

These data should be used to confirm that a specific building is accurately represented by the building set contained at this terminal node.

Terminal Node Description

COMPARISON
TO TOTAL
DATABASE:

- 25% concrete shear wall model building type versus 15% for the total database, and 17% concrete moment frame model building type versus 6% for the total database. This node contains a mixture of concrete, masonry, steel, and URM model building types.
- 17% residential occupancy classification versus 5% for the total database.
- 100% of buildings in this node had the occupants in place during construction.
- 100% of buildings in this node had system improvements (architectural & MEP) included in the total construction costs.
- In this node, 58% are life safety and 42% are damage control performance objectives.
- 17% of the buildings in this node are historic buildings.
