CNMS | Working Standard | NVUE status must be reported by each FEMA Region to FEMA HQ at least quarterly. |
| 14 | 6/17/2011 | Existing standard | Project Planning | Working Standard | Regional decisions to prioritize, assess, and perform engineering analyses along various flooding |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|--|
| | | Already implemented | | | sources must be supported by the data contained in CNMS. |
| 15 | 4/1/2003 | Existing standard Already implemented | Coordination | Working Standard | FEMA shall provide technical and programmatic assistance and prepare responses to inquiries received from Mapping Partners, NFIP constituents and other interested project stakeholders. |
| 16 | 6/11/2011 | Existing standard Already implemented | Project Planning | Program Standard | Each flooding source must be evaluated in CNMS at least once within a 5-year period. |
| 17 | 11/30/2019 | Effective immediately | Project Planning | Working Standard | Discovery is a mandatory element of all Flood Risk Projects. All watershed- based Discovery must be initiated at a geographic footprint that encompasses the hydrologic characteristics of the area of interest. At the start of discovery, the delivery may be scaled to engage the appropriate level of project stakeholders based on community need and risk. |
| 18 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | All communities and tribes must be given an opportunity to review and make corrections to any data and information collected during Discovery prior to distribution of final Discovery products. |
| 19 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | Flood Risk Project stakeholders must be contacted prior to the Discovery Meeting. |
| 20 | 11/30/2019 | Effective Immediately | Stakeholder Engagement | Working Standard | Discovery must engage all communities and the appropriate level of project stakeholders identified within the project area and must engage practitioners across relevant disciplines. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------------|---------------------|--|
| 21 | 7/1/2011 | Existing standard Already implemented | Discovery | Working Standard | The types of data and information obtained during Discovery must demonstrate a holistic picture of flooding issues, flood risk, and flood mitigation priorities, opportunities, efforts and capabilities. |
| 22 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year 2013 | Project Planning | Program Standard | Decisions to perform additional analyses, data development activities, and/or community engagement within the Flood Risk Project area must be supported by the outcomes from Discovery. These decisions shall be communicated to project stakeholders prior to executing those activities. |
| 23 | 11/30/2019 | Effective Immediately | Discovery | Working Standard | Discovery-related data that incorporates appropriate background research must be provided to the communities and tribes prior to the Discovery Meeting and presented at the Discovery Meeting to facilitate discussions. |
| 24 | 11/30/2019 | Effective Immediately | Discovery | Working Standard | A Discovery Report and associated data will be provided to the communities and tribes after the Discovery Meeting. |
| 26 | 11/30/2019 | Effective Immediately | Discovery | Working Standard | A Discovery Report must include a section listing the data and information collected, when they were received, data sources, and an analysis of the data and information. It must also include the outcomes and decisions made at the Discovery Meeting. |
| 27 | 7/1/2011 | Existing standard Already implemented | Discovery | Program Standard | A Discovery Meeting with project stakeholders is a required activity of Discovery. |
| 29 | 7/31/2013 | Implemented with all new flood risk | Discovery | Program Standard | During Discovery, data must be identified that illustrates potential changes in flood elevation and |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|--|
| | | projects initiated in Fiscal Year 2013 | | | mapping that may result from the proposed projectscope. If available data does not clearly illustrate the likely changes, an analysis is required that estimates the likely changes. This data and any associated analyses must be shared and results must be discussed with stakeholders. |
| 30 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | The Flood Risk Project scope of work must be developed in coordination with project stakeholders. The purchased Flood Risk Project scope of work must be shared with project stakeholders. |
| 31 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | Discovery must include a discussion with stakeholders regarding risk identification, mitigation capabilities and actions, planning, and risk communication. |
| 33 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | For coastal Flood Risk Projects that will begin with a storm surge analysis, stakeholder coordination must occur by the end of the storm surge study effort and continue throughout the remainder of the coastal Flood Risk Project. |
| 34 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | When storm surge analyses are included in a Flood Risk Project, Discovery efforts must include a discussion of how storm surge estimates have changed since the effective Flood Risk Project. |
| 35 | 7/1/2011 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | The FEMA Regional Office must be consulted as to how tribal nations should be included in the overall Discovery efforts. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|---|---------------------|---|
| 36 | 4/11/2019 | Effective immediately | Coordinated Needs Management Strategy (CNMS) | Program Standard | A Coordinated Needs Management Strategy (CNMS) database that is compliant with Key Decision Point (KDP) questionnaires and the CNMS Technical Reference must be updated and submitted at the completion of Discovery, at Project Initiation, at Preliminary Issuance, at Revised Preliminary Issuance (if applicable), and at Letter of Final Determination Issuance (LFD). |
| | | | | | The CNMS database should also be updated during post-effective phases: at Letter of Map Revision (LOMR) effective date (if applicable), and for the 5- Year validation assessment. |
| 40 | 11/30/2015 | All Fiscal Year 2016 task orders that include new lidar collection | Elevation Data | Program Standard | New elevation data purchased by FEMA must comply with the current USGS National Geospatial Program Base Lidar Specification Version 1.2, except hydro-flattening is not required and a classified point cloud and a bare earth DEM deliverable are not required. |
| 41 | 4/1/2003 | Existing standard Already implemented | Elevation Data | Working Standard | For areas within the continental United States field surveys and aerial data acquisition must be referenced to the North American Vertical Datum of 1988 (NAVD88) and the North American Datum 1983 (NAD83) and connected to the NSRS. |
| 42 | 4/1/2003 | Existing standard Already implemented | Elevation Data | Working Standard | All ground and structure surveys must be certified by a registered professional engineer or a licensed land surveyor. |
| 43 | 5/31/2016 | Implemented for all projects that have not yet begun data development | Elevation Data | Working Standard | All updated flood hazard data shown on the Flood Insurance Rate Map (FIRM), in the FIRM Database and Flood Insurance Study (FIS) must be based on the most |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|--|
| | | | | | accurate existing topographic data available to FEMA before the start of data development and the data must have documentation that it meets the following vertical accuracy requirements: Vertical Accuracy Requirements based on PROOF Risk and Terrain Slope within the PROOF Risk Developed Proof Risk and Terrain Slope within the PROOF Risk Developed Proof Risk Devel |
| 44 | 1/1/2013 | Existing standard Already implemented | Elevation Data | Working Standard | FEMA requires all elevation data to be processed to the bare earth terrain in the vicinity of floodplains that will require hydraulic modeling. |
| 45 | 9/27/2010 | Existing standard Already implemented | Elevation Data | Working Standard | FEMA does not require the elevation data to be hydro-flattened, as specified in USGS Lidar Specification. |
| 46 | 11/30/2015 | All Fiscal Year 2016 task orders that include new lidar collection | Elevation Data | Working Standard | When a classified point cloud and a Digital Elevation Model (DEM) deliverable are included in a new elevation data collection, checkpoints for Vegetated Vertical Accuracy (VVA) must fall within the DEM footprint. |
| 49 | 1/1/2013 | Existing standard Already implemented | Elevation Data | Working Standard | All FEMA-funded aerial mapping must be certified by a licensed professional or certified photogrammetrist. |
| 54 | 7/31/2013 | Implemented with all new flood risk projects initiated | H&H Analyses | Working Standard | Where flood elevations are produced from a hydraulic model, they can be published as BFEs unless the responsible engineer |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------|---------------------|---|
| | | in Fiscal Year2013 | | | documents why they should not be issued. |
| 56 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Alluvial Fan | Program Standard | Written approval from the FEMA Regional Risk Analysis Branch Chief regarding the alluvial fan methodology must be obtained before the commencement of full analysis. To inform this decision, sufficient field data and analysis and records of community engagement relative to the scope and methodology must be provided. |
| 57 | 5/31/2016 | Existing standard Already implemented | Engineering | Program Standard | The regulatory products and non-regulatory flood risk products must be based on H&H or coastal analyses using existing ground conditions in the watershed and floodplain. The multiple profile and floodway runs must have the same physical characteristics in common for existing ground conditions. However, a community may choose to include flood hazard information that is based on future conditions on a FIRM (shown as shaded Zone X); in an FIS Report; or non-regulatory flood risk products in addition to the existing- conditions. |
| 59 | 11/1/2009 | Existing standard Already implemented | H&H Analyses | Working Standard | Hydrologic and hydraulic analyses must be calibrated using data from well- documented flood events, if available. |
| 61 | 11/1/2009 | Existing standard Already implemented | Engineering | Program Standard | Engineering analyses must be documented and easily reproducible and must include study methods, reasoning for method selection, input data and parameters, sources of data results, and justifications for major changes in computed flood hazard parameters. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------------------------------|---------------------|--|
| 62 | 4/11/2019 | Effective immediately | H&H Analyses | Program Standard | New or updated flood hazard data used for the regulatory products must be supported by modeling and/or sound engineering judgment. All regulatory products must be in agreement. |
| 65 | 11/1/2009 | Existing standard Already implemented | Base Flood Elevations (BFEs) | Working Standard | BFEs must agree with those of other contiguous studies of the same flooding source within 0.5 foot, unless it is demonstrated that it would not be appropriate. Please see 44 C.F.R. § 65.6(a)(2). |
| 66 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Each significant split or diverted flow path modeled in 1D and mapped as Zone AE or AH must be plotted with individual Flood Profiles. |
| 69 | 12/21/2020 | Effective Immediately | Floodway | Program Standard | Floodway surcharge values must be less than or equal to 1.0 foot. If the state (or other jurisdiction) has established more stringent regulations, these regulations take precedence over the NFIP regulatory standard. Further reduction of maximum allowable surcharge limits can be used if required or requested and approved by the communities impacted. |
| 70 | 11/1/2009 | Existing standard Already implemented | Floodway | Working Standard | If a stream forms the boundary between two or more states and/or tribes, either the 1.0-foot maximum allowable rise criterion or existing floodway agreements between the parties shall be used. |
| 71 | 11/30/2019 | For all projects where the engineering work has not yet begun | Floodway | Working Standard | New or revised floodway data must match any effective floodways at the limits of the Flood Risk Project. |
| 73 | 12/21/2020 | Effective Immediately | Floodway | Working Standard | A methodology based on equitable consideration of both overbanks |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|--|
| | | | | | must be used to establish the minimal regulatory floodway. Variations to this approach must be made in coordination with FEMA and the impacted communities. |
| 74 | 4/11/2019 | Effective immediately | H&H Analyses | Program Standard | The hydrologic, hydraulic, and coastal analyses and the published regulatory products must be certified by a registered professional engineer. |
| 75 | 12/21/2020 | Effective Immediately | FIS Tables | Working Standard | For each stream where a floodway was determined under the scope of work, a Floodway Data Table compliant with the FIS Report Technical Reference must be prepared as part of the hydraulic analysis. The Floodway Data Table must contain an entry for each lettered, mapped cross section or evaluation line and must include the information outlined in the FIS Report Technical Reference. |
| 76 | 11/1/2009 | Existing standard Already implemented | H&H Analyses | Working Standard | If previously-modeled storage areas are removed or filled, the models must be updated to reflect the loss in storage. |
| 77 | 12/21/2020 | Effective Immediately | Floodway | Working Standard | Floodway computations for tributaries must be developed without consideration of backwater from confluences unless a coincident frequency analysis or detailed historical observations prove otherwise. If either of these exceptions is used, it must be done in coordination with FEMA. |
| 78 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | The water-surface profiles of different flood frequencies modeled in 1D must not cross one another, unless technical justification is provided in coordination with FEMA. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|-----------------------|---------------------|---|
| 79 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Water-surface elevations shown on the Flood Profiles for 1D models shall not rise from an upstream to downstream direction, unless technical justification is provided in coordination with FEMA. |
| 80 | 11/1/2009 | Existing standard Already implemented | Profile Baseline | Working Standard | If a flow path other than the stream centerline is more representative of the direction of flow, the case must be documented and the flow path shown and labeled on the FIRM as the "Profile Baseline". Flow distances in one- dimensional models must be referenced to the profile baseline. |
| 82 | 9/28/2010 | Existing standard Already implemented | Project Management | Program Standard | Final invoices shall not be paid until a TSDN is submitted, and certification is provided that contract or grant requirements are met. |
| 83 | 9/28/2010 | Existing standard Already implemented | Project Planning | Program Standard | The FEMA Regional staff initiating a Flood Risk Project shall first engage all stakeholders in order to fully understand the impacted communities, leverage other FEMA activities in the area, and thereby avoid duplication of benefits through funding to Cooperating Technical Partners. |
| 84 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | H&H Analyses | Program Standard | All riverine engineering Flood Risk Projects shall consist of a hydraulic model with multiple frequencies: 0.2-percent, 1- percent, 2-percent, 4-percent, and 10-percent-annual-chance exceedance events. In addition, the "1-percent plus" flood elevation shall be modeled for all riverine analyses. The 1- percent plus flood elevation is defined as a flood elevation derived by using discharges that |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------|---------------------|---|
| | | | | | include the average predictive error for the regression equation discharge calculation for the Flood Risk Project. This error is then added to the 1-percent annual chance discharge to calculate the new |
| | | | | | 1-percent plus discharge. The upper 84-percent confidence limit is calculated for Gage and rainfall-runoff models for the 1-percent annual chance event. |
| | | | | | The "1-percent plus" flood elevation must be shown on the Flood Profile in the FIS Report to best understand and communicate the uncertainty of the flood elevation. |
| | | | | | The mapping of the "1-percent plus" floodplain is optional and will only be produced when it is determined to be appropriate. |
| 85 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Project Planning | Working Standard | Deviations from standards must be approved by FEMA, tracked for exception reporting, and documented. |
| 86 | 2/1/2007 | Existing standard Already implemented | Coastal - Analysis | Working Standard | For coastal Flood Risk Projects, wave runup analyses shall compute the wave runup elevation as the value exceeded by 2-percent of the runup events. |
| 87 | 5/1/2012 | Existing standard Already implemented | Coastal - Data | Working Standard | For coastal Flood Risk Projects, intermediate data submissions to FEMA are required at key milestones during the coastal analysis process. |
| 88 | 5/1/2012 | Existing standard | Coastal - Analysis | Working Standard | All coastal processes and flooding sources that contribute to the 1-percent- annual-chance flood |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------|---------------------|--|
| | | Already implemented | | | condition both at a regional and local scale must be considered. |
| 89 | 12/21/2020 | Effective Immediately | Coastal - Analysis | Working Standard | For coastal Flood Risk Projects, non- levee coastal structures must be evaluated and the profile adjusted as necessary to reflect expected storm impacts on the structure for the purpose of establishing appropriate risk zones for regulatory products. |
| 90 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013. | Engineering | Program Standard | Methods and models used to evaluate the flood hazard must be technically reliable, must be appropriate for flood conditions and produce reasonable results. All computer models must adhere to 44 C.F.R. § 65.6 (a)(6). |
| 91 | 2/28/2018 | Effective immediately | Coastal - Mapping | Program Standard | For coastal Flood Risk Projects, VE Zones are identified using one or more of the following criteria for the 1-percent flood conditions: The breaking wave height zone occurs where 3-foot or greater wave heights could occur (this is the area where the wave crest profile is 2.1 feet or more above the static water elevation) (REQUIRED) The primary frontal dune zone, as defined in 44 C.F.R. § 59.1 of the NFIP regulations (REQUIRED) The wave runup zone occurs where the (eroded) ground profile is 3.0 feet or more below the Total Water Level, and 3.0 feet of wave runup height |

