

State of South Carolina

To provide you details on the impacts of Risk Rating 2.0, we've converted the percentages into the actual policy counts. We are using the percentages as shown on the color bar graph in the state profile for **South Carolina** which can be viewed at <http://www.fema.gov/nfiptransformation>.

Summary of breakouts:

Here's what the picture looks like in **South Carolina**:

1. Beginning with the more **extreme ranges** for the **green** and **grey** bars of the breakout:
 - **For all structure types of South Carolina National Flood Insurance Program policies:** (Commercial, Condos, Multi-Family, Single Family)
 - The attached breakout shows **7,273 policyholders** will see **decreases** of more than \$100 per month (\$1200 in the first year) (**Extreme end of the Green Bar**).
 - **117 policyholders** seeing **increases** over \$100 per month (\$1200 in the first year) (**Extreme end of the Grey Bar**).
 - **For all single-family home South Carolina policies:**
 - The attached breakout shows **5,178 single-family home policyholders** will see **decreases** of more than \$100 per month (\$1200 in the first year) (**Extreme end of the Green Bar**).
 - **61 single-family home policyholders** seeing **increases** over \$100 per month (\$1200 in the first year) (**Extreme end of the Grey Bar**).
2. Next, **the full range of policy counts** for the **green** and **grey** bars of the breakout:
 - **For all structure types of South Carolina National Flood Insurance Program policies:** (Commercial, Condos, Multi-Family, Single Family)
 - The sheet showed **53,213 policyholders** seeing decreases (**Green Bar**). (note slight difference with the detailed data is due to rounding differences)
 - **5,275 policyholders** seeing **increases** over \$20 per month (**Grey Bar**).

FEMA

- **For all single-family home South Carolina policies:**
 - The attached breakout shows **27,729 single-family home policyholders** seeing **decreases (Green Bar)**.
 - **3,281 single-family home policyholders** seeing **increases** over \$20 per month **(Grey Bar)**.
- 3. Finally, the **remaining policy counts** grouped in the **light blue** and **dark blue** bars.
 - **For all structure types of South Carolina National Flood Insurance Program policies:** (Commercial, Condos, Multi-Family, Single Family)
 - The sheet showed **137,602 policyholders** seeing increases of \$0 to \$10 per month **(light blue bar)**.
 - **12,469 policyholders** seeing **increases** of \$10 to \$20 per month **(dark blue bar)**.
 - **For all single-family home South Carolina National Flood Insurance Program policies:**
 - The attached breakout shows **99,952 single-family home policyholders** seeing increase of \$0 to \$10 per month **(light blue bar)**.
 - **9,415 single-family home policyholders** seeing **increases** of \$10 to \$20 per month **(dark blue bar)**.

Additional Notes

- Under the current rating methodology policyholders have been seeing an average annual increase of just over 11% or \$8 per month. Thus, Risk Rating 2.0 would increase the annual premium for these two groups roughly between \$2 and \$12 per month.
- Premiums are ultimately driven by variables that an individual policyholder controls. Upon receipt of a premium, a policyholder can change the parameters (such as the level of coverage limits, deductibles, and other additional data or take a mitigation action) that impact their properties unique rate. This is the same process that exists today under the current methodology.
