

These data should be used to confirm that a specific building is accurately represented by the building set contained at this terminal node.

Terminal Node Description

COMPARISON
TO TOTAL
DATABASE:

- 100% steel frame with infill model building type versus 7% for the total database.
- 80% seismic zones 2 and 3 versus 43% for the total database.
- 60% institutional/educational occupancy classification versus 50% for the total database.
- 43% masonry cladding versus 20% for the total database.
- 18% historic buildings versus 9% for the total database.
- In this node, 50% damage control and 50% life safety performance objective.
- In this node, 30% seismic zone 2 and 50% seismic zone 3.