| SID# | Effective | Implementation | Category | Standard - | Standard |
|------|------------|--|-----------------------|---------------------|---|
| | Date | Description | | Type | occurs in the analysis along the profile (REQUIRED) |
| | | | | | 5. The wave overtopping splash zone is the area landward of the crest of an overtopped barrier, in cases where the potential wave runup exceeds the barrier crest elevation by 3.0 feet or more and exceeds 1.0 cfs/ft (REQUIRED) |
| | | | | | 6. The high-velocity flow zone is landward of the overtopping splash zone (or area on a sloping beach or other shore type), where the product of depth of flow times the flood velocity squared is greater than or equal to 200 ft3/sec2 (OPTIONAL) |
| 92 | 5/1/2012 | Existing standard Already implemented | Coastal | Working Standard | For coastal Flood Risk Projects, regional surge and wave model performance shall be successfully validated for the Flood Risk Project area. |
| 93 | 11/1/2004 | Existing standard Already implemented | Engineering | Program Standard | Flood Risk Projects shall use the best available, quality-assured data that meets the needs of the study methodology. |
| 96 | 12/21/2020 | Effective Immediately | Coastal - Analysis | Working Standard | Coastal analyses shall not account for future impacts due to long term erosion. Episodic, storm-induced erosion must be included in the flood hazard analysis in establishing appropriate flood hazard zones for regulatory products. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------------------------------|---------------------|---|
| 100 | 4/1/2003 | Existing standard Already implemented | Shallow Flooding | Working Standard | Ponding areas with depths between 1 and 3 feet shall be designated and delineated as Zone AH. |
| 101 | 12/21/2020 | Effective Immediately | Shallow Flooding | Working Standard | Sheet runoff areas shall be delineated as Zone AO with average flooding depths above the ground surface, rounded to the nearest whole foot. |
| 103 | 12/21/2020 | Effective Immediately | PMR | Working Standard | For areas where new or updated regulatory maps are being developed, effective flood hazard information on NFIP maps (i.e., FIRM, FBFM, FHBM) not being updated through a separate flood hazard analysis or floodplain boundary redelineation shall be maintained, either by digitally transforming information from existing NFIP paper maps and / or transferring existing digital data, on the new or updated FIRM. |
| 104 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Redelineation | Working Standard | Redelineation shall only be used when the terrain source data is better than effective and the stream reach is classified as VALID in the CNMS database. |
| 105 | 4/11/2019 | Effective immediately | Base Flood Elevations (BFEs) | Working Standard | BFEs in all areas of the United States must be expressed in feet, except in Puerto Rico, where they may be expressed in meters. |
| 106 | 11/30/2014 | Implemented for all projects beginning data development after effective date | Base Flood Elevations (BFEs) | Working Standard | BFEs for ponding and lacustrine areas must be expressed to the 10th of a foot if they have been calculated to that level of precision; otherwise they should be shown as whole-foot rounded elevations. Unrevised lake and ponding elevations may be converted to 10th foot elevations if supported by technical data on a project-by |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------------------------------|---------------------|---|
| | | | | | project basis in coordination with the FEMA Project Officer. BFEs for coastal flood zones must be shown as whole foot elevations. |
| 107 | 4/11/2019 | Effective immediately | Base Flood Elevations (BFEs) | Working Standard | BFEs must be shown within 1- percent-annual-chance floodplains; the exception shall be for Zone A, Zone V, Zone AO, and Zone A99. |
| 108 | 4/1/2003 | Existing standard Already implemented | Floodway | Working Standard | Regulatory floodways must be mapped within the 1-percent-annual-chance floodplain and must meet the minimum standards outlined in Paragraph 60.3(d)(3) of the NFIP regulations. |
| 109 | 4/1/2003 | Existing standard Already implemented | Floodplain Boundaries | Working Standard | Stream channel boundaries or centerlines must be shown within the identified 1-percent-annual-chance floodplain; if a regulatory floodway is developed, the stream must be shown within the regulatory floodway boundaries. |
| 110 | 4/1/2003 | Existing standard Already implemented | Project Planning | Program Standard | Flooding sources with contributing drainage area less than 1-square mile and/or with an average flood depth of less than one foot shall not be included in the Flood Risk Project scope of work, unless they have been analyzed on the effective FIRM or a justified need is identified during Discovery. |
| 111 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Project Planning | Program Standard | At the conclusion of a flood risk project, all SFHA designations— existing, revised, and new—in the project area must be supported by documentation or agreed to by the community. |
| 112 | 1/10/2010 | Existing standard Already implemented | FBS | Working Standard | For all Flood Risk Projects contracted in 2006 and beyond, all floodplain boundaries for new or revised flooding sources within the |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|---|
| | | | | | PMR footprint shall pass the Floodplain Boundary Standard. |
| | | | | | The flood risk class must be determined for each flooding source to identify what Floodplain Boundary Standard flood risk class must be met and what level of analysis is required. (Refer to Figure 2 on Page 99). |
| 113 | 11/30/2019 | Existing standard | FBS | Working | Risk Characteristics Delineation Reliability of the floodplain boundary per study methodology ¹ |
| 113 | 11/30/2019 | Already | FB3 | Standard | Less Zone A All Other Zones High population and densities within the floodplain and/or |
| | | implemented | | | A high anticipated growth Medium populate and densities within the floodplain and/or |
| | | | | | 8 modest anticipated growth +/- 1/2 contour 90% +/- 1.0 toot / 90% |
| | | | | | C no anticipated growth +/-1/2 contour 85% +/-1.0 root / 85% |
| | | | | | D Undetermined Risk, likely subject to flooding N/A N/A |
| | | | | | E Minimal risk of flooding; area not studied N/A N/A 1 The difference between the ground elevation (defined from topographic data) and the computed flood elevation |
| 114 | 1/10/2010 | Existing standard Already implemented | FBS | Working Standard | A horizontal tolerance of +/- 38 feet will be used to determine the compliance with the vertical tolerances defined for each risk class. This horizontal tolerance will address varying floodplain delineation techniques (automated versus non-automated) and map scale limitations. |
| 115 | 1/10/2010 | Existing standard Already implemented | FBS | Working Standard | For the FBS audit, the terrain data source that was used to create the flood hazard boundary must be used to conduct the audit. |
| 118 | 3/1/2006 | Existing standard Already implemented | Vertical Datum | Program Standard | For areas within the continental United States, all new flood maps and updates must be referenced to NAVD88. |
| 119 | 4/1/2003 | Existing standard | Vertical Datum | Working Standard | If the final average countywide or flooding source-based datum conversion value is less than +/- 0.1-foot, the datum conversion shall |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------------|---------------------|---|
| | | Already implemented | | | be considered to be executed and the flood elevations for those flooding sources on the FIRM, Flood Profiles, and in the FIS Report tables shall not be adjusted. |
| 120 | 4/1/2003 | Existing standard Already implemented | Vertical Datum | Working Standard | The published flood elevations for all flooding sources within a community must be referenced to a single vertical datum. |
| 121 | 4/1/2003 | Existing standard Already implemented | Vertical Datum | Working Standard | The vertical datum conversion factors shall be applied to flood elevations reported on the FIRM, Flood Profiles shown in the FIS Report, and all data tables in the FIS Report that report flood elevations. All unrevised hydraulic models and supporting backup information shall also be clearly labeled in the Technical Support Data Notebook (TSDN) to indicate that the FIRM and FIS Report reflect a datum conversion, and document the process used to determine the applied conversion factor. |
| 122 | 7/31/2013 | Implemented for all projects beginning data development in Fiscal Year 2013 | Vertical Datum | Working Standard | Either a single countywide vertical datum conversion factor or an average flooding source-based conversion factor must be used for a grouping of flooding sources, for individual flooding sources, or for flooding source segments. |
| 123 | 1/1/2013 | Existing standard Already implemented | Vertical Datum | Working Standard | A single countywide vertical datum conversion factor shall be applied when the maximum offset from the average conversion factor does not exceed 0.25- foot. |
| 124 | 7/31/2013 | Implemented for all projects beginning data | Vertical Datum | Working Standard | When calculating a single countywide vertical datum conversion, USGS topographic quadrangle corners falling within the land area of the county must be |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|---|
| | | development in Fiscal Year2013 | | | used to calculate the vertical datum conversion factor. |
| 125 | 7/31/2013 | Implemented for all projects beginning data development in Fiscal Year2013 | Vertical Datum | Working Standard | When a single countywide conversion is not possible, an average vertical datum conversion factor shall be calculated using a flooding source-based method for a grouping of flooding sources, an individual flooding source, or segments of a flooding source. When a flooding source-based conversion is executed, three evenly distributed points along each flooding source (or segment of a flooding source) shall be selected to be included the datum conversion calculation. The maximum offset from the average conversion factor determined for the flooding source, grouping of flooding sources or flooding source segment may not exceed 0.25-foot. |
| 126 | 1/1/2013 | Existing standard Already implemented | Vertical Datum | Working Standard | All flood elevations must be tied in when performing datum conversions. |
| 127 | 1/1/2013 | Existing standard Already implemented | Flood Insurance Study (FIS) Tables | Working Standard | The datum conversion factors (countywide or stream-based) must be clearly documented in the FIS Report tables. |
| 128 | 12/21/2020 | Effective Immediately | 2D Models | Working Standard | For floodplains mapped from 2D models, BFE lines on the FIRM must match modeled water surface elevations and must be plotted at intervals sufficient to interpolate accurate BFEs in between BFE lines. If this is not possible, separate Flood Profiles for significant flow paths and/or FIS Report inserts must also be created. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|--|
| 131 | 11/1/2009 | Existing standard Already implemented | 2D Models | Working Standard | All non-conveyance areas considered in the model must be mapped. |
| 132 | 11/1/2009 | Existing standard Already implemented | Floodway | Working Standard | The regulatory floodway must be terminated at the boundary of the VE or V Zone, or where the mean high tide exceeds the 1-percentannual-chance riverine flood elevation, whichever occurs further upstream. |
| 133 | 11/1/2009 | Existing standard Already implemented | Floodplain Boundaries | Program Standard | Floodplain boundaries of the 1- percent-annual-chance flood must be delineated. If it is calculated, the 0.2-percent-annual-chance flood must be delineated. |
| 134 | 6/17/2011 | Existing standard Already implemented | Redelineation | Working Standard | If the re-delineation topographic data indicates that the effective hydraulic analyses are no longer valid, further actions must be coordinated with the FEMA Project Officer and the CNMS database must be updated. |
| 136 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | National Flood Hazard Layer (NFHL) | Program Standard | RFHL to NFHL submissions must pass NFHL QC checks at submission and study data must be submitted before the study effective date. |
| 137 | 4/11/2019 | Effective immediately | Coastal - Mapping | Working Standard | Redelineation of coastal flood hazard areas requires the revision of the 1- percent-annual-chance SFHA boundary, the 0.2-percent-annual-chance floodplain boundary, and the primary frontal dune delineation. |
| 138 | 4/11/2019 | Effective immediately | Coastal - Mapping | Working Standard | Coastal Flood Risk Projects shall produce, at a minimum, a 1-percent-annual- chance and 0.2-percent-annual-chance floodplain and 1-percent-annual- chance base |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------------|---------------------|---|
| | | | | | flood elevations that include the contribution of wave effects (including wave setup, wave runup, wave overtopping, and overland wave propagation). |
| 139 | 11/30/2015 | Effective Immediately | Coastal - General | Program Standard | For coastal Flood Risk Projects, where topographic data reflects a temporary disturbance due to recent beach nourishment and/or dune construction projects, and beach berm or dune geometry are not representative of anticipated natural conditions nor have long-standing vegetative cover per Code of Federal Regulations Title 44 C.F.R. § 65.11, the data shall be adjusted to be representative of anticipated natural conditions prior to conducting the storm-induced erosion and onshore wave hazard analyses. |
| 140 | 4/1/2003 | Existing standard Already implemented | Shallow Flooding | Working Standard | Shallow flooding areas shall not contain non-SFHA islands based on small scale topographic variations. |
| 141 | 4/1/2003 | Existing standard Already implemented | Ice Jam | Working Standard | In regions of the United States where ice jams are typical, the project shall include investigation of historical floods for evidence of ice-jam contribution and coordination of the methodology with the impacted communities and State as part of the Discovery process. |
| 142 | 4/1/2003 | Existing standard Already implemented | Ice Jam | Working Standard | Where ice jams occur, backwater effects must be considered. |
| 143 | 4/1/2003 | Existing standard Already implemented | Ice Jam | Working Standard | The appropriate methodology for the floodway designation in areas mapped with an ice-jam analysis |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|--|
| | | | | | shall be determined in coordination with the community. |
| 145 | 1/1/2013 | Existing standard Already implemented | Flood Insurance Study (FIS) Report | Working Standard | A transect location map must be provided in the FIS Report narrative if transects are not shown on the FIRM. |
| 146 | 2/17/2000 | Existing standard Already implemented | Coordination | Working Standard | FEMA must be notified of any potential floodplain management violations identified through the submittal of new or revised flood hazard data. Pending mapping changes affected by the potential violation will be suspended until the issue is resolved. |
| 147 | 4/1/2003 | Existing standard Already implemented | Base Map | Working Standard | The minimum resolution requirement for raster data files (ortho-imagery) is 1- meter ground distance. |
| 148 | 4/1/2003 | Existing standard Already implemented | Base Map | Working Standard | The minimum horizontal positional accuracy for new FIRM base map hydrographic and transportation features is the NSSDA radial accuracy of 38 feet. |
| 149 | 4/1/2003 | Existing standard Already implemented | Base Map | Working Standard | The base map used for the FIRM must clearly show sufficient current ground features to enable clear interpretation of the flood hazard data displayed on the base map. |
| 150 | 4/1/2003 | Existing standard Already implemented | Map Format and Layout | Working Standard | The FIRM paneling scheme shall follow that used by the USGS for the 7.5- minute-series quadrangle, or subdivisions thereof. |
| 151 | 4/1/2003 | Existing standard Already implemented | Map Format and Layout | Working Standard | All digital FIRMs must be oriented so that grid north points to the top of the map sheet. |
| 152 | 8/23/2005 | Existing standard | GDC | Program Standard | Geospatial data for use in Flood Risk Projects must be coordinated, |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|--|
| | | Already implemented | | | collected, documented and reported with standardized, complete and current information in compliance with federal geospatial data reporting standards. |
| 153 | 1/1/2013 | Existing standard Already implemented | GDC | Working Standard | Details of cost, leverage, and project scope must be reported to FEMA's geospatial data tracking systems. |
| 154 | 8/23/2005 | Existing standard Already implemented | GDC | Program Standard | All unnecessary duplication of federal, state or local mapping efforts must be avoided. |
| 155 | 1/1/2011 | Existing standard Already implemented | GDC | Working Standard | State Geospatial Data Coordination Procedures and Points of Contact must be reported to FEMA as new sources of federal or state data are identified. |
| 157 | 1/1/2011 | Existing standard Already implemented | Project Planning | Program Standard | FEMA will not provide funding for new base map data collection as part of a specific Flood Risk Project. |
| 158 | 8/23/2005 | Existing standard Already implemented | Elevation Data | Program Standard | Elevation data created using FEMA funding must allow unlimited free distribution by FEMA and partners. |
| 161 | 1/1/2013 | Existing standard Already implemented | Data Capture | Program Standard | All deliverables and supporting data must be uploaded to the MIP as each workflow step is completed for each project task. If any of these data are modified subsequently, the revised data must be uploaded to the MIP before the effective date of the FIRMs or the completion of the project, if no regulatory products are produced. |
| 163 | 4/1/2003 | Existing standard | Prelim Distribution | Working Standard | The Preliminary digital FIRM Database shall be distributed for |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|--|
| | | Already implemented | | | review with the Preliminary FIRM and FIS Report. |
| 164 | 4/1/2003 | Existing standard Already implemented | Prelim Distribution | Program Standard | The FEMA Regional office must approve distribution of preliminary and revised preliminary products. |
| 165 | 4/1/2003 | Existing standard Already implemented | Prelim Distribution | Program Standard | Preliminary/Revised Preliminary copies of the FIRM, FIS Report, SOMAs (if modified during Revised Preliminary), and letters shall be distributed to the community CEO and floodplain administrator; State NFIP Coordinator; and other identified stakeholders as appropriate. |
| 166 | 4/1/2003 | Existing standard Already implemented | Prelim Distribution | Working Standard | Following issuance of the preliminary copies of the FIRM and FIS Report, FEMA shall provide a period (usually 30 days) for community officials, community residents, and other interested parties / stakeholders to review the preliminary copies of the FIRM and FIS Report. |
| 168 | 4/11/2019 | Effective immediately | SOMA | Program Standard | If the community is located on revised FIRM panels, all valid LOMCs for this community shall be reviewed and categorized in the MIP SOMA Workbench. The Preliminary and Final SOMA is distributed to the community for review and comment if there are LOMCs that fall on revised FIRM panels. The MIP SOMA Workbench is updated and the SOMA and/or Revalidation Letter output is reviewed in advance of the following distributions: Preliminary Issuance, Revised Preliminary Issuance, |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|--|
| | | | | | Letter of Final Determination, andRevalidation Letter. |
| 169 | 11/30/2016 | Effective immediately | LOMR Incorporation | Program Standard | All valid LOMRs that are effective during post-preliminary for a study or PMR prior to the LOMC cutoff date (which is 60 days before the project's LFD date) must be incorporated into the new FIS Report, FIRM, and FIRM Database. LOMRs that are issued after this time must be re-issued after the revised FIRM date, if they are still valid. |
| 172 | 10/1/2011 | Existing standard Already implemented | Prelim Distribution | Working Standard | All Preliminary Title Blocks shall be stamped "Preliminary" or "Revised Preliminary" as appropriate. |
| 173 | 10/1/2011 | Existing standard Already implemented | Prelim Distribution | Working Standard | No effective date or map revised date shall be shown on the preliminary or revised preliminary title blocks. |
| 174 | 7/31/2013 | For all ongoing and newly initiated projects | Data Capture | Program Standard | Certification of completeness of all submitted data for FEMA-funded Flood Risk Projects must be provided when work on a project is complete. (via the certification forms.) |
| 175 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | The preliminary FIS Report must be submitted with the other required submittals at the completion of the Floodplain Mapping task. |
| 176 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | All spatial data must be georeferenced, have a standard coordinate system and projection defined and documented, and specify the horizontal and vertical datums used. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------|---------------------|---|
| 178 | 2/28/2018 | Effective immediately | Data Capture | Working Standard | For each data development task prior to the Draft FIRM Database Capture MIP task, the data for flooding sources receiving new or revised flood hazard analyses must be submitted in accordance with the FIRM Database Submittal Table and following the schema of the FIRM Database Technical Reference. Non-FEMA funded external data studies are excluded from this requirement. Data submittals for all new, revised, and existing analyses must include the S_Submittal_Info table compliant with the schema in the FIRM Database Technical Reference. |
| 180 | 5/31/2016 | Existing standard Already implemented | Data Capture | Working Standard | All regulatory product deliverables, non-regulatory flood risk product deliverables, and relevant supporting data must be submitted in one of the acceptable file format(s) and in the directory structure outlined in the Data Capture Technical Reference. If data are collected that are not specifically mentioned in the Data Capture Technical Reference but are relevant to the project, or data is obtained from existing flood hazard analyses, those data must be submitted, but do not have to follow the file format and directory structure requirements. |
| 181 | 5/31/2016 | Existing standard Already implemented | Data Capture | Working Standard | A metadata file in XML format must be submitted that complies with the Metadata Profiles Technical Reference for each applicable task for regulatory product deliverables, non-regulatoryflood risk product deliverables, or relevant supporting data submittals. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------|---------------------|---|
| 182 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | Copies of all project-related data must be retained for a period of three years. |
| 183 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | A file that compiles general correspondence must be submitted for each project task. |
| 184 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | Any supporting data that are tiled must have an accompanying index spatial file. Tiles must be topologically correct and have only one part and cannot self-intersect (must be simple). Adjacent tiles must not overlap or have gaps between them. |
| 185 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | PDF files must be created using the source file (e.g., MS Word file). Created PDF files must allow text to be copied and pasted to another document. |
| 186 | 1/1/2013 | Existing standard Already implemented | Data Capture | Working Standard | A narrative must be submitted that summarizes the work performed (streams analyzed, type of Flood Risk Project, etc.), direction from FEMA, assumptions and issues, and any information that may be useful for the other mapping partners working on the project or subsequent users of the Flood Risk Project backup data for each task. |
| 187 | 2/28/2018 | Effective immediately | Data Capture | Program Standard | All relevant data must be submitted that fully documents the flood risk project including the engineering analyses, input and output files for the models used; a report that documents the methodology, assumptions, and data used in the engineering analyses; applicable draft FIS Report text sections, tables, graphics, Flood Profiles; |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------------------|---------------------|---|
| | | Becompain | | , jpc | quality records in the form of (at a minimum) QR3 Self-Certification Forms, and QR3, QR5, QR7, & QR8 Checklists; input and output files and quality checklists associated with the flood risk products and datasets; and any other backup data. These data comprise the TSDN. |
| 188 | 4/1/2003 | Existing standard Already implemented | Base Map | Working Standard | FEMA must be able to distribute the base map data and floodplain information freely to the public in hardcopy and digital formats. |
| 189 | 4/1/2003 | Existing standard Already implemented | CNMS | Working Standard | Effective and revised flood hazard data must be tied in with no discontinuities. Where discontinuities cannot be resolved, they must be documented in the CNMS database, but not until the discontinuity is accepted by the FEMA Project Officer. |
| 190 | 4/1/2003 | Existing standard Already implemented | Quality Management | Program Standard | All technical review comments associated with the FIS Report, FIRM, or FIRM database must be fully addressed and resolutions must be fully documented. |
| 192 | 5/13/2002 | Existing standard Already implemented | Project Initiation | Working Standard | Unique FEMA Case Numbers (e.g., 01-05-1234R) shall be assigned for all initiated LOMCs and Flood Risk Projects. |
| 193 | 2/28/2018 | Effective immediately | Post- Preliminary Deliverables | Program Standard | For Flood Risk Projects, the authoritative source for creating and publishing Flood Hazard Determination Notices that result in new or modified flood hazard information is the MIP. For LOMRs, it is the Flood Hazard Determinations-on-the-Web tool. |
| 195 | 4/1/2003 | Existing standard | Letter of Map Change (LOMC) | Working Standard | LOMC requestors shall submit requests, including the required review and processing fee if |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------------------------|---------------------|---|
| | | Already implemented | | | applicable, to the appropriate processing address. The address is provided in the application forms package that must be used in preparing a LOMC request for submittal. |
| 196 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Program Standard | If required by state law, state concurrence with the LOMR or CLOMR shall be required. |
| 197 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | Upon receipt of a LOMC, the following shall be done: Make an initial determination as to the expected processing procedure Assign a case number Create a case file Enter the request into the MIP Record the date of receipt |
| 198 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | When processing a LOMC, any ongoing, past, or future map actions affecting the case shall be taken into consideration. |
| 199 | 2/28/2018 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | LOMC submittals must include certifications by a licensed professional authorized to certify the data under state law, except when LiDAR is provided to satisfy the lowest adjacent grade (LAG) requirements for LOMAs. |
| 200 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | A LOMR or CLOMR must be supported by a topographic map or digital data that includes all relevant information required by FEMA. |
| 201 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | A LOMR or CLOMR must include proposed floodplain and/or floodway boundary delineations shown on an annotated FIRM. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------------------------|---------------------|--|
| 202 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | All LOMRs including new grading or structures must include certified asbuilt construction plans, grading plans, or survey data. |
| 203 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | If the discharges in the effective FIS Report are not used in the LOMR or CLOMR submittal, the revision requester shall provide sufficient data to support the use of the new discharges for the 1-percent-annual-chance flood and other published flood frequencies. |
| 204 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | A LOMR or CLOMR in riverine areas must submit a model duplicating the effective hydraulic model (multiple profile and floodway if appropriate). The revision requester shall use it to establish the baseline condition unless an existing conditions hydraulic model is required. |
| 205 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | For a LOMR or CLOMR, an existing conditions hydraulic model is required if the duplicate effective model does not reflect the floodplain conditions prior to the start of the project. |
| 206 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | If the revision is submitted as the result of a project, a post-project revised hydraulic model reflecting as-built conditions must be submitted. |
| 207 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | At a minimum, the analyses and other supporting data provided in support of a revision request must be equivalent to or better than the scientific and technical data employed by FEMA for the preparation of the effective analyses. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------------------------|---------------------|--|
| 210 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Working Standard | For floodplain boundary revisions based on new or more detailed topographic information, the revision requester will not be required to submit revised hydraulic analyses unless the changes in ground contours have significantly affected the geometry of cross sections used for the effective FIS Report and FIRM or have altered effective-flow areas. |
| 213 | 4/1/2003 | Existing standard Already implemented | Notice-to-User | Program Standard | During the Notice-to User revision process, approval of the action taken shall be obtained from the FEMA HQ due process lead and the decision must be documented in writing. |
| 214 | 5/31/2016 | Effective immediately | Notice-to-User | Program Standard | During the Notice-to-User revision process: • the FIS, FIRM panel(s), FIRM database, and NFHL must be corrected as appropriate; • the corrected components must indicate the appropriate date; • the corrected components must be distributed to the communities affected by the correction; and • the corrected components must be updated on the MSC site. |
| 215 | 11/30/2019 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | Conditional LOMCs are subject to the same standards of a LOMA, LOMR-F, or LOMR except: Because Conditional LOMCs are based on proposed construction, as-built information is not required. The Conditional Comment Documents that are issued by |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------------------------|---------------------|---|
| | | | | | FEMA do not amend or revise the effective FHBM or FIRM. |
| | | | | | Conditional LOMRs and CLOMR- Fs must demonstrate compliance with the Endangered Species Act. |
| 216 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | A letter shall be mailed to the requester acknowledging receipt of the LOMC request within three business days of receiving the data. |
| 217 | 11/30/2019 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | If all information is not received within 90 days from the date of the request for additional data, the processing of the LOMC shall be suspended. |
| 218 | 11/30/2019 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | LOMA, CLOMA, LOMR-F, CLOMR-F, LOMR and CLOMR determinations must be issued based on the effective FIRM and FIS for a community and may not be issued based on preliminary data for a FEMA-contracted Flood Risk Project or community-initiated map revision. However, if the effective SFHA does not have BFEs or flood depths established and the preliminary data is the best available, a one-percent-annual chance flood hazard water surface elevation may be calculated during LOMA, CLOMA, LOMR-F, or CLOMR-F reviews using data from these sources. |
| 219 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | Following the preparation of the LOMC determination document, the LOMC shall be included in the list of determinations that is to be sent to FEMA for official approval. Following approval, the requester shall be provided with FEMA's final determination. A copy of the LOMC determination document shall also be sent to the community CEO and |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------------------------------|---------------------|--|
| | | | | | floodplain administrator and to the requester when applicable. |
| 220 | 11/30/2019 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | The reviews of LOMC requests shall be processed in accordance with the Code of Federal Regulations Title 44 C.F.R. Parts 65, 67, 70, and 72. |
| 222 | 7/31/2013 | Applicable to all ongoing and future Flood Risk Projects | Letter of Map Revision (LOMR) | Working Standard | When processing a LOMR for a FIRM that has been modernized (i.e., has a FIRM database), the map (FIRM and/or FBFM panels), Flood Profile, and data tables (i.e., Floodway Data and Summary of Discharges) enclosures shall be prepared in accordance with the FIRM Panel Technical Reference and the FIS Report Technical Reference. If the FIRM that is having a LOMR issued for it has not been modernized, either the current standards may be used (as indicated in the FIRM panel and FIS Report Technical References), or the standards in effect when the effective map and attachments were created. |
| 223 | 7/31/2013 | Implemented for LOMCs processed after the effective date | Letter of Map Revision (LOMR) | Working Standard | If a LOMR changes stillwater elevations, transect data, flood elevations, discharges, and/or floodway information, the supporting information in the FIS Report and FIRM Database shall be revised as necessary. |
| 224 | 4/1/2003 | Existing standard Already implemented | Special Conversions | Working Standard | For all Special Conversions, coordination and documentation activities shall be performed to convert the community to the Regular Phase of the NFIP. |
| 225 | 4/1/2003 | Existing standard Already implemented | Special Conversions | Working Standard | FEMA management system databases shall be maintained for Special Conversions. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------------------------|---------------------|---|
| 226 | 11/30/2019 | Effective immediately | Letter of Map Change (LOMC) | Working Standard | LOMC requests involving below- grade crawlspaces constructed within the SFHA shall follow guidance provided in FEMA Technical Bulletin 11. |
| 227 | 11/30/2016 | Effective immediately | Notice-to-User | Program Standard | The Notice-to-Users process shall only be used for corrections of errors or omissions in the FIS Report, FIRM Database, NFHL, or on the FIRM that do not require administrative appeal. The Notice-to-Users revision process shall not change the accreditation status of a levee or the effective date of the FIRM and FIS. |
| 228 | 11/1/2009 | Existing standard Already implemented | Stakeholder Engagement | Working Standard | All regulatory floodway changes must be coordinated with affected community officials and other stakeholders as early as possible. |
| 229 | 12/21/2020 | Effective immediately | Flood Profiles | Working Standard | Flood Profiles shall be plotted as the projection of the stream invert and the flood surface(s) onto the flow path. The plots should show the locations of and clearly label: • Each lettered mapped cross section; • Separately modeled splits and diversions; • Confluences of modeled tributaries, splits, and diversions; • Each stream crossing with symbology depicting the top of road and low chord elevations of modeled bridges and culverts along with the name of the bridge/culvert (e.g., Pine Street); • Extents of modeled hydraulic structures adjacent to the flooding source; |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|---|
| | | | | | Upstream and downstream study limits of the flooding source; |
| | | | | | Extent of backwater or flooding controlling the receiving stream and depiction of the backwater elevation along the profile. |
| 232 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Unless it can be demonstrated that the vertical and horizontal scale of the effective Flood Profiles are inadequate, re-analyzed or redelineated streams must be produced using the same horizontal and vertical scales that were used in the effective Flood Profiles. |
| 234 | 4/1/2003 | Existing standard Already implemented | FIS Report | Working Standard | FIS Reports exceeding 150 pages in length shall be subdivided into two or more volumes. |
| 235 | 12/21/2020 | Existing standard Already implemented | FIS Report | Working Standard | If an FIS Report is published in two or more volumes, no volume shall exceed 100 pages. |
| 236 | 4/1/2003 | Existing standard Already implemented | FIS Report | Working Standard | For multi-volume FIS Reports, a single Table of Contents shall be produced for the entire report and shall be included in all volumes. |
| 237 | 4/1/2003 | Existing standard Already implemented | FIS Report | Working Standard | Preliminary FIS Reports must include a stamp on the cover to indicate the Preliminary status and the date of the Preliminary issuance. |
| 238 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | As outlined in the FIS Report Technical Reference, all numbered sections, tables and figures are required for every FIS Report prepared in compliance with the FIS Report Technical Reference, regardless of whether the topic |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------|---------------------|---|
| | | | | | addressed by that element is applicable to the Flood Risk Project. |
| 239 | 12/8/2011 | Existing standard Already implemented | FIS/FIRM | Working Standard | Table columns and names in the FIS Report must comply with the most current FIS Report Technical Reference unless FEMA Regional approval has been given to retain the prior FIS Report format. |
| 240 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | When revising the FIS Report in compliance with the current FIS Report Technical Reference (as opposed to appending information to the former FIS report format), the FIS Report template must be used. |
| 241 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | References used within the FIS Report text must match the citation listed in the Bibliography and References table. |
| 242 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | FIS Reports created in compliance with the FIS Report Technical Reference must use an "(Author Year)" format for inline citations. |
| 243 | 12/8/2011 | Existing standard Already implemented | FIS/FIRM | Working Standard | If a future conditions analysis is incorporated into the Flood Risk Project, the results shall be included in the FIRM database, FIRM, and FIS Report. |
| 245 | 12/8/2011 | Existing standard Already implemented | FIS Tables | Working Standard | The "Listing of NFIP Jurisdictions" and "Community Map History" tables in the FIS Report shall include all communities that fall within the county or jurisdiction whose FIS Report is being produced. |
| 246 | 12/8/2011 | Existing standard Already implemented | FIS Tables | Working Standard | Communities that have no Special Flood Hazard Areas identified shall be noted in the "Listing of NFIP Jurisdictions" and "Community Map History" FIS Report tables with a footnote. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------|---------------------|---|
| 247 | 12/8/2011 | Existing standard Already implemented | FIS Tables | Working Standard | For FIS Reports produced in compliance with the FIS Report Technical Reference, all accredited levees, PALs, and non-accredited levees must be included in the "Levees" table of the FIS Report. |
| 248 | 12/21/2020 | Effective Immediately | FIS Tables | Working Standard | All lettered or numbered cross sections or evaluation lines must be shown on the Flood Profiles and, if a floodway was computed, must also be shown in the Floodway Data Table. Unlettered cross sections shown on the FIRM are not to be included on the Floodway Data Table or Flood Profiles. |
| 249 | 12/8/2011 | Existing standard Already implemented | FIS Tables | Working Standard | In the "Community Map History" table for FIS Reports produced in compliance with the FIS Report Technical Reference, the "FIRM Revisions Date(s)" column shall include all FHBM and FIRM revisions and must be updated during each revision to reflect the new PMR effective date. All PMR effective dates must be included for the communities that received updated FIRM panels, even if the PMR did not revise all the panels within that community. |
| 250 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | The FIRM Index shall be included in the FIS Report at a size of 11" x 17" for FIS Reports produced in compliance with the FIS Report Technical Reference. |
| 251 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | For FIRM Indexes which require more than one page, the page number shall be indicated in the title block in the following manner: FLOOD INSURANCE RATE MAP INDEX (Sheet 1 of 2). A county locator map shall be added with a |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|---|
| | | | | | rectangle showing the extent of the current FIRM Index sheet. |
| 252 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | For FIRM Indexes produced in compliance with the FIS Report Technical Reference, base map features that must be shown and labeled on the FIRM Index are HUC-8 watersheds and political jurisdictions. Community labels must also include the CID. |
| 253 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | For FIRM Indexes produced in compliance with the current FIS Report Technical Reference, FIRM panels shown on the FIRM Index shall be labeled only with the four-digit panel number and suffix. The effective date must also be included and shall be placed directly beneath the FIRM panel number in "mm/dd/yyyy" format. |
| 254 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | The FIRM Index shall identify unprinted panels with asterisks and footnotes that define the reason(s) for the panel(s) not being printed. |
| 255 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | For FIS Reports produced in compliance with the FIS Report Technical Reference, every note that is shown on the Notes to Users on one or more FIRM panels must be included once in the Notes to Users section in the FIS Report. |
| 256 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Flood Profiles for Zone AE must show data for each of the six standard (10-, 4-, 2-, 1-, 1 percent - plus-, and 0.2 percent -annual-chance) flood events if they were calculated as part of the Flood Risk Project. |
| 257 | 12/8/2011 | Existing standard | FIS Report | Working Standard | The FIS Report deliverable to the MSC must be an unsecured PDF file, with as much searchable text as |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------|---------------------|--|
| | | Already implemented | | | possible, and must be bookmarked in accordance with the direction outlined in the FIS Report Technical Reference. Embedded graphics, where necessary, must have a resolution of 400 dpi. |
| 259 | 4/1/2003 | Existing standard Already implemented | FIS Report | Working Standard | A description of all dams and other non-levee flood protection measures affecting the communities represented in the project area shall be included in the FIS Report. |
| 260 | 4/1/2003 | Existing standard Already implemented | FIS Report | Working Standard | A description of any unusual floodway procedures that deviate from national policy, such as State-imposed or locally imposed surcharge limits of less than 1.0 foot for regulatory floodway, must be listed in the "Floodways" section of the FIS Report. |
| 261 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | Counties that have an effective countywide FIS Report must remain countywide, regardless of whether they are updated to comply with the FIS Report Technical Reference or not. |
| 264 | 12/21/2020 | Effective Immediately | FIS Tables | Working Standard | For cross-sections shown in areas of backwater flooding, elevations in the "Without Floodway" column of the Floodway Data Table shall not include backwater effects. The "Without Floodway" values must include a footnote stating, "Elevation Computed Without Consideration of Backwater Effects From (Source of Flooding)." The words "Backwater Effects" are to be replaced with "Tidal Effects," "Overflow Effects," "Ice Jam Effects," or "Storm Surge Effects," as needed, to reference the appropriate flooding situation. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|--|
| 265 | 12/21/2020 | Effective Immediately | FIS Tables | Working Standard | When a part of a regulatory floodway lies outside the jurisdiction, both the total floodway width, and the width within the jurisdiction, shall be listed in the FIRM database and Floodway Data Table unless the stream forms the boundary between two states with differing surcharge requirements. |
| 267 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | Only one stream shall be shown on any given Flood Profile panel. |
| 268 | 11/30/2016 | Effective immediately | FIS Report | Working Standard | All communities addressed by the FIS (typically the county and all communities within) must be sent or provided a means to access the new FIS Report during distribution of the final products, regardless of whether they are affected by the new Flood Risk Project or are outside the project area. |
| 270 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | On the Flood Profiles for tributary streams, the 1-percent-annual-chance flood backwater from the main watercourse or water body shall be labeled as "Backwater From (MainStream Name)." |
| 270 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | On the Flood Profiles for tributary streams, the 1-percent-annual-chance flood backwater from the main watercourse or water body shall be labeled as "Backwater From (MainStream Name)." |
| 272 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | A vertical elevation scale of 1 inch equals 1, 2, 5, 10, or 20 feet is to be used for the Flood Profiles. Elevations shall be labeled on the left side of the grid at 1-inch intervals within the profile elevation range. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------------|---------------------|--|
| 273 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | The 1-percent-annual-chance Flood Profile plots shall agree with the distances and elevations shown in the Floodway Data Table, with a maximum tolerance of 1/20-inch on the printed Flood Profile panel. Other features shown on the Profiles, such as cross-section labels and hydraulic structures, shall also be accurately plotted to within the 1/20-inch tolerance. |
| 274 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | The horizontal and vertical scales of the Flood Profiles for newly studied streams shall be chosen so that that Flood Profile slopes are reasonable and can be easily interpreted by the user. |
| 275 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | The horizontal scale of the Flood Profile shall be labeled at 1-inch intervals along the bottom edge of the grid and legend box. |
| 277 | 12/8/2011 | Existing standard Already implemented | FIS Report | Working Standard | For FIS Reports prepared in compliance with the FIS Report Technical Reference, any information that was included in Section 10 of a previous FIS Report using an approach known as "Revisions by Addendum" shall be incorporated into the relevant sections and tables of the current FIS Report. |
| 278 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | River stationing is to be referenced from a physical location such as a confluence or structure. |
| 279 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Downstream flood elevations are to be oriented towards the left edge of the Flood Profile. |
| 280 | 12/21/2020 | Effective Immediately | Flood Profiles | Working Standard | Stream distances reported in the Floodway Data Tables, Flood |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|--|
| | | | | | Profiles, and FIRM database must be measured along the profile baseline. |
| 281 | 4/1/2003 | Existing standard Already implemented | Flood Profiles | Working Standard | Distance and elevation units used on a Flood Profile must be consistent with the units used in the Floodway Data Table. |
| 282 | 1/1/2013 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | All FIRM panel symbology and labels must be clear and readable and clearly communicate the flood hazard information needed for insurance and mitigation purposes. |
| 283 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | The FIRM panel "Notes to Users" section must contain notes referring the user to the FIS Report for a detailed legend and FIRM Index, to the MSC website for other digital products providing the NFIP contact information, and to the base map data source. |
| 284 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | The LiMWA note in the FIRM panel "Notes to Users" section shall include a legend. |
| 285 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | All elements of the FIRM title block must be present and must adhere to the specifications in the FIRM Panel Technical Reference. |
| 286 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | The jurisdiction names in the FIRM panel title block must include, at a minimum, the jurisdiction prefix (e.g., city, town, or village), jurisdiction name, and full state name. FIRM panels for individual jurisdictions shall also include the name of the county, except for jurisdictions that are officially classified as "Independent." |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|--|
| 287 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | When each new edition of a FIRM panel is prepared, the suffix for each revised FIRM panel shall be changed to the next alphabetical letter while skipping the letters "I" and "O". For first time countywide or partial countywide FIRMs, the map suffix should be one letter higher than the highest suffix of all jurisdictions included. |
| 288 | 4/18/2002 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | FIRM panels, FIRM Indexes, and FIS Reports shall follow the ID numbering schemes outlined in the FIRM Panel and FIS Report Technical References. |
| 289 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | The FIRM panel map collar must include a North Arrow, Scale Bar, and map projection and datum information. |
| 290 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | First-time modernized FIRM panels must be in countywide format unless the FIRM is for a multi-county jurisdiction that will retain its community-based FIRM format. |
| 291 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Program Standard | A determination to use Partial-Countywide FIRM panel and FIRM Database format must be coordinated with and approved by the FEMA Region and FEMA Headquarters. |
| 292 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | If partial countywide FIRM panel mapping is pursued, the FIRM title block will list all of the jurisdictions on the FIRM panel, but the ones not included in the partial countywide mapping will be noted as having their FIRMs and FIS Reports published separately. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|---|
| 294 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | For partial countywide FIRM panel mapping, panel numbers must be assigned for the entire county, just as for a full countywide panel layout. Numbering of countywide FIRM panels must consider the numbering of the existing panels so as not to create two panels with the same number (e.g. 0250). If there would be two panels with the same number, start countywide numbering by going up to the first even thousand above the highest existing FIRM panel number. |
| 295 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | When partial countywide mapping is processed, any existing community-based FIRM panels that overlap the partial countywide must be reissued with the overlapping area blanked out and the blanked-out area must include a note referring the users to the partial countywide FIRM. |
| 296 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | If a FIRM revision is being processed when there is a separate FBFM, the two maps should be combined into the new format FIRM using the new flood zone designations and the FBFM shall no longer exist as a separate map. |
| 297 | 1/1/2013 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | On FIRM panels, symbolization and labeling of all base map, hydraulic, and flood theme features must be standardized as shown in the FIRM Panel Technical Reference. |
| 300 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | All FIRM panels shall be printed to full page, portrait orientation, ARCH D map frames with a trimmed paper size of: Height 36" x Width 24". The title block must appear in the bottom right corner and be 5.3-inches wide by 9-inches in height. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------------------|---------------------|---|
| 301 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | FIRM panels must include a white border on all sides and must contain a title block on the bottom right corner, a legend, a Notes to Users section, and a Panel Locator section across the bottom of the panel, as outlined in the FIRM Panel Technical Reference. |
| 304 | 10/1/2011 | Existing standard Already implemented | Base Map | Working Standard | All raster base maps used for FIRM panel preparation must be georeferenced and orthorectified. |
| 305 | 10/1/2011 | Existing standard Already implemented | Map Format and Layout | Working Standard | A countywide FIRM must provide seamless spatial base map and flood hazard coverage within the county area for all jurisdictions shown on the FIRM. |
| 306 | 10/1/2011 | Existing standard Already implemented | Floodplain Boundaries | Working Standard | Any existing mismatches in floodplains and flood hazard information between communities and counties must be resolved as part of a FIS Report/FIRM update. |
| 307 | 10/1/2011 | Existing standard Already implemented | Base Map | Working Standard | Raster base map image(s) used for FIRM panel preparation shall cover the entire jurisdiction being analyzed except in the cases of open water areas and/or areas that may be restricted due to security concerns. |
| 308 | 10/1/2011 | Existing standard Already implemented | Base Map | Working Standard | The FIRM base map is the horizontal reference data shown on the FIRM to assist in interpreting the areas impacted by the flood risk information shown. The term base map does not include topographic or elevation data. The following types of base map features must be depicted on the |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|--|
| | | | | | FIRM panel if they occur within the community: |
| | | | | | Transportation features, including roads and railroads, hydrographic features, hydraulic structures |
| | | | | | Boundaries that identify county and State boundaries, corporate limits, ETJ areas, military lands, and tribal lands, and U.S. PLSS features. |
| 309 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Any transportation feature shown and labeled on a Flood Profile shall be labeled on the FIRM panel. |
| 310 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Primary roads, as defined by the MAF/TIGER data, shall be shown and labeled on the FIRM panel. |
| 311 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | On FIRM panels, all hydrographic features (streams, lakes, ponds, bays, and oceans) that have an identified flood hazard associated with them shall be labeled. |
| 312 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013. | Profile Baseline | Working Standard | A profile baseline must be shown on FIRM panels for all flooding sources with profiles or otherwise established riverine BFEs (static elevations excluded), and for modeled riverine Zone A areas. |
| 313 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | In areas of riverine flooding where no profile baseline is available, but a flood hazard has been identified, the bank or centerline representation of the hydrographic feature must be shown on vector-based FIRM panels. |
| 315 | 10/1/2011 | Existing standard | Levee | Working Standard | All levees stored in the FIRM Database shall be labeled and symbolized on the FIRM panel as |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|--|
| | | Already implemented | | | outlined in the FIRM Panel Technical Reference, with the appropriate accreditation status noted. |
| 316 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Hydraulic structures other than levees shall be labeled on the FIRM panel only if shown on the Flood Profile of the FIS Report. The label name must match what is shown on the Flood Profile. If 1 percent, 0.2 percent -annual-chance- flood discharge, and/or floodway are contained in the structure, a note must be placed on the FIRM panel near the feature to refer to the highest contained discharge. |
| 317 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | All political entities (including Extra- Territorial Jurisdictions) shall be depicted and labeled on the FIRM panel with the appropriate jurisdiction names and CIDs or area designator. |
| 319 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Any area shown on the FIRM panel as an Area Not Included shall be labeled with the entity's name and the notation "Area Not Included". |
| 320 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Vector base map features are not required on the FIRM in Areas Not Included. |
| 322 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | On FIRM panels, when boundaries of different types are coincident with each other or with base map features, only the highest priority feature shall be shown. |
| 323 | 10/1/2011 | Existing standard Already implemented | Projections and Coordinate Systems | Working Standard | FIRM panels must show horizontal reference grids and corner coordinates selected, displayed and labeled as directed in the FIRM Panel Technical Reference. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------|---------------------|---|
| 332 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | If a printed FIRM panel falls within the area of a smaller-scale panel that is also printed, the smaller-scale panel shall show a breakout note in the blank area represented by the larger-scale panel (the breakout panel area). This note is placed in the center of the breakout panel area and specifies the larger-scale panel's map number and scale. The suffixes shall not be used in breakout panel notes (to avoid unnecessary updates in PMRs). |
| 334 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Each flood hazard zone shall be bounded by a SFHA/FLOOD ZONE BOUNDARY line type when adjacent to another flood hazard area of a different type or elevation. |
| 335 | 12/21/2020 | Effective Immediately | Floodway | Working Standard | Regulatory floodways shall be shown on the FIRM panel within the SFHA and, at lettered or numbered cross-section and evaluation line locations, floodway widths must agree with the values shown on the FDT in the FIS Report and the FIRM Database tables, within a maximum tolerance of 5 percent of the map scale or 5 percent of the distance, whichever is greater. |
| 338 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Special Flood Hazard Areas shall be labeled at least once with the flood zone on a FIRM panel and, if appropriate, with the static elevation, velocity, or depth. |
| 339 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Zone X areas that represent future conditions or areas protected by accredited levees shall be labeled on the FIRM panel in accordance with the FIRM Panel Technical Reference. |
| 340 | 10/1/2011 | Existing standard | FIRM Graphic Standards | Working Standard | SFHAs with assigned static elevations, depths, or velocities |

