

DISASTER PREPAREDNESS ACTIVITY BOOK

FEMA P-2005 / June 2018

Prepare with Pedro: Disaster Preparedness Activity Book is a publication created by the Federal Emergency Management Agency's Individual and Community Preparedness Division and Region V office in partnership with the American Red Cross.

The Red Cross emblem and the American Red Cross name are trademarks of the American National Red Cross and protected by various national statutes. © 2018 by the Federal Emergency Management Agency. The DHS Seal and FEMA Logo are properties of the Department of Homeland Security and protected by Federal Law.

The Prepare with Pedro Activity Book is available for free from FEMA. Call 1-800-480-2520 and ask for publication number P-2005. It is also available as a free download online at www.ready.gov/youth-preparedness.

Hi! I'm Pedro the Penguin, and I am traveling around the United States to visit my friends and learn how they prepare. I'd like you to come.

Emergencies and disasters can happen anywhere, but there are ways to help you stay safe. Follow along, and we can learn together!

A tornado is a spinning column of air. Tornadoes have strong winds that can cause a lot of damage to things in their paths.

A Tornado Watch means that a tornado might happen.

Listen for more information, stay close to a safe place, and get ready!

These signs may help you know that a tornado is coming:

- Dark or green colored sky
- Funnel cloud
- Loud train-like sound

🕒 Hail

A **Tornado Warning** means that a tornado has been spotted in your area. In some places, you may hear tornado sirens. It's time to take cover now!

Indoors, go to the lowest level in the building. This could be a basement or first floor. Find an interior room with no windows. Get down on the ground and cover your head and neck.

Answer Key: (basement, bathroom, storm cellar)

Before the storm, Amelia and Elijah found 3 safe places to

go during a tornado. Can you circle the safe places?

EXTREME COLD

Temperature tells you how hot or cold the air is. During winter, the air outside can get very cold.

Remember, tell an adult if you feel COLD or numb while playing outside.

Electricity is what powers the lights and makes the heat stay on at home. Sometimes, the electricity may go out. When this happens, you can use an emergency supply kit to help stay safe.

Mia and her family are showing Pedro how to make a kit to be prepared. What should they put in the kit?

Flashlight & Batteries

You can make your own emergency supply kit at home! Ask an adult to help you. Having a kit nearby can help you stay safe in many different kinds of emergencies.

FLOOD

When a lot of rain comes or a river overflows, that can bring a flood. Floods that happen very quickely are called flash floods.

Playing in flood water is not safe and could make you sick.

Moving water can sweep you off your feet fast. If you see flood water, never walk through it. Tell adults not to drive through it.

Martin's family knows what to do when they see flood water. Do you?

Answer Key: "TURN AROUND, DON'T DROWN"

HURRICANE

Sometimes it is safe to stay at home during the storm, but you must be prepared. During the storm, stay in a safe room with no windows. Bring your pets and emergency supply kit in the room with you.

Some areas will not be safe during a hurricane. You may be told that it is safer to leave your home and travel to a safe place. This is called

A safe place is away from the wind and flood waters. It can be a hurricane shelter, a hotel, or even the home of a family member or friend.

If you are told to evacuate, you must do this right away. Waiting to leave can be unsafe.

EARTHQUAKE

An earthquake is when the rock under the earth's surface moves. When that happens, the ground under your feet can

shake. move. or crack.

If the ground starts shaking:

- Drop where you are, onto your hands and knees
- Cover your head and neck. Crawl under a nearby sturdy table or desk if you can.
- Hold On until the shaking stops.

Find a sturdy table near you and practice Drop, Cover, and Hold On.

If you're outside when an earthquake happens, then stay there! Move to an open area if you can. Drop where you are,

When it is really hot for several days or weeks, it is called a heat wave.

A which is a fire that burns through forests and other wildlands. In some places, the weather may be really dry for a long period of time. A dangerous wildfire can start quickly in these conditions. Λ

Did you know? Most wildfires are caused by humans. Always be careful when camping or cooking outside.

Sometimes wildfires come close to houses. When this happens, you may be asked to leave your home and travel to a safe place.

Remember, this is called **ELLCLICE**.

Elan and Yuma's family needs to evacuate!

Color each picture and number them in the right order to help in their evacuation.

THANKS for coming along as I learned from my friends around the country!

Remember:

-Make a plan and practice with your family

- -Build an emergency supply kit
- -Find safe places to take shelter
