Floodplain Management Saves Noney

PORTLAND LOWERS FLOOD RISK AND INSURANCE RATES

Portland residents now save 25% in flood insurance premiums, which is an average \$365 per policy in the Special Flood Hazard Area. These lower rates are a result of Portland's continued focus on floodplain management and flood risk reduction.

FEMA's National Flood Insurance Program Community Rating System (CRS) is an incentive program that rewards communities for their actions to reduce flood risk through discounted insurance rates. Portland, a CRS 5 community, is now saving \$283,865 annually because of actions to reduce risk.