| 015 " | Effective | Implementation | 0.1.1.1. | Standard | 0 |
|-------|-----------|--|-----------------|---------------------|---|
| SID# | Date | Description | Category | Туре | Standard |
| | | Already implemented | | | shall have their static BFE, depth, or velocity value labeled on the FIRM panels in accordance with the FIRM Panel Technical Reference. |
| 341 | 10/1/2011 | Existing standard Already implemented | BFEs | Working Standard | All BFE lines stored in the FIRM Database must be shown on FIRM panels. |
| 342 | 10/1/2011 | Existing standard Already implemented | Cross- Sections | Working Standard | Cross sections stored in the FIRM Database must be shown on the FIRM panels if they are attributed as one of the following line types: LETTERED, MAPPED and NOT LETTERED, MAPPED. |
| 343 | 10/1/2011 | Existing standard Already implemented | Cross- Sections | Working Standard | On FIRM panels and in FIRM Databases, lettered or numbered cross sections for each stream analyzed by detailed methods shall be labeled alphabetically or numerically from downstream to upstream. |
| 345 | 10/1/2011 | Existing standard Already implemented | Cross- Sections | Working Standard | On FIRM panels, lettered or numbered cross sections shall be symbolized and labeled as outlined in the FIRM Panel Technical Reference. |
| 346 | 10/1/2011 | Existing standard Already implemented | Cross- Sections | Working Standard | On FIRM panels, all LETTERED, MAPPED and NOT LETTERED, MAPPED cross sections must be labeled with the regulatory WSEL value, rounded to the nearest tenth of a foot. All lettered or numbered cross section WSEL values must match the FDT in the FIS Report. |
| 347 | 4/11/2019 | Effective immediately. | Cross- Sections | Working Standard | If unlettered cross sections and BFEs cannot be shown on the FIRM panel because of crowding due to steep terrain, a note shall be placed referring the user to the Flood Profiles in the FIS Report per the |

