Living with Water: How the Netherlands Prevents Flood Disasters

- **The Delta Programme**

<https://english.deltacommissaris.nl/delta-programme>

The national Delta Programme is in place to protect the Netherlands from high water and flooding, to ensure a sufficient supply of fresh water, and to contribute to rendering the Netherlands climate-proof and water-resilient. This website provides background information on the Delta Programme and outlines its content.

- **The Netherlands in the USA**

- **Rebuild By Design**

<http://nlintheusa.com/rebuild-by-design/>

A component of the Hurricane Sandy Rebuilding Task Force, Rebuild By Design, was a new kind of design competition placing substantive collaboration between designers, researchers, community members, and government officials at the heart of the creative process

- **Overview of Dutch Watch Management: Trade, Innovation, and Security**

<https://nlintheusa.com/water/>

In the last 800 years, the Dutch have created innovative solutions to water-related problems that threaten communities, economic capital, and quality of life. A series of measures help keep Dutch cities safe and attractive, including multifunctional levees, flood-resilient buildings, and green infrastructure.

- **American new coverage of Dutch Water Management**

<http://nlintheusa.com/coverage-of-dutch-water-management/>

Media articles of Dutch collaboration with U.S. cities to improve water management.

- **Dutch Dialogues™ – Transforming land use by focusing first on water**

The Dutch Dialogues began as a collaboration with the Royal Netherlands Embassy and the American Planning Association after Hurricane Katrina. Local and international urban design and water sector experts convened to reimagine how the fundamental qualities of water and the landscape can reshape the way we live.
