

Living with Water: How the Netherlands Prevents Flood Disasters

Jan Peelen

Advisor for Infrastructure and Water Management, Embassy of the Kingdom of the Netherlands

Jan Peelen is the representative of the Dutch Ministry for Infrastructure and Water Management at the Embassy of the Kingdom of the Netherlands. He advises U.S. entities on the topics of resilience, urban planning & infrastructure and coordinates all water related efforts of the Dutch diplomatic network in the US.

Jan has worked for the Dutch national government since 2006 and has an extensive background in water management and infrastructure. Before his appointment to the U.S. in 2014, he coordinated the Dutch International Water Policy Program and was responsible for various initiatives to promote the Dutch water & maritime industries.

He started his career as an environmental impact assessment specialist and became a strategic advisor and project manager for various national energy & transportation infrastructure projects in The Netherlands. He was also involved in the development of new policies and regulations for large scale infrastructural projects in The Netherlands.

Jan holds a Master's of Science in Urban & Regional Planning from the University of Amsterdam.