|------|-------------------|---|--|---------------------|--|
| | | | | | specifications listed in the FIRM Panel Technical Reference. |
| 348 | 10/1/2011 | Existing standard Already implemented | Cross- Sections | Working Standard | In the event that a cross section contains multiple water surface elevations the cross section shall be segmented and each segment labeled on the FIRM panel with its corresponding WSEL value and a hexagon. |
| 349 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | On the FIRM panels and in the FIRM Database, LIMIT LINES shall be placed at the beginning and at the end of flow in every area analyzed by detailed methods and shall be depicted as specified in the FIRM Panel Technical Reference. |
| 351 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | If transect lines are shown in the FIRM database, they must be delineated and labeled on the FIRM panels. |
| 352 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | The LiMWA must be included in the FIRM Database if it has been calculated as part of a coastal Flood Risk Project and shall normally be shown on FIRM panels. All community requests to have the LiMWA removed from the FIRM must be received at least two months prior to the issuance of the LFD. |
| 356 | 2/15/2019 | Effective for all studies not submitted to QR5 by 12/21/2018 that do not have an effective date prior to 01/26/2019 | Coastal Barrier Resources System | Working Standard | All FIRM panel data, notes, labels, and symbolization associated with CBRS and Otherwise Protected Areas should be removed from regulatory products with the exception of the following Note to Users which shall be included on all FIRM Panels in communities identified by the FWS as potentially containing CBRS areas: Coastal Barrier Resources System (CBRS) areas and "otherwise protected |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|---|
| | | | | | areas" (OPAs) are no longer shown on this map panel, but still may be present in this community. Current information on these areas is provided by the U.S. Fish & Wildlife Service (FWS). NFIP flood insurance is not available within CBRS areas for structures that are built or substantially improved on or after the dates indicated by FWS. Users should reference the most up-to-date information provided by FWS to determine NFIP insurance eligibility. The official maps and additional information regarding CBRS areas are provided on the FWS website at: www.fws.gov/cbra . FEMA also includes the official boundaries from FWS on our interactive and dynamic flood maps available through the FEMA Map Service Center. |
| 357 | 10/1/2011 | Existing standard Already implemented | FIRM Graphic Standards | Working Standard | Each FIRM panel must have a map legend that includes all the required elements and complies with the symbology as outlined in the FIRM Panel Technical Reference. |
| 359 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | Data sources in the FIRM Database must be documented with source citations in the database and the metadata. |
| 361 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | The FIRM Database digital data must be submitted in a series of layers that cover the entire geographic area being mapped and not in individual small tiles that cover limited geographic areas. |
| 363 | 10/1/2011 | Existing standard Already implemented | National Flood Hazard Layer (NFHL) | Working Standard | The NFHL must be used as the source for effective digital FIRM Database data when starting FIRM updates and used for mandatory |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|--|---------------------|---|
| | | | | | edge matching at county/community boundaries. |
| 364 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | The FIRM Database must not contain duplicate spatial features. |
| 365 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | All included tables of the FIRM Database shall be documented in the metadata in accordance with the Metadata Profiles Technical Reference, and the software release of the personal geodatabase submitted shall also be documented. |
| 366 | 10/1/2011 | Existing standard Already implemented | Projections and Coordinate Systems | Working Standard | FIRM Database tables must comply with the following database schema properties defined in the FIRM Database Technical Reference: Tables and Feature Classes Spatial Reference Systems Topology Rules Domains |
| 367 | 11/30/2019 | Effective for all projects that have not started QR5. | FIRM Database | Working Standard | All final revised FIRM panels in the FIRM database, both printed and non- printed, shall get new FIRM panel Map Number suffixes and effective dates in the S_FIRM_Pan feature class. |
| 369 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | Floodplain boundary lines in the FIRM Database must be generalized to no more than an average of one vertex every 10 feet while still meeting FBS standards. |
| 370 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | FIRM Database Flood Theme and Base Map features shall not have disconnects, jogs, or missing features during edge matching and at community boundaries. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------|---------------------|---|
| 371 | 11/30/2014 | Existing standard Already implemented | Data Capture | Working Standard | The following Regulatory deliverables must be submitted using the file formats and directory structure specified in the Data Capture Technical Reference. - Transmittal Form - FIRM Database - Orthophotos (if applicable) - FIRM Scans - World Files - FIS Report - Transmittal to Community CEO - Community Map Action List - Inventory Worksheet for Each Community |
| 372 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Working Standard | Coincident features must share the same geometry, vertex for vertex, within the FIRM database files. |
| 373 | 1/1/2013 | Existing standard Already implemented | FIRM Database | Program Standard | The FIRM Database must be submitted using the schema found in the FIRM Database Technical Reference. |
| 374 | 4/11/2019 | Effective immediately | BFEs | Working Standard | If the BFE values shown on lettered cross sections are not sufficient for map users to accurately interpolate the BFE for some locations, then unlettered cross sections or BFE lines should be added to the FIRM and labeled to provide additional resolution. |
| 375 | 10/1/2011 | Existing standard | Levee | Working Standard | The S_Levee table is required for any Preliminary or Final FIRM Database that includes levees, floodwalls, closure structures, |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|--|---------------------|--|
| | | Already implemented | | | berms, embankments, or dikes that have been designed for flood control, whether or not they have been demonstrated to meet the NFIP requirements in 44 CFR 65.10. |
| 377 | 7/31/2013 | Implemented for all projects where the FIRM Database has not yet been submitted to the NFHL | National Flood Hazard Layer (NFHL) | Working Standard | For PMRs, once the NFHL for a community is converted to the latest FIRM Database schema, all database submissions will also be required to conform to this schema. For non-FEMA funded external data studies and for portions of a study where the engineering is unrevised, attribute data associated with the schema that is not needed for FIRM production may be excluded from the study submittal with permission from the FEMA Regional office. Each exclusion should be documented in the FIRM Database metadata file that accompanies the FIRM Database. |
| 378 | 7/31/2013 | Implemented for any project not yet at preliminary | PMR | Working Standard | For PMRs where updated political boundaries are available for the entire extent of the FIRM database, the S_Pol_AR feature class shall be incorporated into the RFHL and shown on the FIRM Index. |
| 379 | 6/1/2012 | Existing standard Already implemented | National Flood Hazard Layer (NFHL) | Working Standard | For PMRs, the revised FIRM database layers within the PMR panel footprint shall be incorporated into the RFHL. Certain layers such as watershed boundaries, nodes, and political areas may extend outside of the PMR footprint. |
| 383 | 4/1/2003 | Existing standard Already implemented | Coordination | Working Standard | After preliminary issuance of the FIS Report and FIRM, any major changes must be coordinated with the FEMA Regional office. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------------|---------------------|---|
| 384 | 4/11/2019 | Effective immediately | Correspondence | Working Standard | For Flood Risk Projects, a CCO meeting is required to occur following the issuance of preliminary products. In the absence of a final CCO meeting a letter shall be sent to the community and interested stakeholders to document the decision to forego the meeting. |
| 385 | 4/11/2019 | Effective immediately | Fed Register | Program Standard | Per Code of Federal Regulations Title 44 C.F.R. § 67.4, the newspaper notice and Proposed Flood Hazard Determination Notice shall include all communities affected by new or modified flood hazard information. The newspaper notice shall be published twice within the 10-days of notification of the community CEO, after publication of the Proposed Flood Hazard Determination Notice. |
| 386 | 4/11/2019 | Effective immediately | Fed Register | Program Standard | The community and other affected stakeholders must be notified when corrections are required to the newspaper notice or Federal Register. |
| 387 | 5/31/2014 | Implemented for all projects where the Federal Register Flood Hazard Determinations Notice has not yet been published | Fed Register | Program Standard | The appropriate Federal Register Flood Hazard Determinations Notice proposing changes to flood hazard information shall be compiled for all communities affected by the addition or modification of flood hazards (i.e., the Proposed Notice for flood risk studies and the Interim Notice for LOMRs). The Notice shall include a hyperlink for the official FEMA website through which stakeholders can access the products depicting the proposed flood hazard changes. The Notice shall be submitted to the designated FEMA coordinator to |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---|---------------------|---|
| | | | | | route for concurrence and signature. FEMA shall coordinate with the Office of Federal Register to ensure timely publication of the Notice in the Federal Register. The published Notice must be reviewed to ensure accuracy; if needed, corrections must be made, and other Project Team members must be notified of the correction. |
| 388 | 12/1/2011 | Existing standard Already implemented | Appeals Process | Program Standard | The statutory 90-day administrative appeal period cannot be extended; no appeals will be accepted after the 90-day appeal period. |
| 389 | 12/1/2011 | Existing standard Already implemented | Appeals Process | Program Standard | Written acknowledgement of all data submitted during the statutory appeal period shall be provided to the affected community. |
| 390 | 12/1/2011 | Existing standard Already implemented | Appeals Process | Working Standard | When performing new analyses and developing revised flooding information, appellants must tie the new BFEs, base flood depths, SFHA boundaries, SFHA zone designations, and/or regulatory floodway boundaries into those shown on the FIRM and in the FIS Report for areas not affected by the appeal. |
| 391 | 4/11/2019 | Effective immediately | Appeals Process | Program Standard | FEMA shall evaluate comment and appeal submittals, and prior to LFD, FEMA or its designee must provide the community with a resolution letter and must provide a copy of the revised FIRM if flood hazard changes were made as a result of the comment or appeal. |
| 392 | 11/1/2010 | Existing standard | Scientific Resolution Panel (SRP) | Program Standard | The Scientific Resolution Panel must be made available to communities that submit qualifying scientific and/or technical data |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------------------|---------------------|--|
| | | Already implemented | | | during the 90-day administrative appeal period. |
| 393 | 1/1/2013 | Existing standard Already implemented | Post- Preliminary Deliverables | Program Standard | A copy of the final FIRM must be delivered to affected communities 90 days before the effective date. |
| 394 | 4/1/2003 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | The Engineering Library shall be the official repository for all technical engineering data including any LOMCs, TSDN and related Flood Risk Project documentation. Information shall be archived and maintained in accordance with FEMA records management standards. |
| 395 | 4/11/2019 | Effective immediately | Post- Preliminary Deliverables | Working Standard | Interim FEDD files must be submitted to FEMA for review: Concurrent with QR4 Part 1 Prior to KDP 5 submittal |
| 396 | 1/1/2013 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | During post-preliminary processing the FEDD and all associated correspondence must be compiled for each affected community in accordance with all relevant regulations. When more than one entity is responsible for post-preliminary activities, each entity must ensure the FEDD and all related documentation is complete at the time the responsibility is transferred to the next entity. |
| 397 | 1/1/2013 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | The following data must be submitted at the end of each mapping project: FBS Self-Certification Document (submitted within 30 days after issuance of preliminary maps); QA report stating compliance with the FBS standard. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|---|---------------------|--|
| | | | | | Revised Floodplain Boundary Standard Self-Certification Document (submitted within 30 days after issuance of the LFD if floodplain boundaries |
| | | | | | were revised during the post- preliminary phase); |
| | | | | | Correspondence file including any documentation not previously submitted during earlier tasks or as part of the FEDD file related to coordination and processing decisions made during the Flood Risk Project. |
| | | | | | FEDD for each affected community |
| | | | | | FEDD Checklist for each FEDD file |
| | | | | | TSDN Checklist and Certification form |
| 398 | 1/1/2013 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | The FEDD files must be separate for each community. |
| 400 | 6/1/2010 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | Map Service Center deliverables must be uploaded through the MIP for all Flood Risk Projects. |
| 401 | 4/1/2003 | Existing standard Already implemented | Letter of Final Determination (LFD) | Program Standard | The LFD date must be no sooner than 60 days after the end of the 90-day administrative appeal period or following resolution of all appeals, whichever is later. |
| 402 | 4/11/2019 | Effective for all projects that have not yet been submitted for KDP5 approval | Letter of Final Determination (LFD) | Program Standard | The LFD package shall be submitted to FEMA HQ, once KDP5 has been approved, for review and approval prior to issuing LFDs to affected communities. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|---|---------------------|---|
| 403 | 4/1/2003 | Existing standard Already implemented | Letter of Final Determination (LFD) | Program Standard | FEMA shall publish a final FHD notice in the Federal Register no later than three months (90 days) following issuance of the LFD. |
| 404 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | The Compendium of Flood Map Changes shall be published every six months (180 days). Publication shall occur within 15 days of the close of the 6-month reporting period. |
| 405 | 4/11/2019 | Effective for projects whose revalidation letters have not yet been submitted | Revalidation | Program Standard | Four weeks before the effective date of the revised map, the revalidation package shall be submitted to FEMA for review and approval using the standardized checklist, located at the Flood Risk Templates and Other Resources page on the FEMA website, prior to issuing the revalidation letters. |
| 406 | 4/11/2019 | Effective immediately | Revalidation | Program Standard | The LOMC-VALID letter shall be provided to the community CEO and floodplain administrator and the LOMC Subscription Service Coordinator within five business days of the effective date of the revised FIRM(s). |
| 407 | 4/11/2019 | Effective immediately | Letter of Map Change (LOMC) | Program Standard | FEMA will make available the following at regular intervals: final LOMCs with attachments final SOMAs revalidation letters. |
| 408 | 4/1/2003 | Existing standard Already implemented | Letter of Map Change (LOMC) | Working Standard | Requests for Letters of Determination Review (LODRs) shall be processed. |
| 409 | 4/1/2003 | Existing standard | Due Process | Program Standard | Suspension notification letters shall be distributed to communities that have not yet adopted NFIP- compliant ordinances within 90 |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|---|
| | | Already implemented | | | days and 30 days prior to the FIRM effective date. |
| 410 | 4/1/2003 | Existing standard Already implemented | Correspondence | Working Standard | Over the life of a Flood Risk Project, NFIP eligibility shall be reviewed and related correspondence shall be prepared for newly-eligible communities. |
| 411 | 1/1/2013 | Existing standard Already implemented | Federal Register | Program Standard | FEMA will publish a notice of community eligibility in the Federal Register. |
| 412 | 12/3/2008 | Existing standard Already implemented | Coastal - Mapping | Working Standard | For coastal Flood Risk Projects, the LiMWA must be calculated, where appropriate. |
| 413 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Working Standard | Locally-provided, -sourced, or -validated building footprint, location, and/or population data shall be the only acceptable data sources to be used to populate structure and population count attributes within the CSLF dataset. |
| 414 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Working Standard | Flood risk datasets derived from new or updated data must reflect the regulatory elevations as shown on the preliminary FIRM, if applicable. If floodplain delineations are altered as a result of appeals or other changes during the post-preliminary process, the Changes Since Last FIRM dataset shall be updated to reflect those changes. |
| 415 | 12/21/2020 | Effective Immediately | Flood Risk Datasets | Working Standard | Water-surface elevation (WSEL) grids produced as part of a Flood Risk Project must be of such a quality that they can be used for regulatory and other official purposes and blended into a seamless dataset. For each mapped flood frequency (e.g. 1 percent, 0.2 percent, etc.), there must be |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|--|
| | | | | | agreement in extent and coverage between the WSEL grid and its associated flood hazard area polygon. |
| 416 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Working Standard | Depth and Analysis Grids must share the same terrain and bathymetry source datasets as the engineering models. |
| 417 | 12/21/2020 | Effective Immediately | Flood Risk Datasets | Program Standard | The minimum datasets associated with the Flood Risk Project are defined as follows: (Refer to Figure 3 on Page 100). Reserved |
| 418 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Working Standard | Depth grids for open water shall reflect the depth of flooding above normal pool. |
| 419 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Working Standard | The extent of water surface elevation change grids shall, at a minimum, reflect those areas that were both SFHA before and after the revision. |
| 421 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Program Standard | To ensure privacy, sensitive claims data will be aggregated and/or generalized at the centroid of the census block and represented as a point. |
| 425 | 5/31/2016 | Existing standard | Flood Risk Datasets | Working Standard | The National Flood Hazard Layer (or other comparable dataset with all effective FIRMs and LOMRs |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|------------------------|---------------------|--|
| | | Already implemented | | | incorporated) shall be the source for the effective flood hazard area data used to develop non-regulatory flood risk products. |
| 429 | 2/28/2018 | Effective immediately | Data Capture | Working Standard | The following flood risk product deliverables must be submitted using the file formats and directory structure specified in the Data Capture Technical Reference: • Flood Risk Database • Depth and Analysis Grids • Metadata file |
| 432 | 1/1/2013 | Existing standard Already implemented | Flood Risk Database | Working Standard | Datasets in the FRD must be delivered in their entirety even if a portion of the dataset lies outside the define project footprint. |
| 433 | 5/31/2016 | Existing standard Already implemented | Flood Risk Database | Working Standard | Non-regulatory flood risk datasets must be delivered within the Flood Risk Database and must not be tiled or subdivided. |
| 442 | 1/1/2013 | Existing standard Already implemented | Flood Risk Database | Program Standard | Non-regulatory flood risk datasets must comply with the following database schema properties defined in the Flood Risk Database Technical Reference: Tables and Feature Classes Raster Datasets Spatial Reference Systems Topology Rules Relationship Classes Domains |
| 443 | 12/21/2020 | Effective Immediately | Flood Risk Database | Program Standard | Do not populate the L_Claims table. Please refer to OpenFEMA for all NFIP policy and claims information |
| 444 | 11/30/2016 | Effective for new applications submitted to | Levee | Program Standard | Levee systems can only be accredited when compliance with Code of Federal Regulations Title 44 |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------|---------------------|--|
| | | FEMA for levee accreditation | | | C.F.R. § 65.10 is demonstrated. Compliance includes demonstrating that an emergency preparedness plan has been adopted by the community that at a minimum, includes the area impacted by the levee system, and includes procedures for emergency operation and public evacuation, meeting the standards of 44 C.F.R. § 65.10(c)(3). |
| 445 | 4/1/2009 | Existing standard Already implemented | Levee | Program Standard | FEMA will not grant extensions to the 24-month PAL period. |
| 446 | 4/1/2009 | Existing standard Already implemented | Levee | Program Standard | Levee accreditation must be based upon detailed H&H analyses. |
| 447 | 4/1/2009 | Existing standard Already implemented | Levee | Program Standard | If the levee system does not continue to meet the criteria within Code of Federal Regulations Title 44 C.F.R. § 65.10, FEMA shall initiate the levee de-accreditation process. |
| 448 | 9/1/2006 | Existing standard Already implemented | Levee | Program Standard | A levee system shall only be designated by FEMA as a PAL if the levee system is already accredited on the effective FIRM and, the owner of the levee system or the community is attempting to compile levee accreditation documentation to demonstrate continuation of compliance with Code of Federal Regulations Title 44 C.F.R. § 65.10. The opportunity for a PAL designation is only offered one time for any given system. |
| 449 | 9/1/2006 | Existing standard Already implemented | Levee | Program Standard | If a levee system qualifies for the PAL designation, the affected communities will be given an |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------|---------------------|---|
| | | | | | opportunity to sign a PAL agreement. |
| 450 | 2/1/2009 | Existing standard Already implemented | Levee | Program Standard | A structure shall only be considered a levee when it can be demonstrated that the structure was designed and has been operated and maintained as a levee. Structures that cannot meet these requirements cannot be considered for accreditation under Code of Federal Regulations Title 44 C.F.R. § 65.10. |
| 452 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Floodway | Working Standard | Floodway boundaries shall be placed on the riverside of a levee unless the community specifically requests otherwise, or where hydraulic calculations demonstrate a floodway is warranted elsewhere. |
| 501 | 7/31/2013 | Implemented for all projects once the NFHL for a community is converted to the latest FIRM Database schema | FIS Report | Working Standard | For Flood Risk Projects that have at least one FIRM panel produced in compliance with the current FIRM Panel Technical Reference, but whose FIS Report is not produced in compliance with the current FIS Report Technical Reference (i.e., the FIS Report is retaining its legacy format) the FIRM Legend and Notes to Users must be included as an appendix to the FIS Report per the current FIS Report Technical Reference. |
| 502 | 12/8/2011 | Existing standard Already implemented | FIRM Index | Working Standard | For FIRM Indexes produced in compliance with the current FIS Report Technical Reference, all required elements of the FIRM Index title block and Index collar shall be present and symbolized as outlined in the Technical Reference. |
| 503 | 12/8/2011 | Existing standard | FIRM Index | Working Standard | For FIRM Indexes produced in compliance with the current FIS Report Technical Reference, the |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------------|---------------------|---|
| | | Already implemented | | | symbology and labeling of all features depicted on the FIRM Index shall adhere to the specifications outlined in the Technical Reference. |
| 504 | 7/31/2013 | Implemented for all projects once the NFHL for a community is converted to the latest FIRM Database schema | FIS Tables | Working Standard | For FIS Reports produced in compliance with the FIS Report Technical Reference, map repositories for all communities must be present and correct in the "Map Repositories" FIS Report table. Flood Risk Projects whose FIS Reports are not produced in compliance with the current FIS Report Technical Reference (i.e., the FIS Report is retaining its legacy format per FEMA Regional approval), but whose FIRM Index is produced in compliance with the FIS Report Technical Reference, must include a correctly populated "Map Repositories" table in the FIS Report. FIRM Indexes that are not produced in compliance with the FIS Report Technical Reference must include the map repository information on the Index. |
| 505 | 7/31/2013 | Implemented for all projects once the NFHL for a community is converted to the latest FIRM Database schema | FIS Tables | Working Standard | FIS Reports not produced in compliance with the FIS Report Technical Reference (per FEMA Regional approval), but whose FIRM Index is produced in compliance with the Technical Reference, must include a correctly populated "Listing of NFIP Jurisdictions" table in the FIS Report. FIRM Indexes that are not produced in compliance with the FIS Report Technical Reference must include the Listing of Communities table on the FIRM Index. |
| 506 | 2/1/2002 | Existing standard | Flood Profiles | Working Standard | Flood Profile notes and labels must be correct and agree with the FIRM and Floodway Data Table (if applicable). |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |

| | | | | | Hazard Determination Notice information, interim FEDD Files, newspaper notice, Appeal Period Docket information and 90-day start letter(s) shall be reviewed using standardized checklists. FEMA must provide approval prior to the issuance of the 90-day start letter(s) |
| | | | | | QR5: The FIRM database shall be auto-validated in the MIP and a visual review shall be conducted using standardized checklists to compare the FIRM database to the printed FIRM and all cited issues must be resolved before the LFD will be distributed. |
| | | | | | QR6: This review validates the products prior to LFD distribution. LFD Verification Summary, LFD Questionnaire, LFD letters, and Final SOMA are prepared and submitted, concurrent with QR5 and QR7 and shall be reviewed using standardized checklists. All cited issues must be resolved before the LFD will be distributed. |
| | | | | | QR7: The final FIS Report, FIRM and associated paperwork shall be reviewed using standardized checklists before delivery to the MSC and all cited issues must be resolved before the LFD will be distributed. |
| | | | | | QR8: A review of the FIS Report, FIRM, MSC paperwork, and delivery manifest shall be conducted by the FEMA Map Service Center using |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|-----------------------|---------------------|--|
| 509 | 7/31/2013 | Implemented with all projects not yet final | Quality Management | Program Standard | All Quality Compliance Check issues noted during the QR1 through QR8 process must be fully addressed, documented and resolved. |
| 510 | 7/31/2013 | Implemented with all projects not yet final | Quality Management | Program Standard | Standardized checklists must be used at FEMA-designated Quality Reviews. Those checklists, which are located at https://www.fema.gov/media-collection/flood-risk-templates-and-other-resources must be retained as quality records, and delivered as part of the TSDN. |
| 512 | 7/31/2013 | Implemented with all projects not yet final | Quality Management | Program Standard | Self-Certification of compliance with FEMA standards must be provided before a QR3 review may be executed. A template for this requirement is available here |
| 513 | 7/31/2013 | Implemented with all projects not yet final | Quality Management | Program Standard | Written certification must be provided, documenting that all QR3 non- compliance citations were properly addressed and resolved, in order to complete the QR3 process. A template for this requirement is available here . |
| 514 | 12/1/2008 | Existing standard Already implemented | Quality Management | Program Standard | Following the QR4 review, any identified errors must be corrected prior to the 90-day Start letter distribution. |
| 515 | 12/1/2008 | Existing standard Already implemented | Due Process | Program Standard | The 90-day comment period for the Federal Register Proposed FHD Notice and the 90-day statutory appeal period must overlap by at least one day. If the 90-day appeal period does not begin prior to the end of the Federal Register 90-day comment period, in coordination with FEMA, the Federal Register publication must be withdrawn and the FHD notice must be republished. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|-----------------------------------|---------------------|--|
| 516 | 4/11/2019 | Effective immediately | Due Process | Working Standard | The standard Proposed Flood Hazard Determination Notice must be posted with the correct newspaper notice publication dates and appeal period start and end dates on FEMA's website prior to issuing the 90-day start letters. |
| 517 | 12/1/2008 | Existing standard Already implemented | Post- Preliminary Deliverables | Working Standard | The FIRM Database (including metadata) and the georeferenced FIRM image files must be submitted to the MIP and FEMA (or their designee) must be notified at least 60 days prior to the anticipated LFD date. |
| 518 | 12/1/2008 | Existing standard Already implemented | Quality Management | Program Standard | All outstanding map changes must be incorporated into the FIRM before proceeding with the QR5 database and visual review. |
| 519 | 12/1/2008 | Existing standard Already implemented | LFD | Program Standard | The FIS Report, FIRM, and FIRM database must pass QR5, QR6, and QR7 before the LFD may be distributed. |
| 520 | 12/1/2008 | Existing standard Already implemented | Post- Preliminary Deliverables | Program Standard | At least 45-days before the projected LFD date the final LFD letters, Part 67 Final Notice, and Final SOMAs must be submitted. No less than one month (4-weeks) before the LFD the final LFD Summary Sheet/Dockets and LFD Questionnaires must be consolidated and sent to FEMA HQ for approval. |
| 521 | 2/28/2018 | For any study not yet submitted to QR5 | Quality Management | Program Standard | At least 60 days prior to the projected LFD date after receiving a passing QR5 auto-validation report for the FIRM database, the QR5 visual, QR6, and QR7 reviews at the Develop Final Mapping Products Data Capture MIP task must be conducted. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|----------|---------------------|---|
| 522 | 4/11/2019 | Effective immediately | LFD | Working Standard | As part of the LFD Docket MIP task, the LFD Verification Summary and LFD Questionnaire, LFD Letters and Final SOMA must be submitted, concurrent with Quality Reviews 5 and 7. |
| 523 | 2/28/2018 | Effective immediately | SOMA | Working Standard | On the SOMA, structure removals must not be included in Category 1; LOMRs must not be included in Category 2A or 2B; and LOMRs and single- determination LOMCs must not be included in Category 4. |
| 524 | 4/11/2019 | Effective immediately | SOMA | Working Standard | When multiple determination LOMAs and LOMR-Fs include both removal and non-removal determinations, and all determinations remain the same based on the new or revised mapping, the case must be included in Category 2A or Category 2B in the MIP SOMA Workbench. |
| 525 | 4/11/2019 | Effective immediately | SOMA | Working Standard | On the Preliminary and Final SOMA, the map number and map suffix must be listed in the Original Panel field and Current Panel field for each valid LOMC. On the Revalidation Letter, the FIRM Panel Number and map suffix must be listed for each valid LOMC. |
| 527 | 4/1/2003 | Existing standard Already implemented | SOMA | Working Standard | Any LOMCs issued prior to the effective date of the current respective FIRM panel must be included on the SOMA if they are listed on a current revalidation letter for the community. |
| 528 | 4/1/2003 | Existing standard Already implemented | SOMA | Working Standard | The SOMA must include the community name, CID, case number, date issued and project identifier for each LOMC listed. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|------------------------|---------------------|--|
| 529 | 4/1/2003 | Existing standard Already implemented | SOMA | Working Standard | The FIRM Effective date must be listed on the Final SOMA. |
| 530 | 7/31/2013 | Applicable for LOMCs initiated after the effective date, but not retroactively for ongoing or completed LOMCs | Coastal - Analysis | Working Standard | All requests for flood map revisions based upon new or modified flood control structures shall include an analysis of the potential adverse impacts of the structure on flooding within, and adjacent to, the area protected by the structure. For coastal structures, this analysis must also evaluate the impacts of the structure on erosion within, and adjacent to, the protected area. |
| 531 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Program Standard | Metadata for non-regulatory flood risk datasets must comply with the Metadata Technical Reference. |
| 532 | 1/1/2013 | Existing standard Already implemented | Flood Risk Datasets | Program Standard | Attribute domains for non-regulatory flood risk datasets must comply with the Domain Tables Technical Reference. |
| 533 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Program Standard | Metadata for FIRM databases must comply with the Metadata Profiles Technical Reference. |
| 534 | 10/1/2011 | Existing standard Already implemented | FIRM Database | Program Standard | Attribute domains for FIRM databases must comply with the Domain Tables Technical Reference. |
| 535 | 7/31/2013 | Implemented for all projects once the NFHL for a community is converted to the latest FIRM Database schema | LOMR Incorporation | Working Standard | When a PMR is processed that will only partially include an effective LOMR, all FIS Report components of the LOMR (including Flood Profiles and Floodway Data Tables) must be included in the revised FIS Report that is issued with the PMR. When the partially-included LOMR is re- |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------|---------------------|--|
| | | | | | issued, it must not include any FIS Report components and it will only include revisions for the FIRM panel(s) not revised with the PMR. The LOMR must be re-issued within three days of the FIS Report / FIRM effective date. |
| 536 | 7/31/2013 | Applicable for all coastal Flood Risk Projects in the data development stage where the erosion analyses have not been completed yet | Coastal - Analysis | Working Standard | For Atlantic Ocean and Gulf of Mexico coastal Flood Risk Projects, the 1- percent-annual-chance water level datum, above which the dune reservoir volume will be calculated for erosion analyses, will include storm surge, tidal effects, and wave setup components. |
| 537 | 2/28/2018 | Effective immediately | Coastal - Waves | Working Standard | LOMRs revising coastal flooding shall use the effective still water elevations and shall include wave setup. |
| 538 | 7/31/2013 | For all non- accredited levee projects that were previously on-hold and for newly initiated flood risk projects after the effective date, or after Congressional LAMP briefing(whichev er is later) | Levee | Program Standard | FEMA will not fund any efforts solely related to certifying data for levee accreditation or making determinations of the levee's structural conditions. |
| 539 | 7/31/2013 | For all non- accredited levee projects that were previously on-hold and for newly initiated flood risk projects after the effective | Levee | Program Standard | The natural valley floodplain behind non-accredited levee systems shall be modeled and depicted as an SFHA, except when additional analysis indicates an alternate treatment. The natural valley floodplain behind non-accredited levee systems shall only be depicted as Zone D when freeboard deficient, |

| | | briefing(whichev er is later) | | | |
| 546 | 7/31/2013 | For all non- accredited levee projects that were previously on-hold and for newly initiated flood risk projects after the effective date, or after Congressional LAMP briefing(whichev er is later) | Levee | Working Standard | If BFEs are to be shown on the FIRM landward of non-accredited levee systems, they shall be based on the highest elevation of the composite analysis and mapping. |
| 547 | 11/30/2014 | Existing standard Already implemented | Elevation Data | Working Standard | If topographic breaklines are produced and submitted, the Topographic Breakline Topology Rules outlined in the Data Capture Technical Reference must be followed. |
| 549 | 11/30/2014 | Existing standard Already implemented | Metadata | Working Standard | The metadata files submitted for each applicable task must comply with the Metadata Profiles Technical Reference and must document the data being submitted and include the following elements: Identification Information Data Quality Information Spatial Reference Information Entity and Attribute Information Distribution Information Metadata Reference Information |
| 550 | 4/1/2003 | Existing standard Already implemented | Letter of Map Revision (LOMR) | Program Standard | If a LOMR results in a new or increased BFE or a new or increased SFHA, the requester must notify the property owner(s) of the impact of the LOMR on their property. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-----------------------|---------------------|--|
| 551 | 11/30/2016 | Effective for all newly funded PMR preliminary map processing or newly initiated PMRs | PMR | Working Standard | When FEMA is processing a PMR, the footprint shall be defined as the boundary of the FIRM panel(s) affected by the PMR's study area. All FIRM Database and FIRM Graphic standards, as well as appropriate DVT checks and quality reviews, apply to the footprint and are not limited to the PMR's study area. |
| 552 | 12/1/2008 | Existing standard Already implemented | Quality Management | Program Standard | A Quality Management Plan that prescribes protocols for ensuring consistent compliance with FEMA Standards must be in place. |
| 553 | 2/28/2018 | Effective immediately | SOMA | Program Standard | LOMCs shall be categorized on the SOMA as follows: -Category 1 (LOMCs Incorporated) - Includes those LOMRs (and some LOMAs and LOMR-Fs) whose results are unaffected by new or revised flood hazard data, and whose results can and will be incorporated into the revised FIRM panel(s). Large metes-and-bounds or multi-lot property removal LOMR- Fs are sometimes incorporated through Category 1 when scale limitations do not prohibit it; although typically, these LOMAs and LOMR-Fs will be revalidated through Category 2. Structure removal (both single and multiple determination) LOMCs cannot be incorporated due to scale limitations and therefore shall not be included in Category 1. Category 2A (LOMCs Not incorporated on revised panels) - Includes those valid LOMCs that shall remain effective and / or |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|---|
| | | | | | are within the revised panel footprint of the study. Category 2B (LOMCs Not incorporated on unrevised panels) – Includes those valid LOMCs within a community that shall remain effective and / or fall on unrevised panels within that community. Category 3 (LOMCs Superseded) - Includes those LOMCs whose results will not be reflected on the revised FIRM panel because the flood hazard data on which the determinations are based are being superseded by new detailed flood hazard data, or the information available was not sufficient to make a determination. Category 4 (LOMCs To Be Redetermined) - Includes those LOMAs and LOMR-Fs issued for multiple lots or structures for which new determinations must be made because the determination for one or more properties or structures has changed as a result of the new or revised flood hazard information, and therefore cannot be revalidated. |
| 555 | 10/1/2011 | Existing standard Already implemented | National Flood Hazard Layer (NFHL) | Working Standard | RFHL to NFHL submissions must include all up-to-date revisions and study data inclusive in a DFIRM ID. |
| 556 | 7/31/2013 | Implemented with all new flood risk projects initiated in Fiscal Year2013 | Stakeholder Engagement | Program Standard | All Flood Risk Projects must have a communications plan designed to keep project stakeholders informed of all key decisions, draft findings and finished outputs. The plan shall also be designed to regularly engage key stakeholders in dialog |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|----------------------------|-----------------|---------------------|--|
| | | | | | about local risks and potential actions to manage and reduce those risks. |
| 600 | 4/11/2019 | Effective immediately | Appeals Process | Program Standard | An administrative appeal period must be offered for any FIRM updates including letters of map revision where Flood Hazard Data updates are made. Flood Hazard Data changes include: New BFEs or base flood depths are proposed or currently effective BFEs or base flood depths have been modified; New SFHAs are proposed or the boundaries of currently effective SFHAs have been modified; New SFHA zone designations are proposed or currently effective SFHAzone designations have been modified; or New regulatory floodways are proposed or the boundaries of currently effective floodways that have been modified. In order to qualify as an appeal, scientific and/or technical data demonstrating these changes |
| | | | | | are incorrect must be provided. |
| 601 | 4/11/2019 | Effective immediately | Fed Register | Program Standard | The Community Map Repository address for each community listed in the Proposed Flood Hazard Determination Notice must be a physical address (i.e., not a P.O. Box) confirmed by the community. Additionally, the repository address must be consistent among all related products on FEMA's website (FIS, FIRM Index, FIRM Database, Populate FHD MIP task, and Federal Register), before starting the statutory 90-day appeal period. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------|---------------------|---|
| 602 | 5/31/2014 | Implemented for any project not yet at preliminary | Levee | Program Standard | For the analysis and mapping of flood hazards associated with levee systems, if available, data and documentation in the USACE National Levee Database (NLD) or from local communities, tribal entities or other federal or state agencies should be leveraged. |
| 603 | 11/30/2014 | Implemented for any new community request received after March 21, 2014 | Levee | Program Standard | Requests for a determination of adequate progress toward completion of flood protection systems must meet the data and documentation requirements outlined in Code of Federal Regulations Title 44 C.F.R. § 61.12, except where superseded by Section 19, Part a, of the Homeowner Flood Insurance Affordability Act, 42 U.S.C. § 4014(e). Zone A99 requests may be submitted for projects constructing or reconstructing flood protection systems. Requests will not be limited to projects with federal funding, and the present value of the system can be used to meet the requirements of 44 C.F.R. § 61.12(b). |
| 604 | 11/30/2014 | Implemented for any new community request received after March 21, 2014 | Levee | Program Standard | Map revision requests to reflect flood control system restoration projects with a Zone AR designation must meet the data and documentation requirements outlined in Code of Federal Regulations Title 44 C.F.R. § 65.14, except where superseded by Section 19, Part b, of the Homeowner Flood Insurance Affordability Act, 42 U.S.C. § 4014(f). Zone AR requests may be submitted for levees in riverine and coastal areas, except when the landward |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|---|
| | | | | | flood zone of the existing structure would be defined as a Coastal High Hazard Area. Requests will be reviewed without regard to federal funding or participation, and restoration projects must be complete or meet the requirements of 44 C.F.R. § 61.12 within a specified timeframe, not to exceed 10 years, from the date the community submits the request for a Zone AR determination by FEMA. |
| 605 | 11/30/2014 | Effective immediately | National Flood Hazard Layer (NFHL) | Program Standard | Flood Insurance Rate Maps, FIRMettes, and NFHL Databases are the official FEMA digital products. The official FEMA digital products and printed versions produced from the official digital products are all equivalent to each other and represent official FEMA designations of the areas of special flood hazard, base flood elevations, insurance risk zones and other regulatory information, provided that all other geospatial data shown on the printed product meets or exceeds any accuracy standard promulgated by FEMA. Products using FEMA's regulatory data must include a statement that they conform to this standard in order to be used in place of the official FEMA digital products. |
| 606 | 11/30/2014 | Existing standard Already implemented | National Flood Hazard Layer (NFHL) | Program Standard | When a coordinate grid is shown on the FIRM or when the FIRM or NFHL Database version is available, the horizontal location of the flood hazard information is defined with respect to the primary coordinate system shown on the FIRM or stored in the FIRM or NFHL Database product. The horizontal location of the flood hazard information is not defined by its relationship to the base map features such as streets. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--|---------------------|--|
| | | | | | If there are conflicting interpretations of the precise horizontal location of the areas of special flood hazard, the conflict shall be resolved using the grid coordinates shown on the printed FIRM or stored in the FIRM or NFHL Database products rather than the base map features. |
| 607 | 11/30/2014 | For all projects where the FIRM database has not yet been submitted to the NFHL | National Flood Hazard Layer (NFHL) | Working Standard | NFHL submittals must not contain a single dataset (i.e. DFIRM_ID) which includes future-effective LOMRs with effective dates separated by more than one business day. |
| 608 | 11/30/2014 | For all projects where the FIRM database has not yet been submitted to the NFHL | National Flood Hazard Layer (NFHL) | Working Standard | RFHL submittals must be submitted in a geodatabase format that matches the current NFHL schema in the FIRM Database Technical Reference. |
| 609 | 2/28/2018 | Effective for Fiscal Year 2018 projects and beyond | National Flood Hazard Layer (NFHL) | Working Standard | DFIRM study data incorporated into the NFHL must be obtained from the Develop Final Mapping Products Data Capture task MIP folder for the associated Risk MAP project case number. |
| 610 | 11/30/2014 | For all projects where the FIRM database has not yet been submitted to the NFHL | National Flood Hazard Layer (NFHL) | Working Standard | All NFHL data superseded by a Risk MAP or LOMR project must be removed from the RFHL prior to submission, and the NFHL must replace all data for a submitted dataset (i.e. DFIRM_ID) in its entirety. |
| 611 | 11/30/2014 | For all projects where the FIRM database has not yet been submitted to the NFHL | National Flood Hazard Layer (NFHL) | Working Standard | NFHL submittals must contain a unique identifier within the primary key fields for all records within a dataset (i.e. DFIRM_ID) and maintain all primary and foreign key relationships as defined in the FIRM Database Technical Reference. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|----------------------------|---|---------------------|--|
| 612 | 7/31/2015 | Effective immediately | Key Decision Points (KDPs) | Program Standard | Flood Risk Projects must follow the Key Decision Points (KDPs) process and each KDP must be documented. A Flood Risk Project shall not advance in its project lifecycle beyond a KDP without Regional and HQ approval. The six distinct KDPs: KDP 0: decision to initiate a Flood Risk Project or group of Flood Risk Projects. KDP 1: decision to move forward with a Flood Risk Project through data development, risk awareness, and/or outreach tasks KDP 2: decision to develop Preliminary FIRM products KDP 3: decision to distribute Preliminary FIRM products to communities KDP 4: decision to initiate the Appeal Period KDP 5: decision to issue the LFD |
| 613 | 7/31/2015 | Effective immediately | Coastal - General | Program Standard | FEMA does not issue CLOMA or LOMA determinations in V zones where the primary frontal dunes (PFDs) define the inland limits of V zones. |
| 614 | 4/11/2019 | Effective immediately | Coastal - General | Program Standard | FEMA will only use BFEs in the format of the effective flood hazard map for (C)LOMA or (C)LOMR-F determinations where effective flood hazard areas are the result of coastal flood hazard analysis. |
| 615 | 7/31/2015 | Effective immediately | Scientific Resolution Panel (SRP) | Program Standard | The Scientific Resolution Panel must issue a report detailing the panel findings in writing to the community and FEMA no later than |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|----------------------------------|---------------------|---|
| | | | | | 90 days after being formed. The Panel Sponsor must publicly identify the date that an SRP was formed on the SRP website. |
| 616 | 7/31/2015 | Effective immediately | Letter of Map Revision (LOMR) | Program Standard | A LOMR or CLOMR requester shall be exempt from submitting a review or processing fee for a request that is based on a project where: (1) the primary purpose is habitat restoration; and (2) where the habitat restoration project is funded in whole or in part with federal or state funds. For the purposes of this fee exemption, "habitat restoration" will have the same meaning as the term "habitat restoration" in the Partners for Fish and Wildlife Act, 16 U.S.C. § 3772(5). This exemption includes projects for dam removal, culvert redesign or installation, or the installation of fish passage if the primary purpose is habitat restoration. |
| 617 | 7/31/2015 | Effective immediately | Prelim Distribution | Program Standard | Congressional notifications required under 42 U.S.C. § 4101b (d)(1)(G) and (H) related to issuance of preliminary maps shall be provided in the monthly "Notice to Congress: Monthly Update on Flood Mapping" report. Issuance of initial preliminary maps and revised preliminary maps must be included. |
| 618 | 11/30/2015 | Applicable for LOMCs initiated after the effective date, but not retroactively for ongoing or completed LOMCs | Letter of Map Revision (LOMR) | Program Standard | All LOMRs issued shall have all revised FIRM Database items prepared in accordance with the FIRM Database Technical Reference and incorporated into the National Flood Hazard Layer (NFHL) with a polygon showing a LOMR area of revision. |
| 619 | 4/11/2019 | Effective Immediately | Coastal - Mapping | Program Standard | When revising the dune feature identified as the Primary Frontal |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|--------------|---------------------|---|
| | | | | | Dune in an effective FIS, the revised feature must be as continuous as, or more continuous than, the effective PFD and provide an accurate representation of the regional dune feature. This is especially important in areas with multiple ridges throughout a dune field, areas with man-made dunes, and property- specific revisions, including requests that the PFD designation be removed altogether. Community coordination may be required to make this assessment. |
| 620 | 5/31/2016 | Effective for all new work funded in Fiscal Year2016 | Coordination | Program Standard | Before commencing the analysis and mapping activities that take place during the Data and Product Development Phase of a flood risk study project, FEMA shall provide a written notification to community Chief Executive Officers and Floodplain Administrators that explains the selected modeling, explains why the selected modeling is appropriate, and provides a 30-day period for communities to consult on the appropriateness of the modeling. |
| 621 | 4/11/2019 | Effective immediately | Coordination | Program Standard | Prior to completion of Quality Review 1, FEMA shall transmit or provide access to the draft FIRM database, along with any other contributing data as requested, to the affected community's Chief Executive Officer and Floodplain Administrator, and provide a 30-day period during which the affected community may provide data to FEMA that can be used to supplement or modify the existing data, and incorporate any data that are consistent with prevailing engineering principles. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|---|---------------------------------------|---------------------|--|
| 622 | 5/31/2016 | Effective for all new work funded in Fiscal Year2016 | Stakeholder Engagement | Program Standard | During the Preliminary National Flood Insurance Program Map Release and Due Process phases of the lifecycle for a flood risk study, the Project Team shall work with the FEMA Regional Office of External Affairs, other FEMA staff, community officials, and local radio and television outlets to further educate property owners about flood map revisions and appeals processes. |
| 623 | 11/30/2016 | Effective immediately | Letters of Map Amendment (LOMA) | Program Standard | Within non-participating communities, the Special Flood Hazard Area (SFHA) designation shall not be conditionally or effectively removed by letter from a structure or property that 1) has or will be elevated by the placement of fill, or 2) encroaches the regulatory floodway on the effective FIRM. This is because these reviews require the submission of a completed, signed, and dated Community Acknowledgement Form, which confirms compliance with the participating community's adopted floodplain management ordinance. |
| 624 | 11/30/2016 | Effective immediately | Letters of Map Amendment (LOMA) | Program Standard | The Special Flood Hazard Area (SFHA) designation shall not be conditionally or effectively removed from a structure or property by letter when the lowest adjacent grade to the structure or lowest point on the property is or would be below the applicable 1-percent-annual-chance flood elevation, unless certified data can be presented to demonstrate that naturally occurring intervening high ground exists between the structure or property and the source of flooding. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|---------------------------------------|---------------------|--|
| 626 | 11/30/2016 | Effective immediately | Letters of Map Amendment (LOMA) | Program Standard | The Special Flood Hazard Area designation may only be conditionally or effectively removed by letter from a property or portion-of-property that 1) includes the complete footprint of any proposed or existing structures impacted by the removal; and 2) does not include any flooding sources identified on the effective NFIP map. |
| 627 | 2/28/2018 | Effective immediately | Letter of Map Amendment (LOMA) | Program Standard | For Letters of Map Amendment (LOMAs), submitters may use elevation data (typically LiDAR) to document the lowest adjacent grade for a structure or lowest lot elevation for a parcel of land that complies with the USGS National Geospatial Program LiDAR Base Specification Quality Level 3 (QL3) or better and is provided by a federal, state or local government agency. |
| 628 | 12/21/2020 | Effective immediately | Flood Risk Datasets | Program Standard | All Flood Risk Products will be deemed of acceptable quality if they meet the following conditions: • All Flood Risk Products pass the MIP Validation step • All raster datasets align with the underlying model information used to develop the associated regulatory products • All other database elements align with regulatory products as of the time they are contracted, if they are developed from regulatory products |
| 630 | 12/21/2020 | Implemented with all newly initiated Fiscal Year 2020 Flood | Map Format and Layout | Program Standard | All preliminary and final FIRM panels, including FIRM attachments delivered with MT-2s, must be developed using the FEMA FIRM |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|-------------------------|---------------------|--|
| | | Risk studies and MT-2s received after the automated mapping tool is implemented | | | panel creation tool. The output panel layout and cartographic design from the FEMA FIRM panel creation tool are considered FEMA compliant with no edits, however the output products, including the FIRM database, must be quality controlled by the producer to confirm the engineering and flood hazard data align with the related regulatory products. Quality control must be performed, documented and completed prior to the issuance of preliminary and final regulatory products. |
| 631 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Program Standard | The Budget Matrix Tool will act as the financial management internal control for the oversight of the Risk MAP Program as a whole. |
| 632 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Program Standard | Program Offices will prepare their spend plans and confirm they do not exceed budget targets, contravene Congressional intent, and are in accordance with applicable laws, policies, and regulations. |
| 633 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Program Standard | FEMA Regional Offices must annually update the P4 tool based on Risk Map projected planning guidance, the financial targets list in the Budget Matrix Tool, and the Fiscal Year Risk MAP Regional Allocations and Performance Metrics Memo. |
| 635 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Working Standard | The full annual Regional allocation must be tracked in the MIP and the total value must match the Budget Matrix Tool when baselined. |
| 636 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Program Standard | Integrated Financial Management Information System (IFMIS) must be the system of record for obligation expenditures and balances. |

| SID# | Effective Date | Implementation Description | Category | Standard Type | Standard |
|------|-------------------|--|--------------------------------|---------------------|--|
| 637 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Program Standard | The Budget Matrix Tool must comprise the Risk MAP master spend plan report. |
| 638 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Working Standard | Earned Value reporting in the MIP must be updated monthly. Monthly Earned Value reports shall account for active and on-hold projects. |
| 639 | 11/30/2019 | Effective for all new work funded in Fiscal Year 2020 | Financial Management | Working Standard | Provider invoices for Regional task orders must match information in the MIP. |
| 640 | 12/21/2020 | Effective immediately | Program Management | Program Standard | All organizations and users that access FEMA RAM applications must comply with applicable RAM policies and SOPs |
| 641 | 12/21/2020 | Effective immediately | Levee | Program Standard | Justification to use an expired PAL agreement date on the FIRM panel must be approved by the FEMA Region and FEMA Headquarters. |
| 642 | 12/21/2020 | Effective immediately | Levee | Program Standard | Justification to use Seclusion mapping on the FIRM panel must be approved by the FEMA Region and FEMA Headquarters. |
| 643 | 12/21/2020 | Effective immediately | Coastal Zone Management Act | Program Standard | Prior to preliminary issuance of FIRMs affecting tidally influenced floodplains within the coastal zone, as defined by the Coastal Zone Management Act of 1972 (16 U.S.C. § 1451-1464), the FEMA region shall submit to the coastal management program for the state or territory in which the project takes place a federal consistency determination that the project is consistent to the maximum extent practicable with the enforceable policies of the coastal management program. |

Appendix C

Tables Associated with Standard Updates

Figure 1: Standard 43

| Vertical Accuracy Requirements based on Flood Risk and Terrain Slope within the Floodplain being Mapped | | | | | | |
|---|------------------------------------|---------|---|---|--|--|
| Level of Flood Risk | Typical Slopes Specification Level | | Vertical Accuracy: 95% Confidence Level (FVA or NVA) / (CVA or VVA) | LiDAR Nominal Pulse Spacing (NPS) | | |
| High (Deciles 1, 2, 3) | Flattest | Highest | 24.5 cm/36.3 cm | ≤ 2 meters | | |
| High (Deciles 1, 2, 3) | Rolling or Hilly | High | 49.0 cm/72.6 cm | ≤ 2 meters | | |
| High (Deciles 1, 2, 3) | Hilly | Medium | 98.0 cm/145 cm | ≤ 3.5 meters | | |
| Medium (Deciles 3, 4, 5, 6, 7) | Flattest | High | 49.0 cm/72.6 cm | ≤ 2 meters | | |
| Medium (Deciles 3, 4, 5, 6, 7) | Rolling or Hilly | Medium | 98.0 cm/145 cm | ≤ 3.5 meters | | |
| Medium (Deciles 3, 4, 5, 6, 7) | Hilly | Low | 147 cm/ 218 cm | ≤ 5 meters | | |
| Low (Deciles 7, 8, 9, 10) | All | Low | 147 cm/ 218 cm | ≤ 5 meters | | |

Figure 2: Standard 113

| Risk Class | Characteristics | Delineation Reliability of the floodplain boundary per study methodology ¹ | | |
|---------------|--|---|-----------------------|--|
| | | Zone A | All Other Zones | |
| А | High population and densities within the floodplain and/or high anticipated growth | +/- 1/2 contour 95% | +/- 1.0 foot / 95% | |
| В | Medium populate and densities within the floodplain and/or modest anticipated growth | +/- 1/2 contour 90% | +/- 1.0 foot / 90% | |
| С | Low population and densities within the floodplain and/or modest anticipated growth | +/- 1/2 contour 85% | +/- 1.0 foot / 85% | |
| D | Undetermined Risk, likely subject to flooding | N/A | N/A | |
| Е | Minimal risk of flooding; area not studied | N/A | N/A | |

¹ The difference between the ground elevation (defined from topographic data) and the computed flood elevation

Figure 3: Standard 417

| Flood Risk Product/Dataset | | New Flood Hazard Analysis ¹ Conducted | No New Flood Hazard Analysis ¹ Conducted | |
|----------------------------|---|---|--|--|
| Flood Risk Database | | Required | Required | |
| | Changes Since Last Firm (CSLF) | Automated ² | N/A | |
| set | Water Surface Elevation Grids | Required ³ | Optional ⁴ | |
| Datase | Flood Depth Grids | Required ³ | Optional ⁴ | |
| Flood Risk D | Percent Annual Chance & Percent 30-year Chance Grids | Required⁵ | Optional ⁴ | |
| | Flood Risk Assessment | Required ^{6, 8} | Required ^{7,8} | |
| | Areas of Mitigation Interest (AOMI) Required | | Required | |
| Floc | od Risk Map | Optional | Optional | |
| Flood Risk Report | | Optional | Optional | |

¹ "New Flood Hazard Analysis" = flooding sources receiving regulatory-level analyses

³ Riverine studies: 10%, 4%, 2%, 1%, "1%+", and 0.2% annual-chance floods

Coastal studies: only the 1% annual chance flood

Levee studies: Riverward/Seaward side - same as Riverine or Coastal

Landward side - only the scenario(s) used to delineate SFHA

boundary

Coastal studies: only the 1% annual chance flood

Levee studies: Riverward/Seaward side - same as Riverine or Coastal
Landward side - only based on the landward depth grid

² CSLF is optional in areas where digital modernized floodplain boundaries are not available for the effective, and its creation would be performed by the mapping partner, not automated tool.

⁴Can be produced for flooding sources not receiving new analyses if based on effective data

⁵ Riverine only

⁶ Riverine studies: 10%, 4%, 2%, 1%, and 0.2% annual-chance floods, and Annualized

⁷ Assessments are performed for the flood events with available depth grids. See Flood Risk Database Technical Reference for more information.

⁸ Analysis can be conducted at census block or user-defined facility level.

Figure 4: Standard 543

| | | Reach Analysis Procedures | | | | | |
|--|--|---------------------------|------------------------|-------------|------------------------------------|-------------------|--|
| Data Element | Link to CFR | Sound Reach | Freeboard Deficient | Overtopping | Structural- Based Inundation | Natural Valley | |
| Elevation Information for the Levee Crest and Toe | N/A | Required | Required | Required | Required | N/A | |
| BFE + Freeboard Less than Levee Crest | 44CFR65.10(b)(1) | Required | N/A | N/A | N/A | N/A | |
| BFE Less than Levee Crest | N/A | Required | Required | N/A | N/A | N/A | |
| Operations and Maintenance Plan | 44CFR65.10(c) | Required | Required | Required | Recommended | N/A | |
